*Management Skills* W.T. Singleton, 2013-03-09 w T SINGLETON THE CONCEPT This is the third in a series of books devoted to the study of real skills The topic is management A book on social skills is still to come and it might seem that the sequence should be reversed on the grounds that social skills are obviously one element in management skills but it is

appropriate to deal with management first on the criterion of increasing complexity Management skills are easier to understand than general social skills This is because the defining characteristic of a skill is a purpose The purpose of organizations in which managers operate and the tasks in which they are engaged are not easy to define but they are certainly less obscure than are the more general purposes of communities and people interactions in which the complete range of social skills is practised Skills like purposes are inherently to do with people It follows that the skills view of management will be as a people based activity Individuals carry out management tasks and these tasks always involve other individuals of whom some are subordinate some superior and some equivalent within the hierarchy of the particular management organization The concept of a hierarchy is as central to management as it is to skills The alternative to hierarchy is anarchy Management is not solely concerned with people

*Quality Management in Micro firms – Myth or Reality? A Maltese Micro Manufacturing firm under review* Edward de Brincat, 2014-02-01 Manufacturing companies including a local micro enterprise Quality Postform Ltd are persistently facing competitive pressures as a consequence of customers demanding higher quality products The emergence of Quality Management has been attributed by many researchers and Quality Gurus including Phil Crosby as a strategic imperative for typical organisations to survive within a highly competitive environment Nevertheless research carried out throughout the past years is relatively restricted regarding the practicality of micro manufacturing firms in implementing Crosby's Quality Improvement Programme which is claimed to be highly beneficial in typical situations This dissertation seeks to investigate this scenario from both a descriptive and critical perspective towards Quality Postform Ltd The research provides a critical evaluation of the academic contributions towards the quality management concept Distinct disputed viewpoints have been identified focusing on Crosby's 14 Step Quality Improvement Programme From one end of the spectrum supporters uphold that claimed benefits have been acknowledged Alternatively others sustain that in essence a Quality Improvement Programme is counter productive in terms of its application within Small and Medium sized Enterprises However the researcher has identified four key pre requisites in order for micro firms to effectively implement Crosby's programme These include management commitment the acknowledgement of a quality problem the organisation's readiness to embrace change together with the suppliers readiness to support the quality programme The methodology applied to assess the presence of these four pre requisites at QPL was to compile primary qualitative data through one to one face to face interviews with key management officials This approach is justified due to the absence of formalised documentation and as a result it is imperative to assess that historical data on Quality Systems is seriously lacking at QPL The field research outcome reveals that QPL's management is experiencing serious doubts regarding the feasibility and practicality of the programme's implementation within a micro manufacturing firm This is the case primarily whenever the latter is facing limited financial and human resource capabilities such as at QPL The research findings disclose that none of the four pre requisites are present within this micro firm Moreover it confirms the scepticism on the part of     **This Game of Hip Hop Artist**
