But it is hard. It's hard because it forces people and organizations to make specific choices about their future, something that doesn't happen in most companies. Now two of today's best-known business thinkers get to the heart of strategy explaining what it's for, how to think about it, why you need it and how to get it done. And they use one of the most successful corporate turnarounds of the past century which they achieved together to prove their point. A.G. Lafley, former CEO of Procter & Gamble in close partnership with strategic adviser Roger Martin, doubled P & G's sales, quadrupled its profits and increased its market value by more than 100 billion in just ten years. Now drawn from their years of experience at P & G and the Rotman School of Management where Martin is dean, this

book shows how leaders in organizations of all sizes can guide everyday actions with larger strategic goals built around the clear essential elements that determine business success where to play and how to win The result is a playbook for winning Lafley and Martin have created a set of five essential strategic choices that when addressed in an integrated way will move you ahead of your competitors They are What is our winning aspiration Where will we play How will we win What capabilities must we have in place to win What management systems are required to support our choices The stories of how P G repeatedly won by applying this method to iconic brands such as Olay Bounty Gillette Swiffer and Febreze clearly illustrate how deciding on a strategic approach and then making the right choices to support it makes the difference between just playing the game and actually winning

and military affairs to bring its original and pragmatic ideas to life The detailed examples range from Apple to General Motors from the two Iraq wars to Afghanistan from a small local market to Wal Mart from Nvidia to Silicon Graphics from the Getty Trust to the Los Angeles Unified School District from Cisco Systems to Paccar and from Global Crossing to the 2007 08 financial crisis Reflecting an astonishing grasp and integration of economics finance technology history and the brilliance and foibles of the human character Good Strategy Bad Strategy stems from Rumelt s decades of digging beyond the superficial to address hard questions with honesty and integrity
