## **Recasting The Machine Age Henry Fords Village Industries:**

**Recasting the Machine Age** Howard P. Segal, 2005      *The Quotable Henry Ford* Michele Wehrwein Albion, 2013-03-05  
An illuminating collection of quotes offering new insights on Henry Ford's sweeping achievements as one of America's greatest industrialists      *Henry Ford's Plan for the American Suburb* Heather Barrow, 2018-10-29  
Around Detroit suburbanization was led by Henry Ford who not only located a massive factory over the city's border in Dearborn but also was the first industrialist to make the automobile a mass consumer item. So suburbanization in the 1920s was spurred simultaneously by the migration of the automobile industry and the mobility of automobile users. A welfare capitalist Ford was a leader on many fronts: he raised wages, increased leisure time, and transformed workers into consumers, and he was the most effective at making suburbs an intrinsic part of American life. The decade was dominated by this new political economy, also known as Fordism, linking mass production and consumption. The rise of Dearborn demonstrated that Fordism was connected to mass suburbanization as well. Ultimately, Dearborn proved to be a model that was repeated throughout the nation as people of all classes relocated to suburbs, shifting away from central cities. Mass suburbanization was a national phenomenon. Yet the example of Detroit is an important baseline since the trend was more discernable there than elsewhere. Suburbanization, however, was never a simple matter of outlying communities growing in parallel with cities. Instead, resources were diverted from central cities as they were transferred to the suburbs. The example of the Detroit metropolis asks whether the mass suburbanization which originated there represented the American dream, and if so, by whom, and at what cost. This book will appeal to those interested in cities and suburbs, American studies, technology and society, political economy, working class culture, welfare state systems, transportation, race relations, and business management.      **The Color Line and the Assembly Line** Elizabeth Esch, 2018-05-04  
*The Color Line and the Assembly Line* tells a new story of the impact of mass production on society. Global corporations based originally in the United States have played a part in making gender and race everywhere. Focusing on Ford Motor Company's rise to become the largest, richest, and most influential corporation in the world, *The Color Line and the Assembly Line* takes on the traditional story of Fordism. Contrary to popular thought, the assembly line was perfectly compatible with all manner of racial practice in the United States, Brazil, and South Africa. Each country's distinct racial hierarchies in the 1920s and 1930s informed Ford's often divisive labor processes. Confirming racism as an essential component in the creation of global capitalism, Elizabeth Esch also adds an important new lesson showing how local patterns gave capitalism its distinctive features.      *National Endowment for the Humanities Annual Report* National Endowment for the Humanities, 1990      *The Social Sciences Go to Washington* Hamilton Cravens, 2004  
What happens when the allegedly value-free social sciences enter the national political arena? In *The Social Sciences Go to Washington*, scholars examine the effects of the massive influx of sociologists, demographers, economists, educators, and others to the federal advisory process in the postwar period. Essays look at how these social scientists sought

to change existing policies in welfare public health urban policy national defense environmental policy and science and technology policy and the ways they tried to influence future policies Policymakers have been troubled that followers of postmodernism have questioned the legitimacy of scientific and political authority to speak for the desires of social groups As the social sciences increasingly become expressions of individual preferences the contributors ask how can they continue to be used to set public policy for us all This collection is a useful resource for anyone studying the relationship between science and the government in the postwar years

