Rebirth Of Value Meditations On Beauty:

Rebirth of Value Frederick Turner,1991-01-01 Rebirth of Value takes as its starting point the emerging scientific view of the universe as a free unpredictable self ordering evolutionary process in which our own cultural history plays a leading part It outlines some of the startling implications of this view for contemporary art literature theater ecological ethics human studies religion and education Turner goes beyond the current fashions of postmodern eclecticism deconstructive critique and self consciousness about genre and ideology Instead he seeks out the creative and positive forces in contemporary culture that underlie the surface features and identifies potent new themes and ideas that drive the trends Among these are the recovery of a pan cultural human nature beauty as a real evolutionary tendency the efficacy and reality of values in general the reunion of the arts sciences and technology a new science including the theory of non linear and self organizing systems top down as well as bottom up causality and a broader conception of causality in general Other themes and ideas discussed are a new environmental ethic in which humans can play a constructive and leading part in the evolution of nature a conception of history as driven by values cybernetic technology as a spiritual development a new religious consciousness including a rich syncretism and a renewal of ritual eternity as a more intense form of time and the essential unity coherence and fertility of knowledge *Dynamis of Healing* Pia Sophia Chaudhari,2019-08-06 This book explores how traces of the

energies and dynamics of Orthodox Christian theology and anthropology may be observed in the clinical work of depth psychology Looking to theology to express its own religious truths and to psychology to see whether these truth claims show up in healing modalities the author creatively engages both disciplines in order to highlight the possibilities for healing contained therein *Dynamis of Healing* elucidates how theology and psychology are by no means fundamentally at odds with each other but rather can work together in a beautiful and powerful synergia to address both the deepest needs and deepest desires of the human person for healing and flourishing

J. Whitrow, 2003 In this engaging volume Professor G J Whitrow 1912 2000 takes us on a good humored and wide ranging tour of the thing that clocks keep more or less He discusses how our ideas of time originated and coaxes the layment to contemplate with pleasure the differences between cyclic linear biological cosmic and space time while providing frequent diversions into fascinating topics such as the Mayan calendar the migration of birds and the dances of bees This reissue of the classic and authoritative *What is Time* includes a new introduction by Dr J T Fraser founder of the International Society for the Study of Time and a bibliographic essay by Dr Fraser and Professor M P Soulsby of the Pennsylvania State University **The Sunflower Forest** William R. Jordan, 2012-02-07 Ecological restoration the attempt to guide damaged ecosystems back to a previous usually healthier or more natural condition is rapidly gaining recognition as one of the most promising approaches to conservation In this book William R Jordan III who coined the term restoration ecology and who is widely respected as an intellectual leader in the field outlines a vision for a restoration based environmentalism that has emerged from his work over twenty five years Drawing on a provocative range of thinkers from anthropologists Victor Turner Roy Rappaport and Mary Douglas to literary critics Frederick Turner Leo Marx and R W B Lewis Jordan explores the promise of restoration both as a way of reversing environmental damage and as a context for negotiating our relationship with nature Exploring restoration not only as a technology but also as an experience and a performing art Jordan claims that it is the indispensable key to conservation At the same time he argues restoration is valuable because it provides a context for confronting the most troubling aspects of our relationship with nature For this reason it offers a way past the essentially sentimental idea of nature that environmental thinkers have taken for granted since the time of Emerson and Muir *Ecocriticism and the Idea of Culture* Helena Feder, 2016-04-29 Ecocriticism and the Idea of Culture Biology and the Bildungsroman draws on work by Kinji Imanishi Frans de Waal and other biologists to create an interdisciplinary materialist notion of culture for ecocritical analysis In this timely intervention Feder examines the humanist idea of culture by taking a fresh look at the stories it explicitly tells about itself These stories fall into the genre of the Bildungsroman the tale of individual acculturation that participates in the myth of its complete separation from and opposition to nature which Feder argues is culture s own origin story Moving from Voltaire s *Candide* to Mary Shelley s *Frankenstein* and from Virginia Woolf s *Orlando* to Jamaica Kincaid s *Lucy* the book dramatizes humanism s own awareness of the fallacy of this foundational binary In the final chapters Feder examines the discourse of animality at work in this narrative as a humanist fantasy about empathy one that paradoxically excludes other animals from the ethical community to
