**Robert P. Scharlemann**

## **Reason Of Following:**

**The Reason of Following** Robert P. Scharlemann, 1991 In the Reason of Following noted scholar Robert P Scharlemann takes Christology in a radically new direction suggesting that Christology itself represents a form of reason and an understanding of selfhood For the first time Scharlemann establishes a logical place for Christology in philosophical theology Scharlemann presents a christological phenomenology of the self tracing the connections between the I am of the God who spoke to Moses the I am of Christ and the I am of autonomous self identification How he asks can the self that spontaneously responds to Jesus Follow me be compared with the everyday autonomous self What is the nature of following on the part of those who answer the summons of one whose name is I am Pursuing these questions Scharlemann develops a christological phenomenology of the self an account in which following means not the expression of the self in action or reflection but rather self discovery in another person With a deep sense of both culture and philosophy Scharlemann distinguishes the forms of reason involved in following from those in ethics aesthetics and other modes of religious philosophic thought His penetrating readings of nineteenth and twentieth century German theological and philosophical traditions provide an introduction to lesser known thinkers such as Hermann and Picht as well as a profound critique of major figures such as Descartes Heidegger Fichte and Kant Finally Scharlemann outlines a program for a more systematic and rounded presentation of what Christian doctrine might mean in the contemporary world His work will be of interest to students of theology and philosophy alike

Reasons of One's Own Marc Slors, 2017-11-28 Practical reasoning in contemporary Western societies is characterised by an unprecedented degree of idiosyncrasy and demands of personal authenticity This has resulted from the decline of traditional moral authorities the rise of individualistic lifestyles increasing multiculturalism and rapid technological advance These developments have given rise to reflection on the notion of reasons of one's own an examination of the intelligibility of reasons that are closely connected to a particular agent and recognised as such by others although not shared by them Problems addressed by the contributors include How to account for the cognitive overtones in moral and motivational language given the apparent agent relativity of reasons How to retain the agent relativity of reasons for action given that they require articulation through a language shared by the community and how to account for the practical rationality required for co operation between persons in view of the idiosyncrasy of a person's motivating reasons In dealing with these issues this book presents a range of investigative essays on the concept of reasons of one's own by leading authors from all relevant philosophical areas of expertise

Physical and Psychological Health Following Military Sexual Assault Coreen Farris, Terry L. Schell, Terri Tanielian, 2013-02-27 This paper reviews data on the prevalence of sexual assault among servicemembers predictors of disclosure efforts to improve disclosure victim needs and DoD efforts to provide necessary resources in the immediate aftermath of a sexual assault The authors compared civilian and DoD guidelines for care and found them to be generally consistent However little is known about the fidelity with which DoD recommendations

are implemented      **Perse Playbooks** ,1914      **Following Christ** Joseph M. Stowell,1998-02 Stowell shows you what happens when an ordinary man or woman pursues not the trappings of Christianity by Christ himself      The Community of Advantage Robert Sugden,2018-06-13 The Community of Advantage asks how economists should do normative analysis Normative analysis in economics has usually aimed at satisfying individuals preferences Its conclusions have supported a long standing liberal tradition of economics that values economic freedom and views markets favourably However behavioural research shows that individuals preferences as revealed in choices are often unstable and vary according to contextual factors that seem irrelevant for welfare Robert Sugden proposes a reformulation of normative economics that is compatible with what is now known about the psychology of choice The growing consensus in favour of paternalism and nudging is based on a very different way of reconciling normative economics with behavioural findings This is to assume that people have well defined latent preferences which because of psychologically induced errors are not always revealed in actual choices The economist s job is then to reconstruct latent preferences and to design policies to satisfy them Challenging this consensus The Community of Advantage argues that latent preference and error are psychologically ungrounded concepts and that economics needs to be more radical in giving up rationality assumptions Sugden advocates a kind of normative economics that does not use the concept of preference Its recommendations are addressed not to an imagined social planner but to citizens viewed as potential parties to mutually beneficial agreements Its normative criterion is the provision of opportunities for individuals to participate in voluntary transactions Using this approach Sugden reconstructs many of the normative conclusions of the liberal tradition He argues that a well functioning market economy is an institution that individuals have reason to value whether or not their preferences satisfy conventional axioms of rationality and that individuals motivations in such an economy can be cooperative rather than self interested      **Cross-Step Waltz** Richard Powers,Nick Enge,Melissa Enge,2019-11-23 Cross Step Waltz is one of the newest social dance forms spreading quickly because it s easy to learn yet endlessly innovative satisfying for both beginners and the most experienced dancers It rotates and travels like the original waltz but the addition of the cross step opens up a wide range of playful yet gracefully flowing variations In this comprehensive dancer s guide to Cross Step Waltz you will learn How to dance more than 250 variations of Cross Step Waltz including basics turns grapevines pivots Tango inspired figures variations in cradle and shadow position and ways to conclude a dance with flair How to become a better dance partner whether you dance as a Lead a Follow or both How to dance more musically and how to create your own Cross Step Waltz variations How to dance Cross Step Waltz to a wide variety of music and how to transition between Cross Step Waltz and other dances Finally in a series of essays by our students you ll learn how dancing Cross Step Waltz can change your life In addition to being fully described in writing each of the 250 variations is illustrated by a demo video on a companion website      The Creative Argument Thomas Girshin,2024-04-22 The Creative Argument sets itself apart from its competitors by presenting a series of compelling works

of literary nonfiction that challenge what students think they know about arguments Each chapter begins with an engaging argument from a work of nonfiction followed by an in depth yet accessible analysis of a key aspect of argumentation Suitable for both courses in argument and first year writing the principles and strategies outlined in the text help students become more creative and critical as rhetoricians both inside the classroom and out Advanced Research Methods in Hospitality and Tourism Fevzi Okumus,S. **Fossil Energy Update ,1982      Decisions and Orders of the National Labor Relations Board** United States. National Labor Relations Board,1979      *Plato's Moral Psychology* Rachana Kamtekar,2017

Plato's Moral Psychology is concerned with Plato's account of the soul and its impact on our living well or badly virtuously or viciously The core of Plato's moral psychology is his account of human motivation and Rachana Kamtekar argues that throughout the dialogues Plato maintains that human beings have a natural desire for our own good and that actions and conditions contrary to this desire are involuntary from which follows the Socratic paradox that wrongdoing is involuntary Our natural desire for our own good may be manifested in different ways by our pursuit of what we calculate is best but also by our pursuit of pleasant or fine things pursuits which Plato assigns to distinct parts of the soul Kamtekar develops a very different interpretation of Plato's moral psychology from the mainstream interpretation according to which Plato first proposes that human beings only do what we believe to be the best of the things we can do Socratic intellectualism and then in the middle dialogues rejects this in favour of the view that the soul is divided into parts with some good dependent and some good independent motivations the divided soul
