**Changing the Scientific Study of Religion: Beyond Freud?** Jacob A. v. van Belzen,2009-06-18 The psychoanalytic approach to religion has changed radically during the course of the twentieth century In both clinical and theoretical work in psychoanalysis developments have taken place that frequently are not noted by persons who assume that all that can be said has been said by Freud The study of religious phenomena persons events and traditions has always been a substantial part of applied psychoanalysis and here also major developments have taken place It is no exaggeration to state that the scientific study of religion has been revolutionized by the integration of psychological perspectives including the field of psychoanalysis This volume differs from other recent publications on the topic of psychoanalysis and religion in drawing upon the entire field of psychoanalytic involvement with religion It is interdisciplinary in approach and unlike other books on the topic brings together an exceptional combination of theoretical empirical and clinical studies No other book provides integrated examples of all three types of work

**Love and the Genders** Erik von Kuehnelt-Leddihn,2019-12-13 *Love and the Genders* deals with the four forms of love Eros the love between the sexes the affections between family members friendship with the accent between the sexes and charity This scholarly book 60% elaborate footnotes is based on the author s German book *Das Raetsel Liebe The Engima of Love* Vienna Herold 1975 All

forms of love tend toward union The rapist does not love and masturbation needs no partner The book has profound cultural and even political implications What are the qualities and qualifications of the sexes their identities and specific roles Men are not superior to women and vice versa but they are radically different and the biological research in recent years has made a number of discoveries We only know since 1958 for certain that every cell in the male body carries an additional element the Y but brain research has proven that the sexual differences are not only hormonal known for a long time but are also in the brain Thus men and women are in no way interchangeable They are not made to compete Their differences are rather statistical than personal and there are situations in which they can or must substitute for each other Thus queens might have to rule and men might have occasionally to tend babies although they cannot nurse them A high culture is ordered such that the sexes genders might get their fulfillment and naturally they must feel affection for each other The point of view of this book is Christian which includes a Hebrew background It is not specifically Catholic and does not deal directly with sexual ethics Contraception is a sexual problem abortion is obviously plain murder Homosexuality is mentioned a bit more broadly Misandry and misogyny are referenced in the North American and European situation Friendship not sex or Eros is the most important element in marriage If one marries can the partner be a friend for a lifetime Fidelity belongs psychologically to friendship not to Eros or sex What about the political aspect of the love the interest the enthusiasm for otherness Leftists are identitarians This book with its scope and documentation is quite unique It deals basically with the crisis of our time and age
