Reason Ethics And Society Themes From Kurt Baier With His Responses:

Reason, Ethics, and Society Jerome B. Schneewind, 1996 Since 1948 Kurt Baier has been producing some of our century's most stimulating seminal and meticulous work in ethics. His quest for a rational justification of morality has centered on the human predicament that although most of us want to live in association with others we always find ourselves coming into conflict with one another. These challenging and ground breaking essays together with Kurt Baier's careful and illuminating responses constitute contemporary moral theory at its very best. James P. Sterba, University of Notre Dame

Ethics and Practical Reason Garrett Cullity, Berys Gaut, 1997-11-20 These thirteen new specially written essays by a distinguished international line up of contributors including some leading contemporary moral philosophers give a rich and varied view of current work on ethics and practical reason. The three main perspectives on the topic: Kantian, Humean and Aristotelian are all well represented. The editors' introduction provides a valuable introductory survey of the topic putting the individual essays in context. *Ethics and Practical Reason* will be essential reading for scholars, postgraduates and upper level undergraduates working in this area. These thirteen new specially written essays by a distinguished international line up of contributors including some leading contemporary moral philosophers give a rich and varied view of current work on ethics and practical reason. The three main perspectives on the topic: Kantian, Humean and Aristotelian are all well represented. Issues covered include the connection between reason and motivation, the source of moral reasons and their relation to reasons of self interest, the relation of practical reason to value, to freedom, to responsibility and to feelings. The editors' introduction provides a valuable introductory survey of the topic putting the individual essays in context. *Ethics and Practical Reason* will be essential reading for scholars, postgraduates and upper level undergraduates working in this area. *The Order of Public Reason* Gerald Gaus, 2010-12-13 Drawing on the tools of game theory, social choice theory, experimental psychology and evolutionary theory, Gerald Gaus advances a revised account of public reason liberalism showing how a free society can secure a moral equilibrium that is endorsed by all and how a just state respects and develops such an equilibrium.

The Authority of Reason Jean E. Hampton, 1998-02-28 This challenging and provocative book argues against much contemporary orthodoxy in philosophy and the social sciences by showing why objectivity in the domain of ethics is really no different from the objectivity of scientific knowledge. Many philosophers and social scientists have challenged the idea that we act for objectively authoritative reasons. Jean Hampton takes up the challenge by undermining two central assumptions of this contemporary orthodoxy: that one can understand instrumental reasons without appeal to objective authority and that the adoption of the scientific world view requires no such appeal. In the course of the book, Jean Hampton examines moral realism, the general nature of reason and norms, internalism and externalism, instrumental reasoning and the expected utility model of practical reasoning. The book is sure to prove to be a seminal work in the theory of rationality that will be read by a broad swathe of philosophers and social scientists. **Doing Things for Reasons** Rüdiger Bittner, 2001-07-19 What exactly are

the reasons we do things and how are they related to the resulting actions Bittner explores this question and proposes an answer a reason is a response to that state of affairs Elegantly written this work is a substantial contribution to the fields of rationality ethics and action theory The Bloomsbury Companion to Ethics Christian B. Miller,2014-09-25 The Bloomsbury Companion to Ethics offers the definitive guide to this key area of contemporary philosophy Covering all the fundamental questions asked by meta ethics and normative ethical theory thirteen specially commissioned chapters from an international team of experts explore the central ideas terms and case studies in the field and new directions in ethics as a whole Now available in paperback the Companion to Ethics covers issues such as moral methodology moral realism ethical expressivism constructivism and the error theory morality and practical reason moral psychology morality and religion consequentialism Kantian ethics virtue ethics feminist ethics moral particularism experimental ethics and biology evolution and ethics Featuring a series of indispensable research tools including key technical terms a historical chronology a detailed list of internet resources for research in ethics and a thorough list of recommended works for further study this is the essential resource for anyone studying researching and writing in contemporary philosophical ethics The Continuum Companion to Ethics Christian Miller,2011-09-29 The Continuum Companion to Ethics offers the definitive guide to a key area of contemporary philosophy The book covers all the fundamental questions asked by meta ethics and normative ethical theory Fourteen specially commissioned essays from an international team of experts reveal where important work continues to be done in the field and most valuably the exciting new directions the field is taking The Companion explores issues pertaining to moral methodology moral realism ethical expressivism constructivism and the error theory morality and practical reason moral psychology morality and religion consequentialism Kantian ethics virtue ethics feminist ethics moral particularism experimental ethics and biology evolution and ethics Featuring a series of indispensable research tools including important technical terms in ethics a historical chronology an extensive overview of contemporary meta ethics and normative ethical theory a detailed list of internet resources for research in ethics and a thorough list of recommended works for further study this is the essential reference tool for anyone working in contemporary philosophical ethics **Making Moral Sense** Logi Gunnarsson,2000-09-18 Is it rational to be moral Can moral disputes be settled rationally Which criteria determine what we have a good reason to do In this innovative book Logi Gunnarsson takes issue with the assumption made by many philosophers faced with the problem of reconciling moral norms with a scientific world view namely that morality must be offered a non moral justification based on a formal concept of rationality He argues that the criteria for the rationality of an action are irreducibly substantive rather than purely formal and that assuming that morality must be given a non moral justification amounts to a distortion of both rationality and morality His discussion includes substantial critical engagement with major thinkers from two very different philosophical traditions and is notable for its clear and succinct account of Habermas discourse ethics It will appeal to anyone interested in practical reason and the rational credentials of morality

Moral Philosophy Through the Ages James Fieser, 2000 Takes a middle ground between the topical and historical approaches to Western ethics This book explains the historical development of the topic under consideration and most chapters focus on a specific famous philosopher who championed a particular tradition such as Aristotle Locke or Kant and the chapters are chronologically ordered

The Moral Skeptic Anita M. Superson, 2009-03-13 Anita Superson challenges the traditional picture of the skeptic who asks Why be moral While holding that the skeptic's position is important she builds an argument against it by understanding it more deeply and then shows what it would take to successfully defeat it Superson argues that we must defeat not only the action skeptic but the disposition skeptic who denies that being morally disposed is rationally required and the motive skeptic who believes that merely going through the motions in acting morally is rationally permissible We also have to address the amoralist who is not moved by moral reasons he recognizes Superson argues for expanding the skeptic's position from self interest to privilege to include morally unjustified behavior targeting disenfranchised social groups as well as revising the traditional expected utility model to exclude desires deformed by patriarchy as irrational Lastly she argues that the challenge can be answered if it can be shown that it is in an important way inconsistent and therefore irrational to privilege oneself over others The Moral Skeptic makes an important contribution to both metaethics moral theory and feminist philosophy and brings feminist thinking into the larger discussion of the skeptical challenge

Dialogue, Politics and Gender Jude Browne, 2013-05-23 Examines the relationship between gender discourse and deliberation focusing on how far consensus achieved through deliberation can reflect gender differences
