Recent Marxian Theory Class Formation And Social Conflict I:

Recent Marxian Theory John F. Sitton, 1996-07-03 This book brings together some of the more prominent recent analyses within the Marxian tradition that bear on the topics of class formation and social conflict in contemporary capitalism. After examining debates over historical agency, class structure and electoral dynamics, it explores the provocative arguments of analytical Marxists Claus Offe, Jürgen Habermas and Immanuel Wallerstein. In light of these discussions, the author concludes that even if the variety of forces contemporary capitalism structurally generates do not promote the formation of a revolutionary proletariat, class relations continue to be important for analyzing the historical trajectory of and challenges to capitalism, although not in the way that Marx imagined.

Law/Society John R. Sutton, 2000-12-22 A core text for the Law and Society or Sociology of Law course offered in Sociology, Criminal Justice, Political Science and Schools of Law, John Sutton offers an explicitly analytical perspective to the subject: how does law change? What makes law more or less effective in solving social problems? What do lawyers do? Chapter 1 contrasts normative and sociological perspectives on law and presents a brief primer on the logic of research and inference as it is applied to law-related issues. Theories of legal change are discussed within a common conceptual framework that highlights the explanatory strengths and weaknesses of different arguments. Discussions of law in action are explicitly comparative, applying a consistent model to explain the variable outcomes of civil rights legislation. Many concrete, in-depth examples throughout the chapters.

Approaches to Class Analysis Erik Olin Wright, 2005-07-01 Few themes have been as central to sociology as class, and yet class remains a perpetually contested idea. Sociologists disagree not only on how best to define the concept of class but on its general role in social theory and indeed on its continued relevance to the sociological analysis of contemporary society. Some people believe that classes have largely dissolved in contemporary societies; others believe class remains one of the fundamental forms of social inequality and social power. Some see class as a narrow economic phenomenon, whilst others adopt an expansive conception that includes cultural dimensions as well as economic conditions. This 2005 book explores the theoretical foundations of six major perspectives of class, with each chapter written by an expert in the field. It concludes with a conceptual map of these alternative approaches by posing the question: If class is the answer, what is the question?

Marxist Class Theory for a Skeptical World Raju J. Das, 2017-01-16 Marxist Theory of Class for a Skeptical World is a critique of some of the influential radical theories of class and presents an alternative approach to it. This book critically discusses Analytical Marxist and Post-structuralist Marxist theories of class and offers an alternative approach that is rooted in the ideas of Marx and Engels as well as Lenin and Trotsky. It presents a materialist dialectical foundation for class theory and conceptualizes class at the trans-historical level and at the level of capitalism. It shows that capitalism is an objectively existing articulation of exchange property and value relations between capital and labour at multiple geographical scales and that the state is an arm of class relation. It draws out implications of class relations for consciousness and political power of the proletariat.
