Recent Developments In The Archaeology Of The Peak District:

Recent Developments in the Archaeology of the Peak District Richard Hodges, Ken Smith, 1991-01 This collection of essays deals with topics that range from the Neolithic through to the post mediaeval period They discuss the advances in the understanding of the archaeology of the Peak District resulting from the increased fieldwork through the 1980s and set the direction for research in the coming decade The Archaeology of a Great Estate Nicola Bannister, John Barnatt, 2009-08-25

The Peak District is a historic upland landscape with a rich palimpsest of features which invoke the many generations of people who have inhabited the area The great estate of Chatsworth reflects the Peak in microcosm Its landscapes are diverse and contain many exceptional features including archaeological earthworks of medieval open fields and later enclosures in the park and prehistoric stone circles barrows fields and settlements on the Estate moorlands This book tells the story of the historic landscape and its archaeology it is a companion volume to Chatsworth A Landscape History Barnatt Williamson but in contrast to that book includes the whole of the Estate landscape including the extensive farmland and moorlands beyond the park and concentrates on visible archaeology and what it can tell us about the past The result is a fascinating in depth portrait of one of the major estates in Britain *The First Stones* William Britnell, Alasdair Whittle, 2022-12-01 The First Stones brings together the results of recent research on the Neolithic long cairns lying in the shadow of the Black Mountains in south east Wales focusing upon Penywyrld and Gwernvale the two best known tombs within the group previously excavated in the 1970s Important results lie in both new site detail and reassessment of the wider context Small scale excavation geophysical survey and geological assessment at Penywyrld the largest of the Welsh long cairns gave further information about the distinctive external and internal architecture of the monument In turn this opened the opportunity to reassess the pre monument sequence at Gwernvale with re examination of both Mesolithic and Neolithic occupations including a timber structure and midden lithic and pottery assemblages and cereal remains The frame for wider reassessment is given by fresh chronological modeling both of the monuments themselves suggesting a sequence from Penywyrld and Pipton to Ty Isaf and Gwernvale probably spanning the 38th to the 36th or 35th centuries cal BC and of early Neolithic activity in south Wales and the Marches probably beginning in the 39th century cal BC A detailed study of the major assemblages of human remains from the Black Mountains tombs includes evidence for diet trauma and lifestyles of the populations represented Recent isotope analysis of human remains from the tombs is also reviewed implying social mobility and migration within local populations during the early Neolithic The First Stones makes a significant contribution to the study of tomb building treatment of the dead place making the relationship of monuments to landscape local and regional identities connections and affiliations across southern Britain and the adjacent continent and Neolithization in western Britain Viewed within the context of tombs within the Cotswold Severn tradition as a whole it leads to an appreciation of the local and regional distinctiveness of architecture and mortuary practice exhibited by the tombs in this area of south east

Wales emerging as part of the intake of a significant inland area in the early centuries of the Neolithic **Pecsaetna** Phil Sidebottom, 2020-09-16 This book is intended to pull together our current knowledge of the lost group of people called the Pecsaetna literally meaning the Peak Sitters by synthesising more recent historical and archaeological research towards a better understanding of their activities territory and identity This group of people is shrouded in the mists of the so called Dark Ages and are only known to us by the chance survival of less than a handful of documents Since the mid 20th century valuable work has been done to identify former Anglo Saxon estates in the Peak from the analysis of charters and from the Domesday survey together with recent wider historical analysis In addition some have also attempted reconstructions of geographical territories from the Tribal Hidage the document which first mentions the Pecsaetna To this historical analysis can be added further archaeological evidence which ranges from Anglo Saxon barrow investigation in the limestone Peak District to studies into the geographical distributions of free standing stone monuments of the Anglo Saxon and Anglo Scandinavian periods It is this latter study that has prompted the writer to attempt this study **Challenging**

Preconceptions of the European Iron Age Wendy Morrison, 2022-06-20 This collection of essays by leading researchers in the archaeology of the European Iron Age pays tribute to Professor John Collis who since the 1960s has been involved in investigating and enriching our understanding of Iron Age society and crucially questioning the status quo of our narratives about the past **Bronze Age Landscapes** Joanna Bruck, 2002-02-01 This volume is a collection of essays which exemplify the range and diversity of work currently being undertaken on the regional landscapes of the British Bronze Age and the progress which has been made in both theoretical and interpretive debate Together these papers reflect the vibrancy of current research and promote a closer marriage of landscape site and material culture studies

An Upland Biography John Barnatt, Bill Bevan, Mark Edmonds, 2017-02-28 Gardsom's Edge is an area of gritstone upland situated on the Eastern Moors of the Derbyshire Peak District Like other parts of the Eastern Moors Gardsom's Edge has long been renowned for the wealth of prehistoric field systems cairns and other structures which can still be traced across the surface Drawing on the results of original survey and excavation *An Upland Biography* documents prehistoric activity across this area exploring the changing character of occupation from the Mesolithic to the Iron Age It also tacks back and forth between local detail and regional patterns to better understand the broader social worlds in which Gardsom's Edge was set

Borderlands Phil Sidebottom, 2023-09-30 An accessible overview that will interest anyone who wants to know more about South Yorkshire during the Viking era The period AD 450-1066 was a tumultuous time for the British Isles and this was in particularly true of what became South Yorkshire Existing on the borderland between the great Anglo Saxon kingdoms of Mercia and Northumbria South Yorkshire remained contentious in the struggles between the rival polities with land ceded and taken over the best part of four centuries Evidence suggests that most of southern Yorkshire remained largely occupied by native British inhabitants rather than Saxon or Viking incomers at least until the later Saxon period and after the Viking take over which began in the 9th century With a focus on the previously academically neglected archaeology of the region this book features new evidence to paint a full picture of South Yorkshire in the Anglo Saxon and Viking Periods Included are pre Conquest charters and the enigmatic Tribal Hidage tribute list as well as an analysis of place names and looks at the archaeological record of dark age earthworks burials fortified places and finds The author uses his expert knowledge of Anglo Saxon carved stone monuments to supplement the historical and archaeological evidence to identify centers of settlement and control in the area and which also offers a tantalizing insight into local ethnicity The research is brought to life with maps figures and photographic evidence throughout the book In pulling together our current knowledge of South Yorkshire during this pivotal era the book acts as a reminder of how the wealth of local character is easily destroyed unless we become more aware of its fragility and celebrate its diversity Written in accessible language this book will be of interest to both academics and anyone who wants to know more about South Yorkshire in the post Roman and Early Medieval periods

Midlands have long been ignored or marginalized in narratives of British Prehistory In this book unpublished data is used for the first time in a work of synthesis to reconstruct the prehistory of the earliest communities across the River Don drainage basin The Agricultural Revolution in Prehistory Graeme Barker, 2006-10-05 This book addresses one of the most debated and least understood revolutions in the history of our species the change from foraging hunting and gathering to farming Ten thousand years ago there were few if any communities whom we can properly call farmers five thousand years later large numbers of the world s population were farmers using a wide variety of crops and animals in different combinations in different regions The possible reasons for the transition have long been one of the most controversial topics in archaeology and continue to be so The author integrates a massive array of information from archaeology including archaeological approaches right across the humanities and science spectrum together with many other disciplines including anthropology botany climatology genetics linguistics and zoology Against current orthodoxy he develops a strong case for the parallel development of geographically specific agricultural systems in many areas of the world transformations in the lifeways of forager societies that in some cases have origins reaching much further back in time than commonly suggested He argues that the change from foraging to farming was as much about foragers developing new ways of thinking about their relationship to the world they inhabited as about new ways of obtaining food
