Rebirth Of Value Meditations On Beauty Ecology Religion And Education:

Rebirth of Value Frederick Turner, 1991-01-30 *Rebirth of Value* takes as its starting point the emerging scientific view of the universe as a free unpredictable self ordering evolutionary process in which our own cultural history plays a leading part. It outlines some of the startling implications of this view for contemporary art literature theater ecological ethics human studies religion and education. Turner goes beyond the current fashions of postmodern eclecticism deconstructive critique and self consciousness about genre and ideology. Instead he seeks out the creative and positive forces in contemporary culture that underlie the surface features and identifies potent new themes and ideas that drive the trends. Among these are the recovery of a pan cultural human nature beauty as a real evolutionary tendency the efficacy and reality of values in general the reunion of the arts sciences and technology a new science including the theory of non linear and self organizing systems top down as well as bottom up causality and a broader conception of causality in general. Other themes and ideas discussed are a new environmental ethic in which humans can play a constructive and leading part in the evolution of nature a conception of history as driven by values cybernetic technology as a spiritual development a new religious consciousness including a rich syncretism and a renewal of ritual eternity as a more intense form of time and the essential unity coherence and fertility of knowledge.

The Sunflower Forest William R. Jordan, 2012-02-07 Ecological restoration the attempt to guide damaged ecosystems back to a previous usually healthier or more natural condition is rapidly gaining recognition as one of the most promising approaches to conservation. In this book William R. Jordan III who coined the term restoration ecology and who is widely respected as an intellectual leader in the field outlines a vision for a restoration based environmentalism that has emerged from his work over twenty five years. Drawing on a provocative range of thinkers from

anthropologists Victor Turner Roy Rappaport and Mary Douglas to literary critics Frederick Turner Leo Marx and R W B Lewis Jordan explores the promise of restoration both as a way of reversing environmental damage and as a context for negotiating our relationship with nature Exploring restoration not only as a technology but also as an experience and a performing art Jordan claims that it is the indispensable key to conservation At the same time he argues restoration is valuable because it provides a context for confronting the most troubling aspects of our relationship with nature For this reason it offers a way past the essentially sentimental idea of nature that environmental thinkers have taken for granted since the time of Emerson and Muir

Centering Educational Administration Robert J. Starratt, 2003-04-02 In this book Starratt enters the national conversation among educational administration scholars and practitioners about what constitutes the core of their knowledge and practice In Part I he develops three main themes cultivating meaning community and moral responsibility which he then positions against national themes about the core of educational administration school improvement democratic community and social justice Rather than focusing on the routine managerial tasks normally associated with school administration budgeting personnel and legal problems time and resource management etc this text asks aspiring school leaders to reflect first on the underlying philosophical and sociological perspectives that constitute the substance of administrative work in education Centering Educational Administration provides A Unique Perspective on Leadership The author views leadership as organically related to teaching and learning as concerned with internal capacity building in response to state imposed accountability pressures and as an existential process of writing one's autobiography through their day to day work An Interdisciplinary View of Educational Administration Centering Educational Administration asks educational administrators to bring contemporary philosophical ethical and anthropological issues as well as learning theory social theory and political theory into their thinking about the daily operation of the school A Unique Perspective on School Improvement This text asserts that school improvement narrowly defined as improving results on high stakes tests can likewise place the nation at risk An equally important agenda is teaching the young the basic satisfactions norms and potential of using their knowledge in the service of the community and of a wider humanity Exercises in Reflective Practice This book challenges the reader to use the ideas of each chapter to analyze the current practices in their school and to propose concrete changes to improve the teaching and learning environment of their school

Christianity and Ecological Theology E. M. Conradie, 2006-10-01 There has been a proliferation of publications in the field of Christian ecological theology over the last three decades or so These include a number of recent edited volumes each covering a range of topics and consolidating many of the emerging insights in ecological theology The call for Christian churches to respond to the environmental crisis has been reiterated numerous times in this vast corpus of literature also in South Africa

