Watkins,2005-01-01 What would we find if over a period of time we paid careful attention to the coincidences in our lives What would clusters of coincidental events reveal Susan M Watkins examines from the inside out coincidences in her life and discovers powerful insights into the workings of the conscious mind into the concepts of time and space past and future Her examples vividly illustrate how the process of examining personal coincidences enriches our experiences and opens up a vast psychological landscape that otherwise tends to go unnoticed and certainly under utilized *Parenting Matters* National Academies of Sciences, Engineering, and Medicine,Division of Behavioral and Social Sciences and Education,Board on Children, Youth, and Families,Committee on Supporting the Parents of Young Children,2016-11-21 Decades of research have demonstrated that the parent child dyad and the environment of the family which includes all primary caregivers are at the foundation of children s well being and healthy development From birth children are learning and rely on parents and the other caregivers in their lives to protect and care for them The impact of parents may never be greater than during the earliest years of life when a child s brain is rapidly

developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills charting a trajectory for their health and well being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives, generate stress or calm, and create any number of emotions including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. *Parenting Matters* identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8, universal preventive and targeted strategies used in a variety of settings that have been effective with parents of young children, and that support the identified knowledge, attitudes, and practices, and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes, as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders for promoting the wide-scale adoption of effective programs and services for parents, and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy research and practice in the United States. *Synchronicity* Joseph

Jaworski, 2011-05-30 Using his own story, the international bestselling author shows readers how 3 changes in mindset can help them shape their future. *Synchronicity* is an inspirational guide to developing the most essential leadership capacity for our time: how we can collectively shape our future. Through the telling of his life story, Jaworski posits that a real leader sets the stage on which predictable miracles, seemingly synchronistic in nature, can and do occur. He shows that this capacity has more to do with our being, our total orientation of character and consciousness, than with what we do. Leadership, he explains, is about creating day by day a domain in which human beings continually deepen their understanding of reality and are able to participate in shaping the future. He describes three basic shifts of mind required if we are to create and discover an unfolding future: shifts in how we see the world, how we understand relationships, and how we make commitments, and offers a new definition of leadership that applies to all types of leaders. A deeply personal and moving narrative that opens up new vistas on compassion, commitment, and connectedness, and hence on leadership. James MacGregor Burns, Pulitzer Prize-winning presidential biographer and Woodrow Wilson Professor of Government Emeritus, Williams College. An insightful, profound, and readable contribution to understanding the personal side of leadership. Rosabeth Moss Kanter, Ernest L. Arbuckle Professor of Business Administration, Harvard Business School, and author of *SuperCorp*. An unusually thoughtful exploration of the inner aspects of leadership, particularly in the business arena. Eschewing easy answers and ten-point plans to success, presenting the insights he has garnered from forward-looking thinkers including David Bohm and Rupert

Sheldrake Jaworski offers a searching and wise brief that deserves to be read in boardrooms everywhere Publishers Weekly

My Song: Memoir of an ER Physician Craig Dean, MD, 2014-05-12 Thirty years in the making one hundred thousand patients later the hundred numinous patients I will forever treasure It has been said that memoirs are the narratives of our life and as such become the manner and method of how we make sense out of our life s journey Indeed I could not imagine my life without my career in the ER since without it I would truly feel like a naked wizened skeleton devoid of skin flesh or viscera The ER experience was the alchemist s stone that touched my ordinary life and in so many ways made it exquisitely gilded Many were the patients that stirred the invisible fabric of my soul and made the ordinary universe seem so much more expansive and unequalled The magnificence of the ER flows from the commanding variety of patients not unlike the arresting diversity of flora in the plant kingdom renders a regal awe upon the eyes and souls of the beholder
