Programming Reality Zoë Druick, Aspa Kotsopoulos, 2008-08-01 *Programming Reality Perspectives on English Canadian Television* the first anthology dedicated to analyses of Canadian television content is a collection of original interdisciplinary articles combining textual analysis and political economy of communications It explores the television that has thrived in the Canadian regulatory and cultural context namely programs that straddle the border between reality and fiction or even blur it The conceptual basis of this collection is the hybrid nature of television fare the widely theorized notion that all mediations of reality involve fiction in the form of narrative or symbolic shaping Each of the

contributions here is a reminder too of the significant relationship of television to nation building in Canada to the imaginative work involved in thinking through the relations that constitute nations citizens and communities The collection focuses on English language Canadian television because the imperatives guiding its texts are markedly different from those pertaining to their French language counterparts The collection therefore develops a nuance of perspective on the cultural and political economic specificities that inform the imaginative work of television production for English Canada

The Nicest Kids in Town Matthew F. Delmont, 2012-02-22 American Bandstand one of the most popular television shows ever broadcast from Philadelphia in the late fifties a time when that city had become a battleground for civil rights Counter to host Dick Clark s claims that he integrated American Bandstand this book reveals how the first national television program directed at teens discriminated against black youth during its early years and how black teens and civil rights advocates protested this discrimination Matthew F Delmont brings together major themes in American history civil rights rock and roll television and the emergence of a youth culture as he tells how white families around American Bandstand s studio mobilized to maintain all white neighborhoods and how local school officials reinforced segregation long after Brown vs Board of Education The Nicest Kids in Town powerfully illustrates how national issues and history have their roots in local situations and how nostalgic representations of the past like the musical film Hairspray based on the American Bandstand era can work as impediments to progress in the present

The Future of Live Karin van Es, 2016-11-28 Liveness is a persistent and much debated concept in media studies Until recently it was associated primarily with broadcast media and television in particular However the emergence of social media has brought new forms of liveness into effect These forms challenge common assumptions about and perspectives on liveness provoking a revisiting of the concept In this book Karin van Es develops a comprehensive understanding of liveness today and clarifies the stakes surrounding the category of the live She argues that liveness is the product of a dynamic interaction between media institutions technologies and users In doing so she challenges earlier conceptions of the notion which tended to focus on either one of these contributors to its construction By analyzing the live in four different cases a live streaming platform an online music collaboration website an example of social TV and a social networking site van Es explores the operation of the category and pinpoints the conditions under which it comes into being The analysis is the starting point for a broader reflection on the relation between broadcast and social media
