Brown, Henry L. Roediger III, Mark A. McDaniel, 2014-04-14 Drawing on cognitive psychology and other fields Make It Stick offers techniques for becoming more productive learners and cautions against study habits and practice routines that turn out to be counterproductive The book speaks to students teachers trainers athletes and all those interested in lifelong learning and self improvement **Key Research and Study Skills in Psychology** Sieglinde McGee, 2010-04-16 I am happy to recommend this to my students as it covers jargon without using jargon and explains all those simple things that many academics take for granted It also gives good examples of how to get the best from your time studying psychology from how to write good essays to the rules of writing lab reports Dr Jay Coogan University of East London I am happy to recommend this to my students as it covers jargon without using jargon and explains all those simple things that many academics take for granted It also gives good examples of how to get the best from your time studying psychology from how to write good essays to the rules of writing lab reports Dr Joy Coogan University of East London This book provides students with a wide range of research and study skills necessary for achieving a successful classification on a psychology degree course It replaces the stress and fear experienced when encountering essays reports statistics and exams with a sense of confidence enthusiasm and even fun Sieglinde McGee presents indispensable instruction advice and tips on note making and note taking evaluating academic literature writing critical essays preparing for and doing essay and MCQ exams understanding research methods and issues associated with conducting research writing and presenting reports and research and also some important computer skills Examples provided will show how to score well on assignments and exams and also the sort of approach layout errors omissions or answer style that would achieve a lower grade Practical exercises and interactive tasks are integrated throughout to clarify key points and give the students a chance to practise on their own This is a useful resource for students taking modules in study and research skills in psychology and an essential guide for all other students studying on psychology programmes Dr Sieglinde McGee is an Associate of the School of Psychology at Trinity College Dublin where she taught for several years **Essential Study Skills for Nursing** Christine Ely, Ian Scott, 2007-01-01 Study skills are

essential to nursing and the aim of this book is to provide you with an easy to use guide that will help you to develop the study skills necessary to your academic and professional life Study Skills for Nursing and Healthcare Students Pat

Maier, Geraldine Price, Michelle Cowen, 2013-11-26 An accessible student friendly handbook that covers all of the essential study skills that will ensure that students get the most out of their Nursing or Healthcare course Study Skills for Nursing Healthcare Students has been developed specifically to provide tried tested guidance on the most important academic and study skills that students require throughout their time at university and beyond Presented in a practical and easy to use style it demonstrates the immediate benefits to be gained by developing and improving these skills during each stage of their course

**The First 20 Hours** Josh Kaufman, 2013-06-13 Forget the 10 000 hour rule what if it s possible to learn the basics of any new skill in 20 hours or less Take a moment to consider how many things you want to learn to do What s on your list What s holding you back from getting started Are you worried about the time and effort it takes to acquire new skills time you don t have and effort you can t spare Research suggests it takes 10 000 hours to develop a new skill In this nonstop world when will you ever find that much time and energy To make matters worse the early hours of practicing something new are always the most frustrating That s why it s difficult to learn how to speak a new language play an instrument hit a golf ball or shoot great photos It s so much easier to watch TV or surf the web In The First 20 Hours Josh Kaufman offers a systematic approach to rapid skill acquisition how to learn any new skill as quickly as possible His method shows you how to deconstruct complex skills maximize productive practice and remove common learning barriers By completing just 20 hours of focused deliberate practice you ll go from knowing absolutely nothing to performing noticeably well Kaufman personally field tested the methods in this book You ll have a front row seat as he develops a personal yoga practice writes his own web based computer programs teaches himself to touch type on a nonstandard keyboard explores the oldest and most complex board game in history picks up the ukulele and learns how to windsurf Here are a few of the simple techniques he teaches Define your target performance level Figure out what your desired level of skill looks like what you re trying to achieve and what you ll be able to do when you re done The more specific the better Deconstruct the skill Most of the things we think of as skills are actually bundles of smaller subskills If you break down the subcomponents it s easier to figure out which ones are most important and practice those first Eliminate barriers to practice Removing common distractions and unnecessary effort makes it much easier to sit down and focus on deliberate practice Create fast feedback loops Getting accurate real time information about how well you re performing during practice makes it much easier to improve Whether you want to paint a portrait launch a start up fly an airplane or juggle flaming chain saws The First 20 Hours will help you pick up the basics of any skill in record time and have more fun along the way

Powerful Teaching Pooja K. Agarwal, Patrice M. Bain, 2024-11-13 Unleash powerful teaching and the science of learning in your classroom Powerful Teaching Unleash the Science of Learning empowers educators to harness rigorous research on how students learn and unleash it in their classrooms In this book cognitive scientist Pooja K Agarwal Ph D and veteran K 12 teacher Patrice M Bain Ed S decipher cognitive science research and illustrate ways to successfully apply the science of learning in classrooms settings This
