Realist Criminology Crime Control And Policing In The 1990s:

Realist Criminology John Lowman, Brian MacLean, 1992-01-01 In the 1980s in Britain a new school of critical criminology arose to challenge the political and philosophical idealism that characterized its critical predecessors and to offer an alternative to the crime control policies of the New Right Arguing that by overemphasizing the crimes of the powerful much of critical criminology had virtually ignored the impact of street crime on its victims a left realism emerged to reassert the centrality of the victim in the development of a progressive criminology Critical realism recognizes the seriousness of street crime for those people victimized by it particularly women acknowledges that a consensus as to the desirability of a core group of laws does exist and advocates various kinds of criminal justice reform and crime prevention strategies In this respect there are important parallels with debates in feminism concerning the role of the state in the problem of violence against women One of the most important contributions critical realism has made to criminological research is the development of local crime surveys which attempt to measure patterns of victimization and policing and how these are perceived by the general public Such research remains largely undeveloped in North America and it is the purpose of this book to begin to take stock of these developments and examine their relevance for North America This is the first text to include a critical examination of left realism examine its relationship to feminism and comment on its relevance outside Britain

Routledge Handbook of Critical Criminology Walter S. DeKeseredy, Molly Dragiewicz, 2018-04-09 The main objective of the second edition of the Routledge Handbook of Critical Criminology is twofold 1 to provide original chapters that cover contemporary critical criminological theoretical offerings generated over the past five years and 2 to provide chapters on important new substantive topics that are currently being studied and theorized by progressive criminologists Special attention is devoted to new theoretical directions in the field such as southern criminology queer criminology and green criminology The diverse chapters cover not only cutting edge theories but also the variety of research methods used by leading scholars in the field and the rich data generated by their rigorous empirical work In addition some of the chapters suggest innovative and realistic short and long term policy proposals that are typically ignored by mainstream criminology These progressive strategies address some of the most pressing social problems facing contemporary society today which generate much pain and suffering for socially and economically disenfranchised people The new edition of the Handbook is a major work in redefining areas within the context of international multidisciplinary critical research and in highlighting emerging areas such as human trafficking Internet pornography and image based sexual abuse It is specifically designed to be a comprehensive resource for undergraduate and postgraduate students researchers and policymakers

Radical and Marxist Theories of Crime Paul B. Stretesky, 2017-03-02 The essays selected for this volume show how radical and Marxist criminology has established itself as an influential critique since it emerged in the late 1960s Unlike orthodox criminology which emphasizes individual level explanations of criminal behavior radical and Marxist criminology emphasizes power

inequality and structures especially those related to class as key factors in crime law and justice This collection of essays draws attention to the way in which structural forces shape and influence both individual and institutional for example governmental behavior highlights neglected crime corporate governmental state corporate and environmental which causes more extensive damage than the street crimes examined by orthodox criminology and discusses the ways in which law and criminal justice processes reinforce power structures and contribute to class control *Advancing Critical Criminology* Walter S. DeKeseredy, Barbara Perry, 2006-06-29 *Advancing Critical Criminology* constitutes a timely addition to the growing body of knowledge on critical criminology scholarship DeKeseredy and Perry have assembled a volume that provides scholars with an in depth review of the extant literature on several major branches of criminology as well as examples of how critical criminologists apply their theoretical perspectives to substantive topics such as drugs interpersonal violence and rural crime Accordingly this work is divided into two main sections overviews of theories and applications Each chapter provides a summary of work in a specific area along with suggestions for moving the field forward This reader is unique in its choice of topics which have often been overlooked in the past An expert collection of international scholars *Advancing Critical Criminology* is certain to stimulate lively debates and generate further critical social scientific work in this field **An Introduction to Criminological Theory** Roger Hopkins Burke, 2018-11-01 This book provides a comprehensive and up to date introduction to criminological theory for students taking courses in criminology at both undergraduate and postgraduate level Building on previous editions this book presents the latest research and theoretical developments The text is divided into five parts the first three of which address ideal type models of criminal behaviour the rational actor predestined actor and victimized actor models Within these the various criminological theories are located chronologically in the context of one of these different traditions and the strengths and weaknesses of each theory and model are clearly identified The fourth part of the book looks closely at more recent attempts to integrate theoretical elements from both within and across models of criminal behaviour while the fifth part addresses a number of key recent concerns of criminology postmodernism cultural criminology globalization and communitarianism the penal society southern criminology and critical criminology All major theoretical perspectives are considered including classical criminology biological and psychological positivism labelling theories feminist criminology critical criminology and left realism situation action desistance theories social control theories the risk society postmodern condition and terrorism The new edition also features comprehensive coverage of recent developments in criminology including the myth of the crime drop the revitalization of critical criminology and political economy shaming and crime defiance theory coerced mobility theory and new developments in social control and general strain theories This revised and expanded fifth edition of *An Introduction to Criminological Theory* includes chapter summaries critical thinking questions policy implications a full glossary of terms and theories and a timeline of criminological theory making it essential reading for those studying criminology and taking courses on theoretical criminology

