Educational Judgments (International Library of the Philosophy of Education Volume 9) F. The Aims of Education Restated (International Library of the Philosophy of Education Volume 22)

John White,2010-02-25 John White's study is the most substantial work on what the aims of education should be since Whitehead's *Aims of Education* of 1929. It draws on material not only from schools and colleges but also from the broader educative or miseducative nature of the ethos of society and some of its major institutions. Sifting the different views about aims which are now prevalent and circulating in the world of education, he integrates the more defensible of them into an articulated set of positive recommendations. The study takes a broadly philosophical and non-technical stand; it is written to help practitioners orient themselves in what is often bewildering territory at a time when the question of what the aims of education ought to be has acquired a new urgency for politicians and educational administrators as well as for those directly involved in educational institutions: head teachers and their staff.

International Library of the Philosophy of Education, 2010 *Illusions of Equality* (*International Library of the Philosophy of Education Volume 7*) David Cooper,2010-02-25 Educational policy and discussion in Britain and the USA are increasingly dominated by the confused ideology of egalitarianism. David E. Cooper begins by identifying the principles hidden among the confusions and argues that these necessarily conflict with the ideal of educational excellence in which conflict it is this ideal that must be preserved. He goes on to criticize the use of education as a tool for promoting wider social equality, focussing especially on the muddles surrounding equal opportunities, social mix and reverse discrimination. Further chapters criticize the new egalitarianism favoured on epistemological grounds by various sociologists of knowledge in recent years and cultural egalitarianism according to which standard criteria of educational value merely reflect parochial and economic interests.

Peters,2010-02-25 A series of public lectures given at the Institute of Education, University of London, provides the nucleus around which this collection, originally published in 1967, is gathered. Religious Education and the Public Sphere Patricia Hannam,2018-08-06 *Religious Education and the Public Sphere* reveals through an analysis of theory and practice that religious education is resting on historic and persistent assumptions about both religion and education. Drawing on work from Arendt and Weil, new ideas emerge regarding religious education's constituent elements: education and religion. It offers a new and timely proposal for religious education and argues for a broader understanding of religion, bringing a fresh

contribution to current discussions regarding the relationship between religion and education in the public sphere Some practical considerations emerging from theory developing through the earlier parts of the book are presented in the final section including the teacher s role and what should guide religious education curriculum At a time when there is raised interest in the role of religion in the public sphere internationally this book aims to contribute something new both theoretically and practically to discussions regarding the role of religion in education is and relevant to educational contexts worldwide This book will be vital reading for academics and researchers in the fields of religion and religious studies education philosophy of education and religious education and will also be of great interest to teachers and policy makers working in the field of religious education in the public sphere

Beyond Domination (International Library of the Philosophy of Education Volume 23) Patricia White,2010-02-25 The book proposes curbing the power of teachers including headteachers stripping parents of their rights and making political education the keystone of education It considers what kind of educational strategies would be appropriate to help move a society like our own towards greater democracy in the light of a co ordinated set of proposals about the democratic organization of political decision making and the development of democratic attitudes notably fraternity
