Diefendorf, 2015-12-30 An exploration of Europe's urban reconstruction after World War II this volume contains 12 essays based on new research which examine the significant architectural continuities in pre war and post war building They highlight the unusual character of rebuilding in several case studies Rebuilding Europe Ruth Rouse, World's Student Christian Federation, 1925 **La Reconstruction en Europe Après la Première Et la Seconde Guerre Mondiale Et Le Rôle de la Conservation Des Monuments Historiques** Nicholas Bullock, Luc Verpoest, 2011 Living with History focuses on a particular aspect of heritage preservation in the twentieth century destruction and postwar reconstruction in Belgium France Germany Great Britain and The Netherlands This book establishes a status quaestionis for the historiography of wartime and postwar preservation and sets these particular developments in preservation history in the context of the general evolution of architecture and urbanism The authors investigate the specific role of conservationists and heritage institutions and administrations in the overall reconstruction and examine the part played by architects and planners in heritage preservation **American Hegemony and the Postwar Reconstruction of Science in Europe** John Krige, 2008-08-29 In 1945 the United States was not only the strongest economic and military power in the world it was also the world's leader in science and technology In American Hegemony and the Postwar Reconstruction of Science in Europe John Krige describes the efforts of influential figures in the United States to model postwar scientific practices and institutions in Western Europe on those in America They mobilized political and financial support to promote not just America's scientific and technological agendas in Western Europe but its Cold War political and ideological agendas as well Drawing on the work of diplomatic and cultural historians Krige argues that this attempt at scientific dominance by the United States can be seen as a form of consensual hegemony involving the collaboration of influential local elites who shared American values He uses this notion to analyze a series of case studies that describe how the U S administration senior officers in the Rockefeller and Ford Foundations the NATO Science Committee and influential members of the scientific establishment

notably Isidor I Rabi of Columbia University and Vannevar Bush of MIT tried to Americanize scientific practices in such fields as physics molecular biology and operations research He details U S support for institutions including CERN the Niels Bohr Institute the French CNRS and its laboratories at Gif near Paris and the never established European MIT Krige s study shows how consensual hegemony in science not only served the interests of postwar European reconstruction but became another way of maintaining American leadership and making the world safe for democracy **The Marshall Plan** Benn

Western Europe s recovery from World War II was nothing short of miraculous From the chaos of the war and the crisis of 1947 Europe moved directly to the most rapid quarter century of economic growth in her history The contributors to this volume seek to identify the sources of this singularly successful recovery That all European countries shared in the miracle suggests that its roots may lie at the international level The chapters therefore focus on the role played by international institutions the International Monetary Fund the World Bank the European Coal and Steel Community the European Payments Union the General Agreement on Tariffs and Trade and weigh the relative importance of domestic and international factors in Europe s postwar recovery This book will be of interest to students of modern European history and

to economists interested in economic growth European economic integration and reform of the Bretton Woods institutions
The Most Noble Adventure Greg Behrman, 2008-08-12 Traces America's four year diplomatic efforts to help rebuild post World War II Europe an endeavor that involved a thirteen billion dollar plan and was heavily influenced by political factors

The United States and European Reconstruction 1945-1960 John Killick, 2014-06-11 In this book John Killick introduces the reader to a key aspect of economic history the impact of American economic intervention in Europe after World War II The effects of this impact are still open to debate The Marshall Plan has traditionally been seen as a decisive turning point in European economic and political history but its effect is now being called into question Would Europe have revived spontaneously after 1945 Did American dollars save the world in 1947 Was American influence the underlying reason for the general drift away from socialism and the move towards European federalism in the late 1940s and early 1950s If the Marshall Plan in conjunction with NATO created a coherent and prosperous western bloc was this critical for the outcome of the Cold War These are important questions to which this careful analysis provides some new and accessible answers

The Marshall Plan Nova Ashford, After the end of World War II Europe was left in a state of devastation Cities infrastructure and industries lay in ruins and the economies of many European nations were crippled The war had drained resources and the continent faced widespread poverty unemployment and hunger The immediate aftermath was marked by the destruction of agricultural systems a lack of essential goods and the breakdown of trade networks Millions of people had lost their homes their livelihoods and their sense of stability The scale of the devastation created a monumental challenge for European nations as they struggled to rebuild and recover In addition to the physical destruction there was a profound psychological impact Many citizens were deeply disillusioned with their governments and institutions leading to political instability in several countries Rising unemployment inflation and a lack of basic resources created fertile ground for extremist ideologies particularly communism to gain traction The fear of a potential Soviet expansion into Western Europe was another driving force behind the need for reconstruction The Soviet Union had already established control over Eastern Europe and there was a growing sense of urgency to rebuild Europe's economies to prevent the spread of communism and maintain stability The United States which had emerged from the war as a global superpower recognized that the fate of Europe was closely tied to its own security The U S feared that economic instability in Europe would lead to political upheaval making it vulnerable to Soviet influence As part of a broader strategy to contain the spread of communism the U S decided to step in and offer assistance to Western Europe This would not only help rebuild the region but also ensure that the newly rebuilt countries would align more closely with democratic and capitalist ideals
The Reconstruction of Western Europe 1945-51 Alan S. Milward, 2006 First Published in 2005 Routledge is an imprint of Taylor Francis an informal company
The Marshall Plan Günter Bischof, Hans Petschar, 2017 On June 5 1947 George C Marshall delivered a speech at Harvard University that would change the world With that speech the U S Secretary of State and close confidant of President