*Ages of American Capitalism* Jonathan Levy, 2022-04-05 A leading economic historian traces the evolution of American capitalism from the colonial era to the present and argues that we've reached a turning point that will define the era ahead A monumental achievement sure to become a classic Zachary D Carter author of *The Price of Peace* In this ambitious single volume history of the United States economic historian Jonathan Levy reveals how capitalism in America has evolved through four distinct ages and how the country's economic evolution is inseparable from the nature of American life itself The Age of Commerce spans the colonial era through the outbreak of the Civil War and the Age of Capital traces the lasting impact of the industrial revolution The volatility of the Age of Capital ultimately led to the Great Depression which sparked the Age of Control during which the government took on a more active role in the economy and finally in the Age of Chaos deregulation and the growth of the finance industry created a booming economy for some but also striking inequalities and a lack of oversight that led directly to the crash of 2008 In *Ages of American Capitalism* Levy proves that capitalism in the United States has never been just one thing Instead it has morphed through the country's history and it's likely changing again right now A stunning accomplishment an indispensable guide to understanding American history and what's happening in today's economy Christian Science Monitor The best one volume history of American capitalism Sven Beckert author of *Empire of Cotton*

**The Company Town** Hardy Green, 2010-09-07 Company town The very phrase sounds un-American Yet company towns are the essence of America Hershey bars Corning glassware Kohler bathroom fixtures Maytag washers Spam each is the signature product of a company town in which one business for better or worse exercises a grip over the population In *The Company Town* Hardy Green who has covered American business for over a decade offers a compelling analysis of the emergence of these communities and their role in shaping the American economy beginning in the country's earliest years From the textile mills of Lowell Massachusetts to the R from the coal mines of Ludlow Colorado to corporate campuses of today's major tech companies America has been uniquely open to the development of the single company community But rather than adhering to a uniform blueprint American company towns represent two very different strands of capitalism One is socially benign a paternalistic utopian ideal that fosters the development of schools hospitals parks and desirable housing for its workers The other Exploitationville focuses only on profits at the expense of employees well being Adeptly distinguishing between these two models Green offers rich stories about town builders and workers He vividly describes the origins of America's company towns the living and working

conditions that characterize them and the violent sometimes fatal labor confrontations that have punctuated their existence And he chronicles the surprising transformation underway in many such communities today With fascinating profiles of American moguls from candyman Milton Hershey and steel man Elbert H Gary to oil tycoon Frank Phillips and Manhattan Project czar General Leslie B Groves The Company Town is a sweeping tale of how the American economy has grown and changed and how these urban centers have reflected the best and worst of American capitalism

**Rhetoric, Inc.** Timothy Johnson, 2020-10-14 In 1914 the Ford Motor Company opened its Motion Picture Laboratory an in house operation that produced motion pictures to educate its workforce and promote its products Just six years later Ford films had found their way into schools and newsreels travelogues and even feature films in theaters across the country It is estimated that by 1961 the company's movies had captured an audience of sixty four million people This study of Ford's corporate film program traces its growth and rise in prominence in corporate America Drawing on nearly three hundred hours of material produced between 1914 and 1954 Timothy Johnson chronicles the history of Ford's filmmaking campaign and analyzes selected films visual and narrative techniques and genres He shows how what began as a narrow educational initiative grew into a global marketing strategy that presented a vision not just of Ford or corporate culture but of American life more broadly In these films Johnson uncovers a powerful rhetoric that Ford used to influence American labor corporate style production practices road building suburbanization and consumer culture The company's early and continued success led other corporations to adopt similar programs Persuasive and thoroughly researched Rhetoric Inc documents the role that imagery and messaging played in the formation of the modern American corporation and provides a glimpse into the cultural turn to the economy as a source of entertainment value and meaning

**After the Factory** James J. Connolly, 2010-10-14 The most pressing question facing the small and mid sized cities of America's industrial heartland is how to reinvent themselves Once thriving communities in the Northeastern and Midwestern U S have decayed sharply as the high wage manufacturing jobs that provided the foundation for their prosperity disappeared A few larger cities had the resources to adjust but most smaller places that relied on factory work have struggled to do so Unless and until they find new economic roles for themselves the small cities will continue to decline Reinventing these smaller cities is a tall order A few might still function as nodes of industrial production But landing a foreign owned auto manufacturer or a green energy plant hardly solves every problem The new jobs will not be unionized and thus will not pay nearly as much as the positions lost The competition among localities for high tech and knowledge economy firms is intense Decaying towns with poor schools and few amenities are hardly in a good position to attract the creative class workers they need Getting to the point where they can lure such companies will require extensive retooling not just economically but in terms of their built environment cultural character political economy and demographic mix Such changes often run counter to the historical currents that defined these places as factory towns After the Factory examines the fate of industrial small cities from a variety of angles It includes essays from

