Policy Implications of Recent Advances in Evolutionary and Institutional Economics Claudius Grabner,Torsten Heinrich,Henning Schwardt,2016-05-12 This collection is inspired by the coming retirement of Professor Wolfram Elsner It presents cutting edge economic research relevant to economic policies and policy making placing a strong focus on innovative perspectives In a changing world that has been shaken by economic social financial and ecological crises it becomes increasingly clear that new approaches to economics are needed for both theoretical and empirical research for applied economics as well as policy advice At this point it seems necessary to develop new methods to reconsider theoretical foundations and especially to take into account the theoretical alternatives that have been advocated within the field of economics for many years This collection seeks to accomplish this by including institutionalist evolutionary complexity and other innovative perspectives It thereby creates a unique selection of methodological and empirical approaches ranging from game theory to economic dynamics to empirical and historical theoretical analyses The interested reader will find careful reconsiderations of the historical development of institutional and evolutionary theories enlightening theoretical contributions interdisciplinary ideas as well as insightful applications The collection serves to highlight the common ground and the synergies between the various approaches and thereby to contribute to an emerging coherent framework of alternative theories in economics This book is of interest to those who study political economy economic theory and philosophy as well as economic policy

New Developments in Productivity Analysis Charles R. Hulten,Edwin R.

Dean, Michael Harper, 2007-11-01 The productivity slowdown of the 1970s and 1980s and the resumption of productivity growth in the 1990s have provoked controversy among policymakers and researchers Economists have been forced to reexamine fundamental questions of measurement technique Some researchers argue that econometric approaches to productivity measurement usefully address shortcomings of the dominant index number techniques while others maintain that current productivity statistics underreport damage to the environment In this book the contributors propose innovative approaches to these issues The result is a state of the art exposition of contemporary productivity analysis Charles R Hulten is professor of economics at the University of Maryland He has been a senior research associate at the Urban Institute and is chair of the Conference on Research in Income and Wealth of the National Bureau of Economic Research Michael Harper is chief of the Division of Productivity Research at the Bureau of Labor Statistics Edwin R Dean formerly associate commissioner for Productivity and Technology at the Bureau of Labor Statistics is adjunct professor of economics at The George Washington University

Recent Advances in Neo-Schumpeterian Economics Andreas Pyka, Horst Hanusch, 2009-01-01 This judicious selection of recent essays demonstrates the applicability of the fundamental principles of neo Schumpeterian economics namely innovation and uncertainty The authors demonstrate how neo Schumpeterian economics is developing into a comprehensive economic theory encompassing industry the public sector and financial markets Neo Schumpeterian economics has become a prolific field with a major orientation towards innovation driven industrial dynamics However a truly comprehensive neo Schumpeterian approach argues that innovation is also an important element in both the public and financial sectors For example a lack of public infrastructure or speculative bubbles in financial markets can hinder or even prevent economic development The expert contributions to this book deal with the future orientation of the subject in terms of innovative performance in the industrial financial and public sectors Recent Advances in Neo Schumpeterian Economics can be considered a first attempt to substantiate the comprehensive neo Schumpeterian approach of which Horst Hanusch has been a leading proponent This unique and path breaking book will be of great interest and value to researchers in the fields of innovation industrial economics financial markets and the public sector

New Directions in Development Economics Mats Lundahl, Benno Ndulu, 2005-08-10 This volume is divided into two thematic parts economic growth or its absence in developing countries and contributions to the debate on the role of the state versus the market It outlines possible policy prescriptions of relevance both in the North and South

Rethinking Development Economics Ha-Joon Chang, 2003-06-20 This book addresses key issues in development economics from macroeconomics finance and governance to trade industry agriculture and poverty Bringing together some of the foremost names in the field this comprehensive and timely collection constitutes a critical staging post in the future of development economics

Alternative Principles of Economics Stanley Bober, 2016-04-15 This is the first book to provide a complete introduction to Post Keynesian and other alternative theories of economics Concise yet comprehensive and written to be accessible to a wide

audience it offers a unique opportunity to enhance traditional neo classical economics training with authoritative coverage of the full range of the non orthodox paradigm Handbook of Alternative Theories of Economic Development Erik S.

