**The Construction of Social Reality** John R. Searle, 2010-05-11 This short treatise looks at how we construct a social reality from our sense impressions at how for example we construct a five pound note with all that implies in terms of value and social meaning from the printed piece of paper we see and touch In The Construction of Social Reality eminent philosopher John Searle examines the structure of social reality or those portions of the world that are facts only by human agreement such as money marriage property and government and contrasts it to a brute reality that is independent of human agreement Searle shows that brute reality provides the indisputable foundation for all social reality and that social reality while very real is maintained by nothing more than custom and habit

Berger, Thomas Luckmann, 1991-03-28 A general and systematic account of the role of knowledge in society aimed to stimulate both critical discussion and empirical investigations This book is concerned with the sociology of everything that passes for knowledge in society It focuses particularly on that common sense knowledge which constitutes

the reality of everyday life for the ordinary member of society The authors are concerned to present an analysis of knowledge in everyday life in the context of a theory of society as a dialectical process between objective and subjective reality Their development of a theory of institutions legitimations and socializations has implications beyond the discipline of sociology and their humanistic approach has considerable relevance for other social scientists historians philosophers and anthropologists

*Baudelaire and the Aesthetics of Bad Faith* Susan Blood, 1997-04-01 This is a study of Baudelaire's canonization in the critical debates of the twentieth century focusing particularly on his role in the development of a modernist consciousness Much recent work on Baudelaire assumes his modernism by emphasizing his relationship to current critical preoccupations by sounding him out on issues of race and gender for example or by correcting his politics The author begins from the premise that this updating of Baudelaire mistakenly takes him for our contemporary Instead she attempts to treat modernism as a historical problem by seeing Baudelaire as engaged in a more difficult dialogue with twentieth century critics The book concentrates on two key moments in the literary history of the twentieth century the periods following each world war At these junctures French intellectuals intensely reconsidered their cultural patrimony and articulated something like a modernist consciousness Baudelaire stood at the center of this process becoming a sacred figure of modernism and his poetry contributed to a radical reorienting of aesthetic sensibilities For the post World War I period the author focuses on Paul Valéry's essay Baudelaire's Situation for post World War II on the virulent debate between Jean Paul Sartre and Georges Bataille over the question of Baudelaire's bad faith She argues that Sartre's resistance to the sacralization of Baudelaire and to the continuing formulation of a modernist ideology actually suggests a valuable way of rethinking Baudelaire's poetry and critiquing the modern consciousness She attempts to show that something like an aesthetics of bad faith exists and that it is a useful concept for understanding modernism in relationship to its own history Throughout Baudelaire's poetry is examined in detail with a focus on its relationship to his writings on caricature on the problem of the secret architecture and on the place

of allegory in a symbolist poetics In the closing chapter the author analyzes Baudelaire's denunciation of photography which reveals the various tensions or bad faith implicit in the modernist consciousness
