

The background of the book cover is a sepia-toned photograph of classical architectural columns. The columns are fluted and have papyrus capitals. The lighting is dramatic, with strong shadows and highlights, giving the image a sense of depth and texture. The columns are arranged in a row, receding into the distance.

Handbook of Forest Resource Economics Shashi Kant, Janaki Alavalapati, 2014-04-03 It is increasingly recognized that the economic value of forests is not merely the production of timber Forests provide other key ecosystem services such as being sinks for greenhouse gases hotspots of

biodiversity tourism and recreation They are also vitally important in preventing soil erosion and controlling water supplies as well as providing non timber forest products and supporting the livelihoods of many local people This handbook provides a detailed comprehensive and broad coverage of forest economics including traditional forest economics of timber production economics of environmental role of forests and recent developments in forest economics The chapters are grouped into six parts fundamental topics in forest resource economics economics of forest ecosystems economics of forests climate change and bioenergy economics of risk uncertainty and natural disturbances economics of forest property rights and certification and emerging issues and developments Written by leading environmental forest and natural resource economists the book represents a definitive reference volume for students of economics environment forestry and natural resource economics and management

Beyond Bad Apples Michelle Tuveson, Daniel Ralph, Kern Alexander, 2020-05-28 The one bad apple spoiling the whole barrel has become a common metaphor used with reference to risk culture in organisations This inside out perspective begins with the individual as the unit of analysis and follows with inferences to the broader environment Since the Global Financial Crisis GFC of 2008 risk culture for many has become the explanation for shortcomings poor decisions and moral failures in organisations This volume presents an institutional perspective of the forces that shape risk culture and culture more generally in organisations through a multi disciplinary examination from a variety of leading academics and subject specialists The authors demonstrate that firms play a role as manufacturers and managers of risk and they challenge common conceptions that attribute risk to chance circumstances or rogue behaviours The foundational concepts needed for an institutional view of risk culture are highlighted with subsequent links to significant developments within society and firms

The Economics of Business Valuation Patrick Anderson, 2013-04-10 For decades the market asset and income approaches to business valuation have taken center stage in the assessment of the firm This book brings to light an expanded valuation toolkit consisting of nine well defined valuation principles hailing from the fields of economics finance accounting taxation and management It ultimately argues that the value functional approach to business valuation avoids most of the shortcomings of its competitors and more correctly matches the actual motivations and information set held by stakeholders Much of what we know about corporate finance and mathematical finance derives from a narrow subset of firms publicly traded corporations The value functional approach can be readily applied to both large firms and companies that do not issue publicly traded stocks and bonds cannot borrow without constraints and often rely upon entrepreneurs to both finance and manage their operations With historical side notes from an international set of sources and real world exemplars that run throughout the text this book is a future facing resource for scholars in economics and finance as well as the academically minded valuation practitioner *Super-Flexibility for Knowledge Enterprises* Homa Bahrami, Stuart Evans, 2014-07-26 strategy but we also focus on execution We talk about organizational design and also reflect on leadership practices Our assumption is that in a dynamic world leaders at all levels have to constantly switch gears wear different hats and na gate at different altitudes They have to think about the total enterprise not in terms of compartmentalized silos or fields of functional expertise Much like a g eral contractor they have to draw on specialized expertise as and when needed yet keep the big picture in mind Our hope is that our diagnostic tools can help teams develop a shared frame of reference and generate cross functional dialogue The third driving force behind this second edition is the gradual convergence between the worlds of entrepreneurial start ups and challenges facing established corporations Innovation agility and initiative are no longer the

exclusive preserve of start ups Established companies are looking for ways to re invent themselves to innovate to think creatively and to make their enterprises more flexible agile and entrepreneurial We have had the good fortune to sit at the intersection of these two worlds We hope our ideas can benefit both groups We set out to provide a buffet table a menu of options that can be helpful for the two ends of the spectrum

Insolvency Timing and Managerial Decision-Making

Frederik Drescher,2013-09-25 Frederik Drescher addresses the timing of non mandatory insolvency filings based on threatening illiquidity 18 InsO with the aim of a company s restructuring as an agency problem between owners and management The hypothesis of a tendency towards delayed insolvency filings which was developed using a decision model is experimentally confirmed Moreover the author analyzes different incentive instruments potentially leading to earlier insolvency filings

Investment Decision-making Using Optional Models

David Heller,2019-12-30 In order to create value companies must allocate their resources effectively and evaluate investment alternatives This book examines from a theoretical and empirical point of view how managerial flexibility can be integrated into investment decisions through the optional approach Unlike the traditional net present value method the actual options take into account indeterminate elements These lead to unpredictable cash flows at the time of the investment decision especially in the context of complex and risky projects The book puts into perspective the use of optional models and their interactions The different categories of options are the subject of practical applications through analysis of investment decisions where uncertainty is growing Therefore studies make it possible to consider the flexible nature of investment choices by integrating new information and risk over time

Handbook of Research on the Strategic Management of Family Businesses

Palma-Ruiz, Jesús Manuel,Barros-Contreras, Ismael,Gnan, Luca,2020-01-10 The literature on family business has developed significantly over the last years However efforts remain to summarize and systematize the main aspects that affect the behavior of this type of company In this regard the topic of strategic management has been developed In this sense it is especially important to recognize how the family decisively influences the behavior of the company and also to identify how the existence of the company affects family dynamics Those who manage family businesses whether family or not must reconcile both perspectives business and family in the definition of strategic objectives allowing sustainability and continuity in this type of organization The Handbook of Research on the Strategic Management of Family Businesses provides emerging research that covers how strategic management in the family business has been developed and identifies the objectives that sustain this strategic behavior the main areas of analysis family and business the definition of strategies and their implementation Also the authors of this book review the different scenarios for family firms and propose strategies to tackle the challenges and seize the possibilities to grow in a competitive and dynamic environment Featuring coverage on a broad range of topics such as human capital organizational leadership and knowledge creation this book is ideally designed for family firms managers advisors consultants policymakers business professionals executives entrepreneurs researchers academicians and students