Reinert, Jayati Ghosh, Rainer Kattel, 2016-09-28 The Handbook of Alternative Theories of Economic Development explores the theories and approaches which over a prolonged period of time have existed as viable alternatives to today's mainstream and neo classical tenets With a total of 40 specially commissioned chapters written by the foremost authorities in their respective fields this volume represents a landmark in the field of economic development It elucidates the richness of the alternative and sometimes misunderstood ideas which in different historical contexts have proved to be vital to the improvement of the human condition The subject matter is approached from several complementary perspectives From a historical angle the Handbook charts the mercantilist and cameralist theories that emerged from the Renaissance and developed further during the Enlightenment From a geographical angle it includes chapters on African Chinese Indian and Muslim approaches to economic development Different schools are also explored and discussed including nineteenth century US development theory Marxist Schumpeterian Latin American structuralism regulation theory and world systems theories of development In addition the Handbook has chapters on important events and institutions including The League of Nations The Havana Charter and UNCTAD as well as on particularly influential development economists Contemporary topics such as the role of finance feminism the agrarian issue and ecology and the environment are also covered in depth This comprehensive Handbook offers an unrivalled review and analysis of alternative and heterodox theories of economic development It should be read by all serious scholars teachers and students of development studies and indeed anyone interested in alternatives to development orthodoxy New Theories in Growth and Development Frank Hahn, Fabrizio Coricelli, Massimo Di

Matteo, 2016-01-06 This collection offers a stimulating and insightful overview of the main issues affecting long term economic growth The novelty of this book is that it brings together two strands of economic literature growth and development theories The communication between different approaches is crucial as it is increasingly understood that growth hinges upon institutional and policy aspects that are generally neglected in the stylized models of growth but highly relevant for developing countries Government policies and institution design become central to the explanation of divergent growth paths *Recent Developments in the Study of Business and Economic History* Herman Edward Krooss, 1977

Rethinking Economic Development, Growth, and Institutions Jaime Ros, 2013-09 Presents the contributions that early development theory can make to growth economics in answering why some countries are richer than others and why some economies grow faster than others **Labor Standards and Development in the Global Economy**, 1990 **Economic Theories in a Non-Walrasian Tradition** Takashi Negishi, 1985 This title covers a range of topics in the history of economics that have relevance to economic theories at the beginning of the 21st century The author analyzes and interprets non Walrasian economics a theory outside the mainstream of economic theory **The Making of a Post-Keynesian**

Economist G. Harcourt, 2012-05-29 *The Making of a Post Keynesian Economist* Cambridge Harvest gathers up the threads of the last decade of the author's twenty eight years in Cambridge before his return to Australia The essays include autobiography theory review articles surveys policy intellectual biographies and tributes and general essays *Development of Economic Analysis* Ingrid H. Rima, 2003-10-04 *The Development of Economic Analysis* traces the development of economic theory from Plato through to contemporary thought All the major movements are covered and presented here in six chronological parts The text includes a number of practical features a family tree at the beginning of each section illustrating how the key streams and people connect and develop accompanied by a list of key publications for that period integrated selections of readings from the major works enable reference to original sources The subject matter is divided to allow individual users to follow their preferences The text also includes guidelines for use on a one semester course Each part ends with a summary and questions to discuss along with glossaries and suggestions for further reading The result is a valuable aid to the study of economic thought and encourages students to examine the relevance to contemporary theory Late Neoclassical Economics Yahya M. Madra, 2016-06-10 Several contemporary economic theories revolve around different concepts market failures institutions transaction costs information asymmetries motivational diversity cognitive limitations strategic behaviors and evolutionary stability In recent years many economists have argued that the increase in circulation and mobilization of these new and heterogeneous concepts and their associated methodologies e.g. experiments evolutionary modelling simulations signify the death of neoclassical economics *Late Neoclassical Economics The Restoration of Theoretical Humanism in Contemporary Economic Theory* draws on the work of Louis Althusser Michel Foucault and the Amherst School to construct the concept of a self transparent and self conscious human subject Homo economicus as the theoretical humanist core of the neoclassical tradition Instead of identifying the emergent heterogeneity as a break from neoclassicism this book offers a careful genealogy of many of the new concepts and approaches including evolutionary game theory experimental economics and behavioural economics and reads their elaboration as part of the restoration of the theoretical humanist core of the tradition Late neoclassical economics is therefore characterized as a collection of diverse approaches which have emerged in response to the drift towards structuralism This book is suitable for those who study political economy history of economic thought and philosophy of economics The arguments put forward in this text will also resonate with anyone who is interested in the fate of the neoclassical tradition and the future of economic theory

Development Dilemmas Melvin Ayogu, Don Ross, 2004-10-28 The new economy is characterized in the developing world by open capital markets and coordinated international regulation neither of which existed in the colonial period *Progress* Leo Marx, Bruce Mazlish, 1996 Evaluates the foundational idea of progress from many perspectives
