## **Realism Character And Bias The Fiction Of Mendele Mocher Sefarim:**

**Realism, Caricature, and Bias** David Aberbach, 1993-03-01 Explores the psychology of prejudice and self hate in the fiction of Mendele Mocher Sefarim one of the key figures in modern Yiddish and Hebrew literature The book presents an analysis of the tension between realism and caricature in Mendele s portrayal of the Russian Jews under tsarist rule *The Emergence Of Modern Jewish Politics* Zvi Gitelman, 2010-06-15 The Emergence of Modern Jewish Politics examines the political social and cultural dimensions of Zionism and Bundism the two major political movements among East European Jews during the first half of the twentieth century While Zionism achieved its primary aim the founding of a Jewish state the Jewish Labor Bund has not only practically disappeared but its ideals of socialism and secular Jewishness based in the diaspora seem to have failed Yet as Zvi Gitelman and the various contributors to this volume argue it was the Bund that more profoundly changed the structure of Jewish society politics and culture In thirteen essays prominent historians political scientists and professors of literature discuss the cultural and political contexts of these movements their impact on Jewish life and the reasons for the Bund s demise and they question whether ethnic minorities are best served by highly ideological or solidly pragmatic movements

*Microhistory and the Picaresque Novel* Binne de Haan, Konstantin Mierau, 2014-10-16 In the sixteenth century the picaresque novel introduced marginal figures wanderers beggars and thieves as the protagonists of elaborate prose narratives thus appearing to give a voice to hitherto unrepresented social types This raises several questions as to the referentiality of the picaresque text pertinent both to historians and literary scholars alike Microhistory can help investigate this referentiality of the picaresque text by revealing how particular historical agents perceived marginals and marginality and juxtaposing these agent perspectives to the literary representation Microhistory and the Picaresque Novel is the first publication to combine scholarship on the picaresque novel and the practice of microhistory This innovative volume argues that the approach of microhistorical studies such as *The Cheese and the Worms* by Carlo Ginzburg *Inheriting Power*

The Story of an Exorcist by Giovanni Levi and The Return of Martin Guerre by Natalie Zemon Davis can be used to shed new light on classic picaresque novels such as Guzmán de Alfarache by Gil Blas de Grmmelshausen and their many epigones. The volume brings together expert scholars on the picaresque novel such as Professor Robert Folger on the one hand and established microhistorians such as Professor Giovanni Levi on the other. This exploration is further enriched with contributions by Professor Matti Peltonen, an expert on history theory, and Professor Hans Renders, an expert on biography studies, as well as providing case studies from recent research by the editors Binne de Haan and Dr Konstantin Mierau.

**A Silvan Tomkins Handbook** Adam J. Frank, Elizabeth A. Wilson, 2020-08-04 An accessible guide to the work of American psychologist and affect theorist Silvan Tomkins. The brilliant and complex theories of psychologist Silvan Tomkins (1911–1991) have inspired the turn to affect in the humanities, social sciences, and elsewhere. Nevertheless, these theories are not well understood. A Silvan Tomkins Handbook makes his theories portable across a range of interdisciplinary contexts and accessible to a wide variety of contemporary scholars and students of affect. A Silvan Tomkins Handbook provides readers with a clear outline of Tomkins's affect theory as he developed it in his four-volume masterwork *Affect Imagery Consciousness*. It shows how his key terms and conceptual innovations can be used to build robust frameworks for theorizing affect and emotion. In addition to clarifying his affect theory, the Handbook emphasizes Tomkins's other significant contributions from his broad theories of imagery and consciousness to more focused concepts of scenes and scripts. With their extensive experience engaging and teaching Tomkins's work, Adam J. Frank and Elizabeth A. Wilson provide a user-friendly guide for readers who want to know more about the foundations of affect studies.

*Handbook of Research on Student Engagement* Sandra L. Christenson, Amy L. Reschly, CATHY WYLIE, 2012-02-23 For more than two decades, the concept of student engagement has grown from simple attention in class to a construct comprised of cognitive, emotional, and behavioral components that embody and further develop motivation for learning. Similarly, the goals of student engagement have evolved from dropout prevention to improved outcomes for lifelong learning. This robust expansion has led to numerous lines of research across disciplines and are brought together clearly and comprehensively in the *Handbook of Research on Student Engagement*. The Handbook guides readers through the field's rich history, sorts out its component constructs, and identifies knowledge gaps to be filled by future research. Grounding data in real-world learning situations, contributors analyze indicators and facilitators of student engagement, link engagement to motivation, and gauge the impact of family, peers, and teachers on engagement in elementary and secondary grades. Findings on the effectiveness of classroom interventions are discussed in detail. And because assessing engagement is still a relatively new endeavor, chapters on measurement methods and issues round out this important resource. Topical areas addressed in the Handbook include Engagement across developmental stages, Self-efficacy in the engaged learner, Parental and social influences on engagement, and achievement motivation. The engaging nature of teaching for competency development. The relationship between

engagement and high risk behavior in adolescents Comparing methods for measuring student engagement An essential guide to the expanding knowledge base the Handbook of Research on Student Engagement serves as a valuable resource for researchers scientist practitioners and graduate students in such varied fields as clinical child and school psychology educational psychology public health teaching and teacher education social work and educational policy **The Idea of Modern Jewish Culture** Eliezer Schweid,2008 The vast majority of intellectual religious and national developments in modern Judaism revolve around the central idea of Jewish culture This book is the first synoptic view of these developments that organizes and relates them from this vantage point The first Jewish modernization movements perceived culture as the defining trait of the outside alien social environment to which Jewry had to adapt To be cultured was to be modern European as opposed to medieval ghetto Jewish In short order however the Jewish religious legacy was redefined retrospectively as a historical culture with fateful consequences for the conception of Judaism as a humanly and not only divinely mandated regime The conception of Judaism as culture took two main forms an integrative vernacular Jewish culture that developed in tandem with the integration of Jews into the various nations of western central Europe and America and a national Hebrew culture which though open to the inputs of modern European society sought to develop a revitalized Jewish national identity that ultimately found expression in the revival of the Jewish homeland and the State of Israel **The Books in My Life** Henry Miller,1969 In this unique work Henry Miller gives an utterly candid and self revealing account of the reading he did during his formative years **Cold War Rhetoric** Martin J. remains when logical explanations can no longer account for the experiences that we recognize as part of being alive Liquid Life references a third millennial understanding of matter that seeks to restore the agency of the liquid soul for an ecological era which has been banished by reductionist brute materialist discourses and mechanical models of life Offering an alternative worldview of the living realm through a new materialist and liquid study of matter Armstrong conjures forth examples of creatures that do not obey mechanistic concepts like predictability efficiency and rationality With the advent of molecular science an increasingly persuasive ontology of liquid technologies can be identified Through the lens of lifelike dynamic droplets the agency for these systems exists at the interfaces between different fields of matter energy that respond to highly local effects with no need for a central organizing system Liquid Life seeks an alternative partnership between humanity and the natural world It provokes a re invention of the languages of the living realm to open up alternative spaces for exploration including contributor Rolf Hughes angelology of language which explores the transformative invocations of prose poetry and Simone Ferracina s graphical notations that help shape our concepts of metabolism upcycling and designing with fluids A conceptual and practical toolset for thinking and designing liquid life reunites us with the irreducible soul substance of living things which will neither be simply solved nor go away
