Military Power Stephen Biddle,2010-12-16 In war do mass and materiel matter most Will states with the largest best equipped information technology rich militaries invariably win The prevailing answer today among both scholars and policymakers is yes But this is to overlook force employment or the doctrine and tactics by which materiel is actually used In a landmark reconception of battle and war this book provides a systematic account of how force employment interacts with materiel to produce real combat outcomes Stephen Biddle argues that force employment is central to modern war becoming increasingly important since 1900 as the key to surviving ever more lethal weaponry Technological change produces opposite effects depending on how forces are employed to focus only on materiel is thus to risk major error with serious consequences for both policy and scholarship In clear fluent prose Biddle provides a systematic account of force employment s role and shows how this account holds up under rigorous multimethod testing The results challenge a wide variety of standard views from current expectations for a revolution in military affairs to mainstream scholarship in international relations and orthodox interpretations of modern military history Military Power will have a resounding impact on both scholarship in the field and on policy debates over the future of warfare the size of the military and the makeup of the defense budget

acknowledges wider truths war is unending and violence is deeply entrenched in our society But it doesn't have to be this way This book equips readers with an understanding of the history culture and politics of warfare in order to interrogate and resist an increasingly violent world Wounding the World investigates the ways that violence and war have become internalized in contemporary human consciousness in everything from the way we speak to the way our children play with one another to the way that we ascribe social characteristics to our guns and other weapons With a remarkable depth of insight Bourke argues for a radical overhaul of our collective stance towards militarism from one that simply aims to reduce violence against people to one that would eradicate all violence Her message is judicious and vital knowledge about weapons and the violence they bring has simply become too important to cast aside or leave to the experts