Truman ushered in the European Recovery Program ERP which would soon burgeon into the most successful political project in U S and European history Underwritten by the American taxpayer an unbelievable fourteen billion dollars was made available between 1948 and 1952 for the Marshall Plan money that continues to have multiple benefits for Austria s state economy and society Wonderfully balancing the text with pictures and illustrations G nter Bischof and Hans Petschar tell the thrilling success story of the Marshall Plan and its undiminished vitality *The Shock of America* David Ellwood,2012-07-19

The Shock of America is based on the proposition that whenever Europeans of the last 100 years or more contemplated those margins of their experience where change occurred there sooner or later they would find America How Europeans have come to terms over the decades with this dynamic force in their midst and what these terms were is the story at the heart of this text Masses of Europeans have been enthralled by the real or imaginary prospects coming out of the USA Important minorities were at times deeply upset by them Sometime the roles were reversed or shaken up But nobody could be indifferent for long Inspiration provocation myth menace model all these categories and many more have been deployed to try to cope with the Americans Attitudes and stereotypes have emerged intellectual resources have been mobilised positions and policies developed all trying to explain and deal with the kind of radiant modernity America built over the course of the twentieth century David Ellwood combines political economic and cultural themes suggesting that American mass culture has provided the United States with a uniquely effective link between power and influence over time The book is structured in three parts a separation based on the proposition that America s influence as an unavoidable force for or against innovation was visible most conspicuously after Europe s three greatest military political conflicts of the contemporary era the Great War World War II and the Cold War It concludes with the emotional upsurge in Europe which greeted the arrival of Obama on the world scene suggesting that in spite of all the disappointments and frictions of the years the US still retained its privileged place as a source of inspiration for the future across the Western world *German Europe* Ulrich Beck,2013-04-24

The euro crisis is tearing Europe apart But the heart of the matter is that as the crisis unfolds the basic rules of European democracy are being subverted or turned into their opposite bypassing parliaments governments and EU institutions Multilateralism is turning into unilateralism equality into hegemony sovereignty into the dependency and recognition into disrespect for the dignity of other nations Even France which long dominated European integration must submit to Berlin s strictures now that it must fear for its international credit rating How did this happen The anticipation of the European catastrophe has already fundamentally changed the European landscape of power It is giving birth to a political monster a German Europe Germany did not seek this leadership position rather it is a perfect illustration of the law of unintended consequences The invention and implementation of the euro was the price demanded by France in order to pin Germany down to a European Monetary Union in the context of German unification It was a quid pro quo for binding a united Germany into a more integrated Europe in which France would continue to play the leading role But the precise opposite has

happened Economically the euro turned out to be very good for Germany and with the euro crisis Chancellor Angela Merkel became the informal Queen of Europe The new grammar of power reflects the difference between creditor and debtor countries it is not a military but an economic logic Its ideological foundation is German euro nationalism that is an extended European version of the Deutschmark nationalism that underpinned German identity after the Second World War In this way the German model of stability is being surreptitiously elevated into the guiding idea for Europe The Europe we have now will not be able to survive in the risk laden storms of the globalized world The EU has to be more than a grim marriage sustained by the fear of the chaos that would be caused by its breakdown It has to be built on something more positive a vision of rebuilding Europe bottom up creating a Europe of the citizen There is no better way to reinvigorate Europe than through the coming together of ordinary Europeans acting on their own behalf

The China Mission: George Marshall's Unfinished War, 1945-1947 Daniel Kurtz-Phelan, 2018-04-10 An Economist Best Book of 2018 New York Times Book Review Editor's Pick
Gripping and splendid An enormous contribution to our understanding of Marshall Washington Post At the end of World War II General George Marshall took on what he thought was a final mission this time not to win a war but to stop one In China conflict between Communists and Nationalists threatened to suck in the United States and escalate into revolution Marshall's charge was to cross the Pacific broker a peace and prevent a Communist takeover all while staving off World War III At first the results seemed miraculous But as they started to come apart Marshall was faced with a wrenching choice one that would alter the course of the Cold War define the US China relationship and spark one of the darkest ever turns in American political life The China Mission offers a gripping close up view of the central figures of the time from Marshall Mao and Chiang Kai shek to Eisenhower Truman and MacArthur as they stood face to face and struggled to make history with consequences and lessons that echo today

The Greening of London, 1920-2000 Matti O. Hannikainen, 2017-05-15 The long term development of public green spaces such as parks public gardens and recreation grounds in London during the twentieth century is a curiously neglected subject despite the fact that various kinds of green spaces cover huge areas in cities in the UK today This book explores how and why public green spaces have been created and used in London and what actors have been involved in their evolution during the course of the twentieth century Building on case studies of the contemporary boroughs of Camden and Southwark and making use of a wealth of archival material the author takes us through the planning and creation stages to the intended and actual uses and ongoing management of the

spaces By highlighting the rise and fall of municipal authorities and the impact of neo liberalism after the 1970s the book also deepens our understanding of how London has been governed planned and ruled during the twentieth century It makes a crucial contribution to academic as well as political discourse on the history and present role of green space in sustainable cities
