Ralph Barton Perry,1954      **Realm of Lesser Evil** Jean-Claude Michea,2009-07-27 Winston Churchill said of democracy that it was the worst form of government except for all those other forms that have been tried from time to time The same could be said of liberalism While liberalism displays an unfailing optimism with regard to the capacity of human beings to make themselves masters and possessors of nature it displays a profound pessimism when it comes to appreciating their moral capacity to build a decent world for themselves As Michea shows the roots of this pessimism lie in the idea an eminently modern one that the desire to establish the reign of the Good lies at the origin of all the ills besetting the human race Liberalism s critique of the tyranny of the Good naturally had its costs It created a view of modern politics as a purely negative art that of defining the least bad society possible It is in this sense that liberalism has to be understood and understands itself as the politics of lesser evil And yet while liberalism set out to be a realism without illusions today liberalism presents itself as something else With its celebration of the market among other things contemporary liberalism has taken over some of the features of its oldest enemy By unravelling the logic that lies at the heart of the liberal project Michea is able to shed fresh light on one of the key ideas that have shaped the civilization of the West      The Genealogy of Values Edward Andrew,1995 Until the time of Karl Marx and John Stuart Mill philosophers generally held economics to be an integral element of moral philosophy These days the language of values moral aesthetic and cognitive dominates philosophic discourse even though contemporary philosophers rarely hold economics to be integral to moral philosophy Examining the thought of Friedrich Nietzsche and the art of Marcel Proust Edward Andrew provides the first sustained critical analysis of values discourse an analysis that deconstructs its content and its form      **Phenomenology of Values and Valuing** J.G. Hart,Lester Embree,2013-04-17 Although a key aspect of the phenomenological movement is its contribution to value theory axiology and value perception almost all the major figures devoted a great part of their labors to these topics there has been relatively little attention paid to these themes This volume in part makes up for this lacuna by being the first anthology on value theory in the phenomenological movement It indicates the scope of the issues by discussing e g the distinctive acts of valuing openness to value the objectivity of values the summation and combination of values the deconstruction of values the value of absence and the value of nature It also contains discussions of most of the major representative figures not only in their own right but also in relationship to one another Von Ehrenfels Brentano Scheler Hartmann Husserl Heidegger Schutz and Derrida      Encyclopedia of Ethics: P-W Lawrence C. **Security, Education and Development in Contemporary Africa** M. Raymond Izarali, Oliver Masakure, Edward Shizha, 2016-12-01 This volume delineates the critical link among security education and development in Africa and provides a multidisciplinary framework of analyses and possible solutions Africa has had a long history that embodies layers of mass scale criminality and exploitation not merely from neocolonial and apartheid policies but also from political greed This has impacted adversely on security education and development in a way that deprivation of education and underdevelopment in turn re creates security issues The volume aims firstly to help augment scholarly inquiry into the nexus among in security education and development through the multidisciplinary framework of analyses secondly to provide policymakers and educators with tools and a framework to comprehend the complexity and magnitude of the issues to which they ought to be sensitive and respond and finally to provide caregivers and childcare agencies of the state a comprehensible framework of underlying multifaceted sources of trauma experienced by children in extraordinary circumstances It is organized in four sections theoretical conceptualization on security and development country cases on security and development security and educational development and country cases on security and education Serving as a significant compass to understand and respond to the complex interplay and impact of security education and development in Africa it is of great use to graduates

*Fictional Worlds and Philosophical Reflection* Garry Hagberg,2022-01-31 This edited collection investigates the kinds of  
philosophical reflection we can undertake in the imaginative worlds of literature Opening with a look into the relations  
between philosophical thought and literary interpretation the volume proceeds through absorbing discussions of the ways we  
can see life through the lens of literature the relations between philosophical saying and literary showing and some ways we  
can see the literary past philosophically and assess its significance for the present Taken as a whole the volume shows how  
imagined contexts can be a source of knowledge a source of conceptual clarification and a source of insight and  
understanding And because philosophical thinking is undertaken after all in words a heightened sensitivity to the precise  
employments of our words particularly philosophically central words such as truth reality perception knowledge selfhood  
illusion understanding falsehood can bring a clarity and a refreshed sense of the life that our words take on in fully described  
contexts of usage And in these imagined contexts we can also see more acutely and deeply into the meaning of words about  
words metaphor and figurative tropes verbal coherence intelligibility implication sense and indeed the word meaning itself  
Moving from a philosophical issue into a literary world in which the central concepts of that issue are in play can thus enrich  
our comprehension of those concepts and in the strongest cases substantively change the way we see them With a  
combination of conceptual acuity and literary sensitivity this volume maps out some of the territory that philosophical  
reflection and literary engagement share
