*Realigning Interests* M. Chang, 2016-02-10 Why do currency crises happen What conditions set the stage for such a crisis How severe will it be When will it happen This book answers these questions illustrating the points by examining the exchange rate realignments of the European Monetary System It also shows how balancing the tension between domestic and international politics plays a vital part in a government's willingness to uphold its exchange rate commitments Michele Chang pays particular attention to the role of domestic elections since these may prevent governments from credibly committing to a fixed exchange rate and from responding quickly and coherently to market instability thus encouraging speculation

*Germany after the Grand Coalition* S. Bolgherini, F. Grotz, 2010-12-20 In Germany Grand Coalitions of the two major parties the Christian Democrats CDU CSU and the Social Democrats SPD generally have a bad reputation Hence the CDU CSU SPD government under Angela Merkel 2005 2009 was neither the parties nor the citizens preferred choice its performance was seen quite critical from the outset and it was finished without further ado after the 2009 federal election Has the Grand Coalition 2005 2009 been a single episode or rather a turning point for German politics This book provides a retrospective of the first Merkel government an analysis of the 2009 election and an account of its prospective consequences

European Economic Legal Order After Brexit Enzo Cardi, 2021-07-29 This book takes an innovative approach to provide a mirror perspective of the legal systems of the UK and the EU in contemporary institutional scenarios At the beginning of the second decade of the 21st century the legal systems of

the EU and the UK are facing challenges of epic proportions Never before have the two legal orders been confronted with the simultaneous impact of a series of events First the effect of the divorce between the two regulatory systems caused by the UK's withdrawal from the EU The Negotiating Documents and the Draft Texts being discussed and aimed at leading to a New Partnership are examined in the book Second the book discusses the impact of the coronavirus shock in all European economies leading to a substantial change of political perspective in the EU legal order implying innovative debt instruments Third it explores the consequences of the judicial activism of the German Constitutional Court undermining the strategic role of the European Central Bank and the primacy of the European Union Court of Justice The book questions the effects deriving from the legacy i.e. the foundations of the two legal systems on handling the issues of our time the impact on market regulation of the striking contemporary events and the unsettled consequences on policy of the current convulsing political and financial landscape The book will be essential reading for those working in the areas of European public regulatory law

*Market-Based Banking and the International Financial Crisis* Iain Hardie, David Howarth, 2013-08-29 Economics and political economy lack the analytical tools to explain the differing impact of the recent international financial crisis that erupted in 2007 on developed economies The principal contribution of this edited volume is to offer a market based banking framework which transcends the dominant dichotomous understanding of financial systems in terms of credit based and capital based It demonstrates why this dichotomy is obsolete through an appreciation of the activities of banks Further it employs market

based banking to overcome the inability of existing typologies to explain financial system change Market based banking provides a framework that is more reflective of banking in modern financial systems and one that provides a more successful explanation of the differential impact of the recent financial crisis The comparative and single country chapters in this volume compare the extent of market based banking across eleven countries including all of the G7 economies The chapters also consider the impact of the financial crisis in terms of necessary government support and lending to non financial companies The edited volume includes work by authors who are widely respected experts in national political economies finance financial regulation banking central banking and monetary policy This volume is one of the first book length comparative studies of the financial crisis and its impact and one of the few recent comparative studies of national banking financial systems in any discipline

**The British National Bibliography** Arthur James Wells, 2004

**Power Politics, Banking Union and EMU** Shawn Donnelly, 2018-03-28 This book examines the politics of Banking Union and EMU reform in the EU and draws lessons for what it means for international politics both in Europe and for international relations more broadly It demonstrates that most of the reforms in Europe to break free of the Eurozone and banking crises in which Europe continues to find itself focus on building up the capacities of national authorities rather than European ones The result is that national authorities remain largely in control of the decisions and funds that are to be deployed to prevent economic disaster if a single EU bank fails The likely outcome is an accelerated balkanization of the European market for the foreseeable future The book also contends that power politics and realism in particular is a defining feature of European politics with coercion and enforced national responsibility at the demand of Germany the dominant form of institution building that established the responsible sovereignty model and shut down the possibility of alternatives In making this case the book demonstrates that the dominant view in international relations that power politics best explains the behaviour of states also apply to the EU This text will be of key interest to scholars and students of the Eurozone crisis EU politics economic policy and more broadly to political economy public policy and international relations The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license
