A Book About Love Jonah Lehrer, 2016-07-12 Jonah Lehrer has a lot to offer the world The book is interesting on nearly every page Good writers make writing look easy but what people like Lehrer do is not easy at all David Brooks The New York Times Book Review Science writer Jonah Lehrer explores the mysterious subject of love Weaving together scientific studies from clinical psychologists longitudinal studies of health and happiness historical accounts and literary depictions child rearing manuals and the language of online dating sites Jonah Lehrer's A Book About Love plumbs the most mysterious most formative most important impulse governing our lives Love confuses and compels us and it can destroy and define us It has inspired our greatest poetry defined our societies and our beliefs and governs our biology From the way infants attach to their parents to the way we fall in love with another person to the way some find a love for God or their pets to the way we remember and mourn love after it ends this book focuses on research that attempts even in glancing ways to deal with the long term and the everyday The most dangerous myth of love is that it s easy that we fall into the feeling and then the feeling takes care of itself While we can easily measure the dopamine that causes the initial feelings of falling in love the partnerships and devotions that last decades or longer remain a mystery This book is about that mystery Love Lehrer argues is not built solely on overwhelming passion but fascinatingly on a set of skills to be cultivated over a lifetime Anatomy of Love Helen E. Fisher, 1992 An exploration of human behavior examines the innate aspects of love sex and marriage discussing flirting behavior courting postures the brain chemistry of attraction divorce and adultery in societies around the world and more Reprint The Organs of Sense Adam Ehrlich Sachs, 2019-05-21 This book is only for people who like joy absurdity passion genius dry wit youthful folly amusing historical arcana or telescopes Rivka Galchen author of Little Labors and American Innovations In 1666 an astronomer makes a prediction shared by no one else in the world at the stroke of noon on June 30 of that year a solar eclipse will cast all of Europe into total darkness for four seconds This astronomer is rumored to be using the longest telescope ever built but he is also known to be blind and not only blind but incapable of sight both his eyes having been plucked out some time before under mysterious circumstances Is he mad Or does he despite this impairment have an insight denied the other scholars of his day These questions intrigue the young Gottfried Leibniz not yet the world renowned polymath who would go on to discover calculus but a nineteen year old whose faith in reason is shaky at best Leibniz sets off to investigate the astronomer s claim and over the three hours remaining before the eclipse occurs or fails to occur the astronomer tells the scholar the haunting and hilarious story behind his strange prediction a tale that ends up encompassing kings and princes family squabbles obsessive pursuits insanity philosophy art loss and the horrors of war