a variety of disciplines that consider the sources and character of economic growth in small cities They delve into the history of industrial small cities explore the strategies that some have adopted and propose new tacks for these communities as they struggle to move forward in the twenty first century Together they constitute a unique look at an important and understudied dimension of urban studies and globalization Fordlandia Greg Grandin,2010-04-27 From Pulitzer Prize winning author Greg Grandin comes the stunning never before told story of the quixotic attempt to recreate small town America in the heart of the Amazon In 1927 Henry Ford the richest man in the world bought a tract of land twice the size of Delaware in the Brazilian Amazon His intention was to grow rubber but the project rapidly evolved into a more ambitious bid to export America itself along with its golf courses ice cream shops bandstands indoor plumbing and Model Ts rolling down broad streets Fordlandia as the settlement was called quickly became the site of an epic clash On one side was the car magnate lean austere the man who reduced industrial production to its simplest motions on the other the Amazon lush extravagant the most complex ecological system on the planet Ford s early success in imposing time clocks and square dances on the jungle soon collapsed as indigenous workers rejecting his midwestern Puritanism turned the place into a ribald tropical boomtown Fordlandia s eventual demise as a rubber plantation foreshadowed the practices that today are laying waste to the rain forest More than a parable of one man s arrogant attempt to force his will on the natural world Fordlandia depicts a desperate quest to salvage the bygone America that the Ford factory system did much to dispatch As Greg Grandin shows in this gripping and mordantly observed history Ford s great delusion was not that the Amazon could be tamed but that the forces of capitalism once released might yet be contained Fordlandia is a 2009 National Book Award Finalist for Nonfiction

Gieryn, 2018-05-22 We may not realize it but truth and place are inextricably linked For ancient Greeks temples and statues clustered on the side of Mount Parnassus affirmed their belief that predictions from the oracle at Delphi were accurate The trust we have in Thoreau's wisdom depends in part on how skillfully he made Walden Pond into a perfect place for discerning timeless truths about the universe Courthouses and laboratories are designed and built to exacting specifications so that their architectural conditions legitimate the rendering of justice and discovery of natural fact The on site commemoration of the struggle for civil rights Seneca Selma and Stonewall reminds people of slow but significant political progress and of unfinished business What do all these places have in common Thomas F. Gieryn calls these locations truth spots places that lend credibility to beliefs and claims about natural and social reality about the past and future and about identity and the transcendent In *Truth Spots* Gieryn gives readers an elegant rigorous rendering of the provenance of ideas uncovering the geographic location where they are found or made a spot built up with material stuff and endowed with cultural meaning and value These kinds of places including botanical gardens naturalists field sites Henry Ford's open air historical museum and churches and chapels along the pilgrimage way to Santiago de Compostela in Spain would seem at first to have little in common But each is a truth spot a place that makes people believe Truth may well be the daughter of time Gieryn argues but it is also the son of place      **France in the Age of Organization** Jackie Clarke, 2011-06-01 In interwar France there was a growing sense that organization was the solution to the nation's perceived social economic and political ills This book examines the roots of this idea in the industrial rationalization movement and its manifestations in areas as diverse as domestic organization and economic planning In doing so it shows how experts in fields ranging from engineering to the biological sciences shaped visions of a rational socio economic order from the 1920s to Vichy and beyond      **Humanities** ,1990      *The Rise of Metacreativity* Eduardo Navas, 2022-11-18 This book brings together history and theory in art and media to examine the effects of artificial

