Carlson, 2012-01-16 Like their predecessors throughout the late nineteenth and twentieth centuries popes John Paul II and Benedict XVI have emphasized the importance of philosophy in the Catholic intellectual tradition In his encyclical *Fides et ratio* 1998 John Paul II called on philosophers to have the courage to recover in the flow of an enduringly valid philosophical tradition the range of authentic wisdom and truth Where the late pope spoke of an enduringly valid tradition Jacques Maritain and other Thomists often have referred to the perennial tradition or to perennial philosophy *Words of Wisdom* responds to John Paul's call for the development of this tradition with a much needed dictionary of terms As a resource for students in colleges universities and seminaries as well as for teachers of the perennial tradition and interested general readers *Words of Wisdom* occupies a unique place It offers precise yet clear and understandable accounts of well over a thousand key philosophical terms richly cross referenced It also explains significant terms from other philosophical movements with which Thomism and the Catholic intellectual tradition more generally has engaged either through debate or through judicious and creative incorporation Moreover it identifies a number of theological and doctrinal expressions to which perennial philosophy has contributed Finally it provides a comprehensive bibliography of works by Aquinas in English expositions and discussions of perennial themes and representative examples from the writings of all philosophers and theologians mentioned in dictionary entries

decided to focus on model theory the conspicuous absence of which in the first edition was noted in several reviews and the theory of computation including its categorical and quantum aspects The whole Part IV Model Theory is new I am very grateful to Boris I Zilber who kindly agreed to write it It may be read directly after Chapter II The contents of the first edition are basically reproduced here as Chapters I VIII Section IV 7 on the cardinality of the continuum is completed by Section IV 7 3 discussing H Woodin's discovery *The Basic Outline of Universology* S.P.
