James F. Masterson Loray Daws, 2024-02-01 In this volume Loray Daws traces the life and work of Dr James F. Masterson with a focus on the scientific development and later expansion of the six developmental stages of the Masterson Method. Exploring more than 15 of Masterson's volumes as well as countless articles, Daws shows how Masterson's approach to Object Relations and the developmental self can serve clinicians in both conceptualizing and treating borderline, narcissistic and schizoid disorders of self. Considering the pioneering and innovative nature of Masterson's work, Daws looks at how he creatively expanded on Freud's theories on repression, successfully developing therapeutically sound ways to touch and transform developmental trauma and trauma reflected in a deep abandonment depression.

Transcending the Self Frank Summers, 2013-11-12 Despite the popularity of object relations theories, these theories are often abstract with the relation between theory and clinical technique left vague and unclear. Now in *Transcending the Self: An Object Relations Model of Psychoanalytic Therapy*, Summers answers the need for an integrative object relations model that can be understood and applied by the clinician in the daily conduct of psychoanalytic therapy. Drawing on recent infancy research, developmental psychology and the works of major theorists including Bollas, Benjamin, Fairbairn, Guntrip, Kohut and Winnicott, Summers melds diverse object relational contributions into a coherent viewpoint with broad clinical applications. The object relations model emerges as a distinct amalgam of interpersonal, relational and interpretive perspectives. It is a model that can help patients undertake the most gratifying and treacherous of personality journeys that aim at the transcendence of the

childhood self Self transcendence in Summers sense means moving beyond the profound limitations of early life via the therapeutically mediated creation of a newly meaningful and authentic sense of self Following two chapters that present the empirical and theoretical basis of the model he launches into clinical applications by presenting the concept of therapeutic action that derives from the model Then in three successive chapters he applies the model to patients traditionally conceptualized as borderline narcissistic and neurotic He concludes with a chapter that addresses more broadly the craft of conducting psychoanalytic therapy Filled with richly detailed case discussions Transcending the Self provides practicing clinicians with a powerful demonstration of how psychoanalytic therapy informed by an object relations model can effect radical personality change It is an outstanding example of integrative theorizing in the service of a real world therapeutic approach
