Instructions

The following inventory includes reasons people sometimes give for **not** ending their life. This inventory aims to understand how important each of these reasons is to **you**. Please read through each reason, and rate it on a scale of 1 to 6. Try to rate all reasons as honestly as you can. If you have any questions, let your mental health practitioner know.

Each reason can be rated on a scale from 1 to 6. Please use the following numbers:

1 = Not at all important (as a reason for not ending my life); 2 = Quite unimportant;

3 = Somewhat unimportant; 4 = Somewhat important; 5 = Quite important.

6 = Extremely important (as a reason for not ending my life)

Large Dams: A Global Assessment Cecilia Tortajada,Dogan Altinbilek,Asit K. Biswas,2012-02-02 One of the most controversial issues of the water sector in recent years has been the impacts of large dams Proponents have claimed that such structures are essential to meet the increasing water demands of the world and that their overall societal benefits far outweigh the costs In contrast the opponents claim that social and environmental costs of large dams far exceed their benefits and that the era of construction of large dams is over A major reason as to why there is no consensus on the overall benefits of large dams is because objective authoritative and comprehensive evaluations of their impacts especially ten or more years after their construction are conspicuous by their absence This book debates impartially comprehensively and objectively the positive and negative impacts of large dams based on facts figures and authoritative analyses These in depth case studies are expected to promote a healthy and balanced debate on the needs impacts and relevance of large dams with

case studies from Africa Asia Australia Europe and Latin America
