have been a subject of considerable fascination since their discovery by British officers in 1819 These thirty one rock cut
caves located along a dramatic ravine above the Waghora River are known for their intricate Buddhist art spanning several
centuries The caves include monastic dwellings vih ras and prayer halls caitya halls some elaborately decorated with murals
and sculptures As these caves were carved out of the rock rather than being naturally occurring formations they required
immense effort and coordination to construct Despite the number assigned to each cave by archaeologists the order of their

excavation remains uncertain and many of them are left incomplete This unfinished state combined with stylistic diversity within individual caves suggests the artists might have worked across different caves at varying times possibly following the natural light throughout the day to guide their progress Ajanta is distinctive in the history of Indian art because it uniquely combines painting sculpture and architecture to showcase Buddhist art evolution from the early H nay na aniconic tradition through to the Mah y na phase where Buddha images and Bodhisattvas appear prominently The artistic themes in Ajanta revolve around narrative portrayals and worship focused iconography with shrine figures embodying a massive spiritual weightiness in contrast to the more graceful or dwarfish depictions of demigods and figures in the J taka tales This study explores the origins of this iconographic duality at Ajanta examining how the artistic and religious traditions that shaped it developed internally and in relation to other sites illuminating how the evolution of Buddhism itself is mirrored in its art and monuments Divided into three main parts the study analyzes historical architectural and stylistic progressions that influenced Ajanta s art The first section delves into historical contexts relevant to Buddhist development in the area while the second investigates the architectural evolution of caitya halls and vih ras and the emergence of the Buddha image The third section focuses on the stylistic progression of the narrative art at Ajanta tracking the evolution of both the Buddha image and the surrounding decorative forms Through synthesizing historical paleographic and iconographic evidence the study aims to provide a cohesive understanding of Buddhist art s evolution specifically at Ajanta over several centuries This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1977
