High Pressure Liquids and Solutions Y. Taniguchi, K. Hara, M.

Senoo, 2013-10-22 Pressure like temperature is one of the most important parameters governing the state of matter Today high pressure science and technology is applied to diverse research fields physics chemistry biology earth and marine sciences material science and technology chemical engineering biotechnology and medicine Research on liquids and solutions at high pressure is not only important for elucidating the structure of liquids intermolecular interactions between solutes and solvents and chemical reactions in solutions but also for providing fundamental numerical data for the design of chemical plants and the development of chemical processes In particular high pressure studies of water and aqueous solutions are closely correlated with research into bioscience and biotechnology In this volume some of the most important and most recent advances in liquids and solutions at high pressure in Japan are presented

Wood-cement Composites - Suitability of Western Australian Mallee Eucalypt, Blue Gum and Melaleucas K. E. Semple, Philip D. Evans, 2004 Assesses the potential suitability of small diameter waste wood from mallee eucalypt and melaleuca trees for the manufacture of wood cement composites firstly by measuring the compatibility of the wood with cement and secondly by manufacturing test composites of various types A principle objective was to demonstrate that good quality cement bonded boards can be manufactured from eucalypt wood including mallee and blue gum using relatively simple manufacturing techniques It is
