Face Reveals Paul Ekman, Erika L. Rosenberg, 2005-04-14 While we have known for centuries that facial expressions can reveal what people are thinking and feeling it is only recently that the face has been studied scientifically for what it can tell us about internal states social behavior and psychopathology Today's widely available sophisticated measuring systems have allowed us to conduct a wealth of new research on facial behavior that has contributed enormously to our understanding of the relationship between facial expression and human psychology The chapters in this volume present the state of the art in this research They address key topics and questions such as the dynamic and morphological differences between voluntary

and involuntary expressions the relationship between what people show on their faces and what they say they feel whether it is possible to use facial behavior to draw distinctions among psychiatric populations and how far research on automating facial measurement has progressed The book also includes follow up commentary on all of the original research presented and a concluding integration and critique of all the contributions made by Paul Ekman As an essential reference for all those working in the area of facial analysis and expression this volume will be indispensable for a wide range of professionals and students in the fields of psychology psychiatry and behavioral medicine