Natural Religion Frederick Turner, 2017-07-12 There is widespread belief that the world's religions contradict each other It follows that if one religion is true the others must be false an assumption that implies and may actually create religious strife In

Natural Religion acclaimed poet critic and essayist Frederick Turner sets out to show that the natural world offers grounds for stating that all religions are in some respect true Through the ages various ways have been proposed to resolve religious differences Some argue for the destruction of all religions but one s own Others substitute an abstract principle for the real ritual and moral practice of religion Still others doubt all religious truth and consequently all truth Others accept a kind of pluralistic relativism This book explores syncretism whereby all religions are seen as grasping the same strange and complex reality but by very different means and handles The idea that all religions are true raises a supervening question if so what must the real physical universe be like Turner approaches these questions in terms of scientific inquiry There is not enough room in space itself to fit in all theologies but there may be enough room in time if new scientific descriptions of time s nature are to be believed Turner argues that in the time models of contemporary cosmological and evolutionary science all times may be connected and time may be infinitely branched and causally looped so that both forward in time and backward in time factors may be in operation in the same event Thus the fundamental substance of the universe may be information rather than matter or energy The universe is more like a vast living organism than a vast machine Turner argues that all existing religions can be shown to fit into this model which in turn points to deeper implications of religious doctrines languages and practices There would be plenty of room in such a view of time for a tree of different yet linked religious w

Sustainable Ecological Systems W. Wallace Covington, Leonard F. DeBano, 1994 This conference brought together scientists and managers from federal state and local agencies along with private sector interests to examine key concepts involving sustainable ecological systems and ways in which to apply these concepts to ecosystem management Session topics were ecological consequences of land and water use changes biology of rare and declining species and habitats conservation biology and restoration ecology developing and applying ecological theory to management of ecological systems and forest health and sustainable ecosystems to respond to human needs A plenary session established the philosophical and historical contexts for ecosystem management Title page verso **Beyond Preservation** A. Dwight Baldwin, Judith De Luce, Carl Pletsch, 1994 **Placing Nature on the Borders of Religion, Philosophy and Ethics** Dr Forrest Clingerman, Mr Mark H Dixon, 2013-06-28 The natural world has been humanized even areas thought to be wilderness bear the marks of human impact But this human impact is not simply physical At the emergence of the environmental movement the focus was on human effects on nature More recently however the complexity of the term nature has led to fruitful debates and the recognition of how human individuals and cultures interpret their environments This book furthers the dialogue on religion ethics and the environment by exploring three interrelated concepts to recreate to replace and to restore Through interdisciplinary dialogue the authors illuminate certain unique dimensions at the crossroads between finding value creating value and reflecting on one s place in the world Each of these terms has diverse religious ethical and scientific connotations Each converges on the ways in which humans both think about and act upon their surroundings And each radically questions

the damaging conceptual divisions between nature and culture human and environment and scientific explanation and religious ethical understanding This book self consciously reflects on the intersections of environmental philosophy environmental theology and religion and ecology stressing the importance of how place interprets us and how we interpret place In addition to its contribution to environmental philosophy this work is a unique volume in its serious engagement with theology and religious studies on the issues of ecological restoration and the meaning of place General Technical Report RM. ,1994