understanding crime and crime and deviance Crime, Risk, and Insecurity Tim Hope, Richard Sparks, 2000 Just what is the fear of crime and how does it impact upon the lives of the citizens of late modern societies This book presents work on the questions of fear anxiety risk and trust both as problems of everyday living and as key themes in the culture and politics of western societies **Under Siege** Walter S. DeKeseredy, 2003-01-01 Under Siege is one of the first books of its kind It vividly describes the devastating consequences of living in a public housing community damaged by the disappearance of manufacturing jobs government cutbacks and other alarming structural transformations that currently plague the United States and Canada Walter DeKeseredy and his colleagues build on the rich theoretical perspectives developed by feminist scholars as well as those constructed by Jock Young Robert Sampson and William Julius Wilson as they present both the qualitative and quantitative results of a case study of six public housing estates located in an impoverished urban area This groundbreaking book provides an in depth analysis of predatory crime victimization intimate partner victimization public racial and sexual harassment and the relationship of all these harms to the residents perceptions of their neighborhood social disorganization collective efficacy Under Siege is uniquely valuable both for its rich theoretical basis and for its transparent presentation of the authors research methodology It is a thought provoking sociological contribution that offers progressive strategies for ameliorating both poverty and crime in North American public housing complexes European Journal of Policing Studies , 2018-07-31 Contents Introduction Antoinette Verhage Lieselot Bisschop and Wim Hardyns br Articles How to Police a Porous Fortress Monica den Boer 1 Abstract The purpose of this article is to provide an overview of the way in which the European Union has gradually but steadily built a security architecture based on the control of mobility and borders Different logics of policing are interwoven in several projects which are strongly interdependent with technological innovation Furthermore the European policing of mobility is primarily performed by mounting surveillance both inside and beyond European borders by means of which all forms of movement transactions travelling etc are subjected to intensive monitoring by multiple actors who are interlinked through strategies and systems The main finding is that border policing is shifting in a fundamental way from fixed to fluid from territorial to virtual and from physical to technological Hence paradoxically though mobility is strongly promoted as one of the main virtues of the European Union Europe s precautionary protection may be at ill ease with the free movement of people The article seeks to stimulate the knowledge and debate about deeper shifts in Europe s security apparatus and develops this from a law enforcement perspective Keywords Europe borders security mobility technology 1 Academic Dean at the Police Academy of The Netherlands Member of the Committee on European Integration of the Advisory Council on International Affairs and Visiting Professor at the College of Europe in Bruges Police Science in Germany History and New Perspectives Joachim Kersten 1 and Ansgar Burchard 2 Abstract In the German speaking academic world Police Science Polizeiwissenschaft is a fairly new and little known area of social science Accordingly the academic status of police science is anything but firmly established but rather at a hybrid stage of

development The very combination of policing and academic study research seems to remain largely incompatible not only to police managers but also to main stream sociology German police science differs substantially from the Anglo American Australian approach One main difference pertains to legal traditions others are due to historical and cultural developments that will be taken up in this descriptive essay However Anglo American Australian police theories have a lot to offer to German and European police scientists and this will be demonstrated For a future common approach to an evolving European police science similar descriptions will be required from other European countries to establish a comparative foundation of joint EU police studies Some of the principal dimensions of such a comparison will be sketched in this essay It concludes with a presentation of empirically based police studies carried out by instructors and Master students at the newly founded German Police University in Münster Topics are media coverage of clashes between police and demonstrators a typology of third party intervention in cases of assault in public places and COREPOL EU FP7 a comparative security research project aiming at an improvement of police minority relations through means of restorative justice programs

Nightclub George Rigakos, 2008 In the last thirty years bouncers have emerged as iconic gatekeepers of contemporary cool exclusivity and social capital in urban centres around the world In this groundbreaking empirical study Rigakos critiques the supposed liberating and expressive potential of nightclubs by theorizing them within the linked themes of risk consumption and security in late capitalism People attend nightclubs to be seen and see others to consume others as aesthetic objects of desire and to elicit desire in others the desire to be desired This synoptic frenzy according to Rigakos fuses surveillance and aesthetic consumption It fetishizes bodies and amplifies social capitals producing optic violence and crises of respect fuelled by alcohol At closing time populations flow out of the haze of the nightclub and onto city streets from private spectacle to public nuisance Mirroring the general late capitalist compulsion to binge and purge the nightclub s spectacle of consumption produces a litany of unfulfilled courtiers of the night staggering out of one spectacle and immediately into another In this sense bouncers are not only prime policing agents in the nighttime economy but are producers of an urban risk market a site of circumscribed transgression and consumption that begins at the door *Victims, Crime and Society* Pamela Davies, Peter Francis, Chris Greer, 2007-11-18 Focusing on key issues themes and concepts within victimology this edited collection provides an accessible and comprehensive critical analysis of crucial areas within victimisation The main theories are related to and integrated with empirical research in an engaging style Dr Anette Ballinger Keele University This book achieves the rare feat of helping its readers without patronising them The aids to the reader tables boxes glossaries questions and suggestions for further reading will prove genuinely helpful to students and their teachers but they appear within a text that is theoretically informed as well as comprehensive and up to date in its
