You Come Too Lesley Lee Francis, 2015-12-03 Robert Frost observed in his wife Elinor a desire to live a life that goes rather poetically The same could be said of many members of the Frost family over several generations In You Come Too Frost s granddaughter Lesley Lee Francis combines priceless personal memories and rigorous research to create a portrait of Frost and the women including herself whose lives he touched Francis provides a vivid picture of Frost the family man revealing him to be intensely engaged rather than the aloof artist that is commonly portrayed She shares with us the devastation Frost and Elinor experienced when faced with tragic illnesses both physical and mental and the untimely death of family members Elinor s own death added to the poet s despair and unleashed complex

feelings throughout the family Francis's mother would lament the toll taken on Elinor by what she perceived as Frost's selfishness in the life he had chosen This is also the story of Lesley Frost Francis's remarkable mother who struggled to emerge from her celebrated father's shadow while as one of the people closest to him sharing his intuitive impulse to write and to indulge their mutual love of books and poetry Francis would herself become yet another writer and like her grandfather and mother before her a teacher despite sharing Frost's sense of being imperfectly academic In addition Francis explores Frost's professional relationships with women outside the family such as the poets Harriet Monroe Amy Lowell and Susan Hayes Ward Francis's invaluable insights into Frost's poetry and her inclusion of previously unpublished family writings and photographs make this book essential to Frost scholarship But *You Come Too* will appeal to anyone interested in this great poet's life and work It also reveals unforgettable stories of strong independent women and their passion to create and share poetry

Nurturing the Older Brain and Mind Pamela M. Greenwood, R. Parasuraman, 2012 Two noted researchers explain scientific evidence that shows why certain experiential and lifestyle factors may promote and maintain cognitive vitality in older adults Although our physical abilities clearly decline as we age cognitive decline in healthy old age is neither universal nor inevitable In *Nurturing the Older Brain* Pamela Greenwood and Raja Parasuraman show that scientific research does not support the popular notion of the inexorable and progressive effects of cognitive aging in all older adults They report that many adults maintain a high level of cognitive function into old age and that certain experiential and lifestyle factors including education exercise diet and opportunities for new learning contribute to the preservation of cognitive abilities Many popular accounts draw similar conclusions and give similar lifestyle advice but lack supporting scientific evidence Greenwood and Parasuraman offer a comprehensive review of research on cognitive and brain aging They show that even the aged brain remains capable of plasticity the ability to adapt to and benefit from experience and they summarize evidence that brain plasticity is heightened by certain types of cognitive training by aerobic exercise and by certain diets They also report on the somewhat controversial use of estrogen and cognition enhancing drugs on environmental adaptations including virtual assistants that help older adults age in place and on genetic factors in cognitive aging The past twenty years of research points to ways that older adults can lead rich and cognitively vital lives As millions of baby boomers head toward old age Greenwood and Parasuraman's accessible book could not be more timely

A History of Children's Play and Play Environments Joe L. Frost, 2010-04-02 Children's play throughout history has been free spontaneous and intertwined with work set in the playgrounds of the fields streams and barnyards Children in cities enjoyed similar forms of play but their playgrounds were the vacant lands and parks Today children have become increasingly inactive abandoning traditional outdoor play for sedentary indoor cyber play and poor diets The consequences of play deprivation the elimination and diminution of recess and the abandonment of outdoor play are fundamental issues in a growing crisis that threatens the health development and welfare of children This valuable book traces the history of children's play and play environments

from their roots in ancient Greece and Rome to the present time in the high stakes testing environment Through this exploration scholar Dr Joe Frost shows how this history informs where we are today and why we need to re establish play as a priority Ultimately the author proposes active solutions to play deprivation This book is a must read for scholars researchers and students in the fields of early childhood education and child development **Deep Woods** Peggy Caravantes,2006 Deep Woods the story of Robert Frost explores teh tory behind teh life and words of one of America s best known writers People of Paradox Michael G. Kammen,1990 From the beginning what has given our culture its distinctive texture pattern and thrust according to Michael Kammen is the dynamic interaction of the imported and the indigenous He shows how during the years of colonization some ideas and institutions were transferred virtually intact from Britain while simultaneously others were being transformed in the New World As he unravels the tangled origins of our culture he makes us see that unresolved contradictions in the American experience have created our national style Puritanical and hedonistic idealistic and materialistic peace loving and war mongering these opposing strands go back to the genesis of our history