Frederick Hart Frederick Hart,Michael Novak,2005 Frederick Hart s sculpture is at once traditional in its adherence to the importance of the human figure and radical in its sensuality and innovative use of materials This publication is a comprehensive look into the life and talent of a classical sculptor whose passion for the spiritual and figurative aspects of his craft is represented in both his public commissions and private work Daughters of Odessa one of Hart s masterworks is traced from its first inspiration to the final bronze The Creation Sculptures which grace the west facade of Washington National Cathedral are explored in an in depth analysis of his epic interpretation of Creation Hart s public monuments including Three Soldiers at the Vietnam Veterans Memorial are brought to life through the artist s own writings Additionally new works are comprehensively explored building from the previous book Frederick Hart Sculptor 1994 now in its fifth printing 12 colour 83 b w illustrations Understanding Religion and Social Change in Ethiopia M. Religiosity is one aspect without which Ethiopian society cannot be fully understood This book aims to map out the terrain of the discourse in religion social change nexus in Ethiopian using the notion of covenant as an interpretive tool **Designing the Reclaimed Landscape** Alan Berger,2007-12-03 First practical but in depth exploration of how to reclaim the post industrial landscape Draws on work of well known think tank on reclamation practice based at Harvard Excellent case studies by practitioners and policy makers from around the United States illustrate the book in practical terms **The Botany of Desire** Michael Pollan,2001-06-12 The book that helped make Michael Pollan the New York Times bestselling author of Cooked and The Omnivore s Dilemma one of the most trusted food experts in America In 1637 one Dutchman paid as much for a single tulip bulb as the going price of a town house in Amsterdam Three and a half centuries later Amsterdam is once again the mecca for people who care passionately about one particular plant though this time the obsessions revolves around the intoxicating effects of marijuana rather than the visual beauty of the tulip How could flowers of all things become such objects of desire that they can drive men to financial ruin In The Botany of Desire Michael Pollan argues that the answer lies at the heart of the intimately reciprocal relationship between people and plants In telling the stories of four familiar plant species that are deeply woven into the fabric of our lives Pollan illustrates how they evolved to satisfy humankind s most basic yearnings and by doing so made themselves indispensable For just as we ve benefited from these plants the plants in the grand co evolutionary scheme that Pollan evokes so brilliantly have done well by us The sweetness of apples for example induced the early Americans to spread the species giving the tree a whole new continent in which to blossom So who is really

domesticating whom Weaving fascinating anecdotes and accessible science into gorgeous prose Pollan takes us on an absorbing journey that will change the way we think about our place in nature

History of Landscape Ecology in the United States Gary W. Barrett, Terry L. Barrett, Jianguo Wu, 2015-06-23 This book describes the emergence of landscape ecology its current status as a new integrative science and how distinguished scholars in the field of landscape ecology view the future regarding new challenges and career opportunities Over the past thirty years landscape ecology has utilized development in technology and methodology e g satellites GIS and systems technologists to monitor large temporal spatial scale events and phenomena These events include changes in vegetative cover and composition due to both natural disturbance and human cause changes that have academic economic political and social manifestations There is little doubt due to the temporal spatial scale of this integrative science that scholars in fields of study ranging from anthropology to urban ecology will desire to compare their fields with landscape ecology during this intellectually and technologically fertile time History of Landscape Ecology in the United States brings to light the vital role that landscape ecologists will play in the future as the human population continues to increase and fragment the natural environment Landscape ecology is known as a synthesized intersection of disciplines but new theories concepts and principles have emerged that form the foundation of a new transdiscipline

Educating for Intelligent Belief or Unbelief Nel Noddings, 1993 One of the most enduring and controversial issues in American education concerns the place of individual beliefs and moral standards in the classroom Noddings argues that public schools should address the fundamental questions that teenagers inevitably raise about the nature value and meaning of life and death and to do so across the curriculum without limiting such existential and metaphysical discussions to separate religion philosophy or even history classes Explorations of the existence of a God or gods and the value and validity of religious belief for societies or individuals she writes whether they are initiated by students or teachers should be part of the free exchange of human concerns a way in which people share their awe doubts fears hopes knowledge and ignorance Such basic human concerns Noddings maintains are relevant to nearly every subject and should be both non coercive and free from academic evaluation Nel Noddings probes the many ways in which children's questions about God and gods existence and the meaning of life can and should be integrated into life in classrooms and the real world of the public schools From the Foreword This is a rich and sensitive book that will give teachers administrators parents philosophers of education any concerned citizen the basis for more substantial discussion and concrete proposals Free Inquiry Impressive in its sweep of possibilities for exploration in the school curriculum and teacher education Educational Theory
