Love: A Very Short Introduction Ronald de Sousa, 2015-01-08 Although there are many kinds of love erotic love has been celebrated in art and poetry as life's most rewarding and exalting experience worth living and dying for and bringing out the best in ourselves And yet it has excused and even been thought to justify the most reprehensible crimes Why should this be This Very Short Introduction explores this and other puzzling questions Do we love someone for their virtue their beauty or their moral or other qualities Are love's characteristic desires altruistic or selfish Are there duties of love What do the sciences neuroscience evolutionary and social psychology and anthropology tell us about love Many of the answers we give to such questions are determined not so much by the facts of human nature as by the ideology of love Ronald de Sousa considers some of the many paradoxes raised by love looking at the different kinds of love affections affiliation philia storage agape but focusses on eros or romantic love He considers whether our conventional beliefs about love and sex are deeply irrational and argues that alternative conceptions of love and sex although hard to formulate and live by may be worth striving for

Limerence: The state of being infatuated with another person. Finch Moore, 2018-11-09 Eighth grade isn't easy for anyone and we all look for ways to express ourselves Some people dye their hair other people start wearing makeup for the first time and I wrote poems about a crush I had on a boy that I couldn't talk to anyone about but him and when I couldn't talk to him I wrote poetry instead When

I stumbled onto seven sonnets I wrote in eighth grade I was filled with many emotions Happiness that I had found them lingering hurt from a preteen crush and confidence in my skills as a writer There was a time in my life when these sonnets were one of the things I was proud of the most I owe it to my past self to publish them like I always said that I would Alongside the sonnets I have included three poems which continue the theme of heartbreak and one poem which covers what it means to exist at all *Psychotherapy* Dorothy Tennov,1975 Breaking Hearts Roy F. Kinnison,2014-03-08 This book is a practical guide to using the science of attachment and relationships to find the right life partner If you were brought up in the Western world you ve been trained on fairy tales of love and relationships that are misleading at best and at worst have you making mistake after mistake in starting relationships with the wrong kinds of people who will waste your time and keep you from finding a loyal partner Science has the answer Or at least a guide to save you the time and effort of discovering for yourself how many wrong types of romantic partners there are Reading this book will help you recognize the signs of some of the syndromes that prevent people from being good partners We ll go through those syndromes and point out some of the signs Those little red flags you sometimes notice when you are getting to know someone Often they speak loud and clear once you understand the types and you can decide immediately to run away or approach with caution those who show them If you re young and just starting to look for a partner good news the world is swarming with well adjusted charming matches for you if you know how to recognize them The bad news you are inexperienced and you may not recognize the right type of person when you date them Many people expect to experience an immediate sense of excitement an overwhelming rush of attraction and to fall in love rapidly and equally with someone who feels the same This rarely happens and when it does it usually ends badly And expecting it will cause you to let go of people who are steady loving and attentive if you had given them a chance So once you ve identified someone who makes you laugh answers your messages and is there for you when you want them don t make the mistake of tossing them aside for the merely good looking sexy or intriguing stranger If you re older bad news while you were spending time and effort on relationships you were hoping would turn out better or even happily nestled in a good relationship or two most of the secure reliable sane people in your age group got paired off They re married or happily enfamilied and most of the people your age in the dating pool are tragically unable to form a good long term relationship You should always ask yourself why is this one still available

there may be a good answer recently widowed or left a long term relationship or it may be that this person has just been extraordinarily unlucky in having over twenty short relationships in twenty years to cite one case But it s far more likely you have met someone with a problematic attachment style As you age past 40 the percentage of the dating pool that is able to form a secure stable relationship drops to less than 30% 1 and since it can take months of dating to understand why Mr or Ms SeemsNice is really the future ex partner from Hell being able to recognize the difficult types will help you recognize them faster and move on to the next This book outlines the basics which might be all you need and points you toward more resources if you want to understand more about your problem partner If you re wondering if the guy or girl you ve been hanging out with might not be quite right this is the place to match those little red flags you ve noticed with known bad types And by getting out fast you can avoid emotional damage and wasted time and get going on finding someone who s really right for you Study all of the bad types and you ll detect them before even getting involved Or you could be one of the few people who recognizes their own problems in one of these types There are study materials and plans of action for you too If you ve had lots of relationships and they all seem to go wrong the common factor is you Your task is to make yourself into a better partner a goal that even the most evolved of us can always work toward **Love and Other Words** Christina
