Reasons And Purposes Human Rationality And The Teleological Explanation Of Action:

Reasons and Purposes G. F. Schueler, 2003 Reasons and Purposes G. F. Schueler, 2003-01-16 People do things for reasons But philosophers have disagreed sharply about how reasons explanations of actions actually work and hence about their implications for human freedom and autonomy The dominant view in contemporary philosophy is the Humean idea that the beliefs and desires that constitute our reasons for acting simply cause us to act as we do Fred Schueler seeks to replace such causal views arguing that they leave out two essential elements of these explanations Reasons explanations are inherently teleological in the sense that the agent's reasons always explain the purpose for which he acted They are also inherently normative since it is always possible that an agent's reasons for doing something are not good reasons Schueler argues that causal accounts of reasons explanations make no sense of either of these features he argues instead for an account based on practical deliberation our ability to evaluate the reasons we accept **Reasons and Purposes** G. Kinds of Reasons Maria Alvarez, 2010-03-25 Understanding human beings and their distinctive rational and volitional capacities is one of the central tasks of philosophy The task requires a clear account of such things as reasons desires emotions and motives and of how they combine to produce and explain human behaviour In Kinds of Reasons Maria Alvarez offers a fresh and incisive treatment of these issues focusing in particular on reasons as they feature in contexts of agency Her account builds on some important recent work in the area but she takes her main inspiration from the tradition that receives its seminal contemporary expression in the writings of G E M Anscombe a tradition that runs counter to the broadly Humean orthodoxy that has dominated the theory of action for the past forty years Alvarez's conclusions are therefore likely to be controversial and her bold and painstaking arguments will be found provocative by participants on every side of the debates with which she engages Clear and directly written Kinds of Reasons aims to stake out a distinctive position within one of the most hotly contested areas of contemporary philosophy **A Companion to the Philosophy of Action** Timothy O'Connor, Constantine Sandis, 2012-08-02 A Companion to the Philosophy of Action offers a comprehensive overview of the issues and problems central to the philosophy of action The first volume to survey the entire field of philosophy of action the

central issues and processes relating to human actions Brings together specially commissioned chapters from international experts Discusses a range of ideas and doctrines including rationality free will and determinism virtuous action criminal responsibility Attribution Theory and rational agency in evolutionary perspective Individual chapters also cover prominent historic figures from Plato to Ricoeur Can be approached as a complete narrative but also serves as a work of reference Offers rich insights into an area of philosophical thought that has attracted thinkers since the time of the ancient Greeks

Explanation in Action Theory and Historiography Gunnar Schumann, 2019-05-29 Is the appropriate form of human action explanation causal or rather teleological While this is a central question in analytic philosophy of action it also has implications for questions about the differences between methods of explanation in the sciences on the one hand and in the humanities and the social sciences on the other Additionally this question bears on the problem of the appropriate form of explanations of past human actions and therefore it is prominently discussed by analytic philosophers of historiography This volume brings together causalists and anti causalists to address enduring philosophical questions at the heart of this debate as well as their implications for the practice of historiography Part I considers the quarrel between causalism and anti causalism in recent developments in the philosophy of action Part II presents papers by causalists and anti causalists that are more narrowly focused on the philosophy of historiography *New Essays on the Explanation of Action C.*

Sandis, 2008-11-28 These previously unpublished essays present the newest developments in the thought of philosophers working on action and its explanation focusing on a wide range of interlocking issues relating to agency deliberation motivation mental causation teleology interpretive explanation and the ontology of actions and their reasons **Reading R.**

S. Peters Today Stefaan E. Cuypers, Christopher Martin, 2011-09-13 Reading R S Peters Today Analysis Ethics and the Aims of Education reassesses British philosopher Richard Stanley Peters educational writings by examining them against the most recent developments in philosophy and practice Critically reassesses R S Peters a philosopher who had a profound influence on a generation of educationalists Brings clarity to a number of key educational questions Exposes mainstream orthodox arguments to sympathetic critical scrutiny *Freedom, Teleology, and Evil* Stewart Goetz, 2011-10-27 In Freedom Teleology and Evil Stewart Goetz defends the existence of libertarian freedom of the will He argues that choices are essentially uncaused events with teleological explanations in the form of reasons or purposes Because choices are uncaused events with teleological explanations whenever agents choose they are free to choose otherwise Given this freedom to choose otherwise agents are morally responsible for how they choose Thus Goetz advocates and defends the principle of alternative possibilities which states that agents are morally responsible for a choice only if they are free to choose otherwise Finally given that agents have libertarian freedom Goetz contends that this freedom is integral to the construction of a theodicy which explains why God allows evil **Alasdair MacIntyre, George Lindbeck, and the Nature of Tradition** David

