Reality Through the Arts Sporre,2003-06 This introductory exploration of basic artistic concepts and terms applies them to a skeletal multi disciplinary and multi cultural history of artistic styles It treats all the arts painting printmaking photography sculpture music theatre dance film architecture literature uniformly and uses a common outline to reinforce the relationship of terms and concepts to the perceptual process The book also ties both artistic media and history to the theme of art as a reflection of human reality This examination focuses on the media of the arts pictures sculpture music theatre cinema dance architecture literature the styles of the arts ancient approaches artistic reflections in the pre modern world as well as artistic styles in the emerging modern world and the beginnings of modernism pluralism in a post modern age For art enthusiasts and others interested exploring how artists express themselves Arts-Fine Arts ,2006 **The Humanities Through the Arts** F. David Martin, Lee A. Jacobus, 1978 Humanities through the Arts is intended for introductory level interdisciplinary courses offered across the curriculum in the Humanities Philosophy Art English Music and Education departments Arranged topically by art form from painting sculpture photography and architecture to literature music theater film and dance This beautifully illustrated text helps students learn how to actively engage a work of art The new sixth edition retains the popular focus on the arts as an expression of cultural and personal values **The Impact and Future of Arts and Humanities Research** Paul Benneworth, Magnus Gulbrandsen, Ellen

Hazelkorn, 2016-11-17 Drawing on original international research by a cross European social science team this book makes an important contribution to the discussion about the future of arts and humanities research It explores the responses of these fields to the growing range of questions being asked about the value impact and benefit of publicly funded research The objective is to better understand what really matters rather than what is easily measured The book increases our understanding of the contribution which university based arts and humanities research makes to society and the economy by exploring how it is defined appreciated and accounted for by researchers policymakers and civil society It identifies appropriate practices and methodologies to assess and demonstrate quality and value beyond the academy The book will be essential reading for researchers and policymakers as well as research organisations and anyone interested in the arts and

humanities     Reality Through the Arts Dennis J. Sporre, 2001 This introductory exploration of basic artistic concepts and terms applies them to a skeletal multi disciplinary and multi cultural history of artistic styles It treats all the artspainting printmaking photography sculpture music theatre dance film architecture literature uniformly and uses a common outline to reinforce the relationship of terms and concepts to the perceptual process The book also ties both artistic media and history to the theme of art as a reflection of human reality This examination focuses on the media of the arts pictures sculpture music theatre cinema dance architecture literature the styles of the arts ancient approaches artistic reflections in the pre modern world as well as artistic styles in the emerging modern world and the beginnings of modernism pluralism in a post modern age For art enthusiasts and others interested exploring how artists express themselves     Arts and Humanities in Progress Dario Martinelli, 2016-10-13 The book aims to introduce a research concept called Numanities as one possible attempt to overcome the current scientific social and institutional crisis of the humanities Such crisis involves their impact on and role within society their popularity among students and scholars and their identity as producers and promoters of knowledge The modern western world and its economic policies have been identified as the strongest cause of such a crisis Creating the conditions for but in fact encouraging it However a self critical assessment of the situation is called for Our primary fault as humanists was that of stubbornly thinking that the world s changes could never really affect us as we felt our identity was sacred In the light of these approaches the main strengths of humanities have been identified in the ability to promote critical thinking and analytical reasoning provide knowledge and understanding of democracy and social justice develop leadership cultural and ethical values The main problems of humanities are the lack economic relevance the socio institutional perception of them as impractical and unemployable the fact that they do not match with technological development Finally the resulting crisis consists mainly in the absence or radical reduction of funding from institutions a decrease in student numbers a decrease in interest a loss of centrality in society A Numanities New Humanities project should consider all these aspects with self critical assessment on the first line The goal is to unify the various fields approaches and also potentials of the humanities in the context dynamics and problems of current societies and in an attempt to overcome the above described crisis Numanities are introduced not as a theoretical paradigm but in terms of an umbrella concept that has no specific scientific content in it that particularly means that the many existing new fields and research trends that are addressing the same problems post humanism transhumanism transformational humanities etc are not competitors of Numanities but rather possible ways to them Therefore more than a theoretical program Numanities intend to pursue a mission and that is summarized in a seven point manifesto In the light of these premises and reflections the book then proceeds to identify the areas of inquiry that Numanities in their functions and comprehensive approach seek to cover The following list should also be understood as a statement of purposes for this entire book series These in other words will be the topics areas we intend to represent Once elaborated on the foundations of Numanities the book features a second part

that presents two case studies based on two relatively recent and now updated investigations that the author has performed in the fields of musical and animal studies respectively. The two cases and relative areas of inquiry were selected because they were considered particularly relevant within the discussion of Humanities and in two different ways. In the first case study, the author discussed the most typical result or perhaps cause of the technophobic attitude that was addressed in the first part of the book: the issue of authenticity as applied in the author's particular study to popular music. In the second case study, he analyzes two different forms of comparative analysis between human and non-human cognition like in the former case, this study too is aimed at a critical commentary on what the author considers redundant biases in current humanistic research: anthropocentrism and speciesism.

