

A Thomistic Sexual Realism

Harrison Jennings

Abstract: Sexual realism has traditionally held that our categories of sex refer to something *real* about our biology. Sexual non-realism, on the other hand, either partially or wholly rejects this position. Sexual non-realists typically point to intersexuality as evidence that our categories of sex are not inherent to nature but are culturally constructed. This paper makes use of the work of Carrie Hull in her book *The Ontology of Sex* to explore the philosophical backgrounds of sexual non-realism and to make a general case for sexual realism from a Thomistic framework.

The nature of sex has been a subject of increasing dispute since the twentieth century. Sexual realism has traditionally held that our categories of sex—namely “male” and “female”—refer to something *real* about our biology—that they are, as it were, accurate reflections of the actual structure and division of the world. Sexual non-realism, on the other hand, either partially or wholly rejects this position. As many of its adherents will admit, sexual non-realism is contrary to the dominant received perception in western societies. Nevertheless, they insist, to achieve progress it is necessary to challenge and subvert the dominant perception. And yet, there are potent philosophical reasons for skepticism concerning these conclusions and the underlying arguments and paradigms which support and animate them. Additionally, there are potent philosophical reasons for affirming sexual realism. The aim of this paper is to highlight some of these reasons. More specifically, my aim is to explore the philosophical roots and background of sexual non-realism and to present a general case for sexual realism. Much of my thinking throughout is heavily influenced by Carrie Hull’s excellent book *Ontology of Sex*, which also makes a philosophical case for sexual realism. The unique contribution of this paper, however, is in recapitulating and furthering Hull’s case from a specifically Thomistic framework. In particular, I will be arguing that the Thomistic understanding of final causality offers a powerful resource for understanding relevant issues, countering arguments for non-realism, and supporting an overall case for realism.

The twentieth century saw the rise of a conceptual distinction between sex and gender, which by now has become fairly standard in academic circles and increasingly in popular culture. According to this distinction, one’s sex is typically said to

The Realist Turn Douglas B.

Rasmussen, Douglas J. Den Uyl, 2020-08-05 Douglas B Rasmussen and Douglas J Den Uyl maintain that a realist turn namely one in which the natural order is the basis for individual rights is needed to bring about a proper understanding and defense of liberty They argue that the critical character of individual rights results from their being tethered to metaphysical realism After reprising their explanation and defense of natural rights Rasmussen and Den Uyl explain metaphysical realism and defend it against neo pragmatist objections They show it to be a formidable and preferable alternative to epistemic constructivism and crucial for a suitable understanding of ideal theory Husserlian Intentionality and Non-Foundational Realism J.J. Drummond, 1990-02-28 The rift which has long divided the philosophical world into opposed schools the Continental school owing its origins to the phenomenology of Husserl and the analytic school derived from Frege is finally closing But this closure is occurring in ways both different and in certain respects at odds with one another On the one hand scholars are seeking to rediscover the concerns and positions common to both schools positions from which we can continue fruitfully to address important philosophical issues On the other hand successors to both traditions have developed criticisms of basic assumptions shared by the two schools They have suggested that we must move not merely beyond the conflict between these two modern schools but beyond the kind of philosophy represented in the unity of the two schools and thereby move towards a new postmodern philosophical style On the one hand then and for example Husserl scholarship has in recent years witnessed the development of an interpretation of Husserl which more closely aligns his phenomenology with the philosophical concerns of the analytic tradition In certain respects this should come as no surprise and is long overdue It is true after all that the early Husserl occupied himself with many of the same philosophical issues as did Frege and the earliest thinkers of the analytic tradition Examples include the concept of number the nature of mathematical analysis meaning and reference truth formalization and the relationship between logic and mathematics *Dispositionalism and the Metaphysics of Science* Travis Dumsday, 2019-01-24 Dispositionalism is the view that causal powers are among the irreducible properties of nature It has long been among the core competing positions in the metaphysics of laws but its potential implications for other key debates within metaphysics and the philosophy of science have remained under explored Travis Dumsday fills this major gap in the literature by establishing new connections between dispositionalism and such topics as substance ontology ontic structural realism material composition emergentism natural kind essentialism perdurantism time travel and spacetime substantivalism He also puts forward a novel view concerning the precise relationship between causal powers and the fundamental laws of nature His rich and accessible study will appeal to readers interested in contemporary analytic

Philosophy of Being Gerard Smith, Lottie H. Kendzierski, 2020-04-08 **Well-Being and Theism** William A. Lauinger, 2012-07-12 Well Being and Theism is divided into two distinctive parts The first part argues that desire fulfillment welfare theories fail to capture the good part of good for and that objective list welfare theories fail to capture the for part of good for Then with the aim of capturing both of these parts of good for a conjunctive theory one which places both a value constraint and a desire constraint on well being is advanced Lauinger then defends this proposition which he calls the desire perfectionism theory against possible objections In the second part Lauinger explores the question What metaphysics best supports the claim that the vast majority of humans have the desires for friendship accomplishment health etc built into
