## **Realities Of Images:**

**Reality Modeled After Images** Michael Young, 2021-08-30 Reality Modeled After Images Architecture and Aesthetics after the Digital Image explores architecture's entanglement with contemporary image culture. It looks closely at how changes produced through technologies of mediation alter disciplinary concepts and produce political effects. Through both historical and contemporary examples, it focuses on how conventions of representation are established, maintained, challenged, and transformed. Critical investigations are conjoined with inquiries into aesthetics and technology in the hope that the tensions between them can aid an exploration into how architectural images are produced, disseminated, and valued, how images alter assumptions regarding the appearances of architecture and the environment. For students and academics in architecture design and media studies, architectural and art history, and related fields, this book shows how design is impacted and changed by shifts in image culture, representational conventions, and technologies. **Image, Reality and Media**

**Construction** Fengmin Yan, 2019-09-24 This book explores how news media construct social issues and events and thereby convey certain perceptions within the scope of framing theory. By operationalizing media framing as a process of interpretation through defining problem, diagnosing causes, making moral judgments, and suggesting solutions, the book proposes a systematic and transparent approach to images in news discourse. Based on a frame analysis, it examines how German news media framed a list of China-related issues and events and thereby conveyed particular beliefs and opinions on this country. Moreover, it investigates whether there were dominant patterns of interpretation and the extent to which diverse views were evident by comparing two major daily newspapers with opposite political orientations, the FAZ and the taz. Motivated by the relationship between image and reality, the book explores image formation and persistence from media construction of meaning and human cognitive complexity in perceiving others. Media select certain issues and events and then interpret them from particular perspectives. A variety of professional and non-professional factors behind news making may result in biased representations. In addition, from a social psychological perspective, inaccurate perceptions of foreign cultures may arise from categorical thinking, biased processing of stimulus information, intergroup conflicts of interest, and in-group favoritism. Accordingly, whether media coverage deviates from reality is not the main concern of this book; instead, it emphasizes the underlying logics upon which the conclusions and judgments were drawn. It therefore contributes to a rational understanding of Western discourse and holds practical implications for both Chinese public diplomacy and a more constructive role of news media in promoting the understanding of others. **America's Teenagers--Myths and Realities**

Sharon L. Nichols, Thomas L. Good, 2004-07-19 The media's presentation suggests that American teenage culture today is the most violent, sexual, and amoral youth culture in history. In this book, Nichols and Good deconstruct the negative images held by large numbers of adults. Recognizing that many teenagers are left by adults to socialize themselves and the consequences of this careless indifference, the authors' goal is to influence a more positive view, leading to stronger social policies and better

services resources and programs to meet the needs of America's youth Unique features of America's Teenagers Myths and Realities Media Images Schooling and the Social Costs of Careless Indifference include powerful analytic lenses used to revisit typical depictions of youth a wealth of information brought to bear on understanding teenagers behavior and consideration of a broad range of adolescent behaviors across critical socializing settings The book begins with a discussion of the continuing myth of adolescence how and why youth are devalued and an overview of current beliefs about youth drawn from two 1990s Public Agenda Polls This is followed by chapters on youth and the media and the pressures that youth face in various dimensions of their lives Topics include youth violence the sex lives of teenagers tobacco alcohol drugs and teens healthy living and decision making working teens and youth and education The concluding chapter pulls together themes generated throughout the book and provides examples of policies that would underscore the value of viewing youth as a social investment General guidelines are provided for teachers parents policymakers and citizens to facilitate responding to youth in meaningful proactive ways that improve the quality of life for teenagers and the broader society