Trenery, 2014-11-06 What should we believe and why should we believe it This book addresses these questions through a

critical exposition of the work of the contemporary philosopher Alasdair MacIntyre and of the theologian George Lindbeck the father of postliberal theology The book argues that MacIntyre s philosophical development can be seen as a response to the question of how belief in a comprehensive metaphysical system can be justified Such a system provides its believers with an account of the nature of the universe and human nature and a basis for their ethical reasoning and action The book draws on Lindbeck s cultural linguistic account of religion to argue that such a system is primarily a way of interpreting the world and the place of humanity within it rather than a speculative theory The justification of belief in such systems can be understood in terms of MacIntyre s account of tradition constituted rationality provided that this notion of rationality is made more specific by the incorporation of elements of Lindbeck s theology Equally the book argues that Lindbeck s theology can be strengthened by the incorporation of elements drawn from MacIntyre s work This book will be of value to students of philosophy and theology and to the general reader who is interested in the question of the grounds of belief

Neo-Aristotelian Perspectives in Metaphysics Daniel D. Novotný, Lukáš Novák, 2014-04-16 This volume re examines some of the major themes at the intersection of traditional and contemporary metaphysics The book uses as a point of departure Francisco Suarez's *Metaphysical Disputations* published in 1597 Minimalist metaphysics in empiricist pragmatist clothing have today become mainstream in analytic philosophy Independently of this development the progress of scholarship in ancient and medieval philosophy makes clear that traditional forms of metaphysics have affinities with some of the streams in contemporary analytic metaphysics The book brings together leading contemporary metaphysicians to investigate the viability of a neo Aristotelian metaphysics Determined by Reasons Susanne Mantel, 2018-02-19 This book offers a new account of what it is to act for a normative reason The first part of the book introduces some popular ideas and problems concerning causal and dispositional approaches of acting for reasons The author argues that the dispositional approach should take a certain form that unites epistemic volitional and executional dispositions in a complex normative competence This Normative Competence Account allows for more and less reflective ways of acting for normative reasons The second part of the book clarifies the relation between the normative reason that an agent acts for and his or her motivating reasons The chapters in this part refute the widely held identity view that acting for a normative reason requires the normative reason to be identical with a motivating reason The author describes how normative reasons are related to motivating reasons by a relation of correspondence and proposes a new understanding of how normative reasons explain those actions that are performed for them *Determined by Reasons* engages with current debates from a wide range of different philosophical areas including action theory metaethics moral psychology epistemology and ontology to develop a new account of normative reasons **The Oxford Handbook of Buddhist Ethics** Daniel Cozort, James Mark Shields, 2018 A comprehensive overview of the study of Buddhist ethics in the twenty first century **Free Will in Philosophical Theology** Kevin Timpe, 2013-11-21 *Free Will in Philosophical Theology* takes the most recent philosophical work on free will and uses it to elucidate and explore theological doctrines involving free will Rather than being a work of natural theology it is a work in what has been called clarification using philosophy to understand develop systematize and explain theological claims without first raising the justification for holding the theological claims that one is working with Timpe's aim is to show

how a particular philosophical account of the nature of free will an account known as source incompatibilism can help us understand a range of theological doctrines Law's Humility Triantafyllos Gkouvas, 2021-02-25 This book invites newcomers to analytical legal philosophy to reconsider the terms in which they are accustomed to describing and defending their jurisprudential allegiances It argues that familiar taxonomic labels such as legal positivism natural law theory and legal interpretivism are poor guides to the actual diversity of views on the nature and normativity of law mainly because they fail to carve up the reality of jurisprudential disagreement at its joints These joints the author suggests are elusive because the semantics of law systematically misplaces them Their true nature resides in the metaontological and metanormative features that dictate or indicate the target of a theory's jurisprudential commitments The book advocates a new vocabulary for articulating these commitments without eliminating the use of familiar criteria of division among competing theories of law The resulting picture is a much broader platform of meaningful disagreement about the nature and grounds of legal truth and legal normativity Albeit based on a factualist cognitivist understanding of the sources and grounds of law the book reserves ample room for the unconvinced Those suspicious of the project of ontologising theoretical disagreements in law can avail themselves of the quietist or anti metaphysical avenue that the book's alternative taxonomy also makes available The humblest path to law's reality may not be metaphysically ambitious after all *Action in Context* Anton Leist, 2012-02-13 The book illustrates the concept of action in three different contexts the justification of actions people's life history and pragmatism The special feature of this book is that a comprehensive view of this kind marks a departure from the atomistic approach of action theory which in itself raises a number of questions If actions are not justified by mental states how can persons then act for reasons How can persons' actions over time be described and what is the connection with the question of personal identity If there is to be a unified understanding of the person does the practical have to take precedence over the theoretical and what does this mean for epistemology for example The ten contributors to this volume engage in an instructive manner with these and similar questions in the three sections of the book