intelligence and machine learning in culture and reflects on the implications of delegating parts of the creative process to AI In order to understand the complexity of authorship and originality in relation to creativity in contemporary times Navas combines historical and theoretical premises from different areas of research in the arts humanities and social sciences to provide a rich historical and theoretical context that critically reflects on and questions the implications of artificial intelligence and machine learning as an integral part of creative production As part of this the book considers how much of postproduction and remix aesthetics in art and media preceded the current rise of metacreativity in relation to artificial intelligence and machine learning and explores contemporary questions on aesthetics The book also provides a thorough evaluation of the creative application of systematic approaches to art and media production and how this in effect percolates across disciplines including art design communication as well as other fields in the humanities and social sciences An essential read for students and scholars interested in understanding the increasing role of AI and machine learning in contemporary art and media and their wider role in creative production across culture and society      **Utopias** Howard P. Segal,2012-05-21 This brief history connects the past and present of utopian thought from the first utopias in ancient Greece right up to present day visions of cyberspace communities and paradise Explores the purpose of utopias what they reveal about the societies who conceive them and how utopias have changed over the centuries Unique in including both non Western and Western visions of utopia Explores the many forms utopias have taken prophecies and oratory writings political movements world s fairs physical communities and also discusses high tech and cyberspace visions for the first time The first book to analyze the implicitly utopian dimensions of reform crusades like Technocracy of the 1930s and Modernization Theory of the 1950s and the laptop classroom initiatives of recent years      *Past and Present Energy Societies* Nina Möllers,Karin Zachmann,2014-04-15 Abundant salutary problematic energy makes history As a symbol resource and consumer good it shapes technologies politics societies and cultural world views Focussing on a range of energy types from electricity and oil to bioenergy this volume analyzes the social cultural and political concepts and discourses of energy and their implementation and materialization within technical systems applications media representations and consumer practice By examining and connecting production mediation and consumption aspects from an international and interdisciplinary perspective the book offers an innovative view on how energy is imagined discussed staged and used      **Powering American Farms** Richard F. Hirsh,2022-06-14 The untold story of the power industry s efforts to electrify growing numbers of farms in the years before the creation of Depression era government programs Even after decades of retelling the story of rural electrification in the United States remains dramatic and affecting As textbooks and popular histories inform us farmers obtained electric service only because a compassionate federal government established the Tennessee Valley Authority and the Rural Electrification Administration REA during the Great Depression of the 1930s The agencies success in raising the standard of living for millions of Americans contrasted with the failure of the greedy big city utility companies which showed

little interest in the apparently unprofitable nonurban market Traditional accounts often describe the nation's population as split in two separated by access to a magical form of energy just past cities limits a bleak preindustrial class of citizens endured literally in near darkness at night and envious of their urban cousins who enjoyed electrically operated lights refrigerators radios and labor saving appliances In *Powering American Farms* Richard F Hirsh challenges the notion that electric utilities neglected rural customers in the years before government intervention Drawing on previously unexamined resources Hirsh demonstrates that power firms quadrupled the number of farms obtaining electricity in the years between 1923 and 1933 for example Though not all corporate managers thought much of the farm business a cadre of rural electrification advocates established the knowledge base and social infrastructure upon which New Deal organizations later capitalized The book also suggests that the conventional storyline of rural electrification remains popular because it contains a colorful hero President Franklin D Roosevelt and villainous utility magnates such as Samuel Insull who make for an engaging but distorted narrative Hirsh describes the evolution of power company managers thinking in the 1920s and early 1930s from believing that rural electrification made no economic sense to realizing that serving farmers could mitigate industry wide problems This transformation occurred as agricultural engineers in land grant universities supported by utilities demonstrated productive electrical technologies that yielded healthy profits to farmers and companies alike Gaining confidence in the value of rural electrification private firms strung wires to more farms than did the REA until 1950 a fact conveniently omitted in conventional accounts *Powering American Farms* will interest academic and lay readers of New Deal history the history of technology and revisionist historiography
