educational loss such interruption would cause education authorities the world over created a variety of alternative mechanisms of education delivery They did so quickly and with insufficient knowledge about what would work well for which children and for what aspects of the schooling experience Having to create such alternative arrangements in short order was the ultimate adaptive leadership challenge one for which no playbook existed one for which solutions would have to be invented rather than drawn from existing technical knowledge The nature of the challenge differed across the world and regions and it differed also within countries as a function of the differential public health and economic impact of the pandemic on communities and of variations in institutional and financial resources available to redress such impact including availability of digital infrastructure and previous knowledge and experience of teachers and students with digital pedagogies and other resources to create alternative education delivery systems Sustaining educational opportunities amidst these challenges created by the pandemic was an example of adaptive education response not to a unique unexpected challenge but to one in a larger class of problems just one of the many adaptive conundrums facing communities and societies Beyond the challenges resulting from the pandemic other complications of that sort predating the pandemic included those resulting from poverty inequality social inclusion governance climate change among others In some ways the pandemic served as an accelerant for some of those augmenting their impact or underscoring the urgency of addressing them Adaptive puzzles of this sort including pandemics are likely to continue to impact education systems in the foreseeable future This makes it necessary to strengthen the capacity of education systems to respond to them Reimagining education systems so they are resilient in the face of adaptive challenges is an opportunity to mobilize new talent and institutional resources Partnerships between school systems and universities can contribute to those reimagined and more resilient systems they can enhance the institutional capacity of education systems to devise solutions and to implement them Such partnerships are also an opportunity for universities to be more deliberate in integrating their three core functions of research teaching and outreach in service of addressing significant social challenges in a context in rapid flux In this book we present the results of one approach to produce the integration between research teaching and outreach just described resulting from engaging graduate students in collaborations with school systems for the purpose of helping identify ways to sustain educational opportunity during the disruption caused by the pandemic This activity engaged our students in research and analysis contributing to their education and it engaged them in service to society The book examines what happened to educational opportunity during the Covid 19 pandemic in Bangladesh Belize the municipality of Santa Ana in Costa Rica Guatemala Kenya in the States of Sinaloa and Quintana Roo in Mexico South Africa United Arab Emirates and in the United States in Richardson Independent School District in Texas It offers a systematic analysis of policy options to sustain educational opportunity during the pandemic