*Digital Bodies* Susan Broadhurst, Sara Price, 2017-10-12. This book explores technologies related to bodily interaction and creativity from a multi-disciplinary perspective. By taking such an approach, the collection offers a comprehensive view of digital technology research that both extends our notions of the body and creativity through a digital lens and informs of the role of technology in practices central to the arts and humanities. Crucially, *Digital Bodies* foregrounds creativity, the interrogation of technologies, and the notion of embodiment within the various disciplines of art, design, performance, and social science. In doing so, it explores a potential or virtual new sense of the embodied self. This book will appeal to academics, practitioners, and those with an interest in not only how digital technologies affect the body but also how they can enhance human creativity.

**Art of Displacement** Giovanni Perillo, 2020-01-02. In his artistic research, Giovanni Perillo aims to generate conflicts with oneself to weaken certainties, stereotypes, and rigid expectations, encouraging a dialogue to express one's reflections on the real freedom of one's choices and on the possible influences that they imply. Through a *détour*, a displacement, a deviation from alienating cultural mechanisms, aesthetic experimentation can become practical for a transformation towards a different self-awareness. Taking the cue from the theory of events, I started to research stimuli and creative interaction processes through my artistic investigation and production. The stimuli had to be able to arouse behaviours and interpretations that are far from conformist and pre-established models. The interpretations as answers to a stimulus coming from reality are the significant consequences of the sense and vision of reality. The conventional and conformist interpretations form the specific psychological structure of a culture, and for this reason, they are its identity. If the reactions of the individuals who interact with artwork were not spontaneous, heterogeneous, or unpredictable, they would show the homogenized and homogenizing game of taking part to practices where roles and goals of the players are pre-established and reinforce a system of perception of reality that is influenced by dominant socio-cultural models.

Excerpt from the Introduction by Giovanni Perillo. In *Art of Displacement*, Giovanni Perillo establishes a new and important dialogue around ethnicity, displacement, and migration. Spanning the arts as well as the social sciences and in particular psychology, Perillo asks us to take a leap of faith. He wants us to leave the comfort of our academic homes and to

escape our ivory towers and consider what displacement means Establishing his discussion in a project he calls the Aesthetics of Migrations Perillo pushes boundaries challenges assumptions Perillo uses the Art of Displacement to help us navigate the beliefs and preconceived assumptions we bring to our encounters with migrants and strangers More importantly he asks us to recognize the constructed nature of our assumptions we make about migrants and strangers Once we recognize our own bias he offers the opportunity to search for alternatives The French philosopher sociologist Pierre Bourdieu argued that human life is organized around habitus or the ingrained habits skills and dispositions that we possess that are grounded in life experience and that organize our response to the world around us Habitus is powerful and creates an assumption of the natural order that becomes real as it is shared and used to organize beliefs laws and social rules Perillo helps us recognize how a Western habitus limits and restricts our ability to connect in fact he goes so far as to argue our shared habitus embodied in the maps we create fragment our world and the people in it in ways that drive stereotypes prejudice and the rise of nationalistic xenophobia we see today Jeffrey H Cohen PhD Professor of Anthropology at Ohio State University United States Content PREFACE by Jeffrey H Cohen INTRODUCTION MEMORIZATION OF FACES ASSOCIATED WITH PROFESSIONS AND CHARACTERS IMAGE OF THE WORD WORD TO THE IMAGE THE INFLUENCE OF STEREOTYPES AND PREJUDICES IN AESTHETIC CHOICES AESTHETICS OF MIGRATIONS SKIN colourS TEST II ARTWORKS SERIES OF MAPS WITH MIGRATORY EXCHANGES IN COMPLIANCE WITH THE RULE OF CONTIGUITY AND WITHOUT THE POSSIBILITY OF RETURN TO PREVIOUSLY INHABITED REGIONS SKIN colourS TEST NEARLY EQUAL PALO DEL COLLE SKIN colourS PROJECT SKIN colourS TEST II      *Using Arts-based Research Methods* Jenna Ward, Harriet Shortt, 2020-01-22 This book showcases a selection of arts based research methods used in the empirical study of business organisation and the humanities Each chapter presents a discursive analysis and a detailed how to guide for a range of methods including poetry drawing photography and social media film food knitting letter writing and dance Consideration is given to a variety of steps in the research process from research design and data collection to analysis and publication Using Arts based Research Methods is a unique resource for experienced researchers and students looking to broaden their palette of qualitative research methods      *Perceiving the Arts* Dennis J. Sporre, 2014-01-22 Provides an introductory straight forward and response oriented overview of the arts Perceiving the Arts presents the basic formal technical experiential and contextual qualities of the arts in a brief clear and factual manner Students will develop confidence in approaching the arts and will gain skills that encourage life long artistic and cultural engagement Intended to provide a basic overview of the major artistic disciplines drawing painting printmaking photography sculpture architecture music theatre cinema dance and literature the book teaches readers what to look and listen for in the humanities MyArtsLab is an integral part of the Sporre program Engaging activities and assessment are part of a teaching and learning system that helps students gain a broader understanding of arts and cultures With MyArtsLab students can explore in depth analyses of relevant artwork architecture
