Control of Price Related Terms in Standard Form Contracts Yeşim M. Atamer, Pascal Pichonnaz, 2019-11-19 This book explores various approaches around the world regarding price term control and particularly discusses the effectiveness of two major paths ex ante regulatory and ex post judicial intervention Price control and its limits are issues that affect all liberal market economies as well as more regulated markets For the past several years courts in many different countries have been confronted with the issue of whether and to what extent they should intervene regarding price related terms in standard form contracts especially in the area of consumer contracts Open price clauses flat remunerations price adjustment clauses clauses giving the seller supplier the right to ask for additional payments bundling or partitioning practices etc a variety of price related terms are used to manipulate customers choices often also by exploiting their behavioral biases The result is an unfavorable contract that is later challenged in court However invalidating a given price term in standard forms e.g. of a banking or utilities contract only has an inter partes effect which means that in thousands if not millions of similar contracts the same clauses continue to be used Effective procedural rules are often lacking Therefore pricing patterns that serve to hide rather than to reveal the real cost of goods and services require special attention on the part of regulators The aim of this book is to determine the various approaches in the world regarding price term control and particularly to discuss the efficiency of both paths ex ante regulatory and ex post judicial intervention Thanks to its broad comparative analysis this book offers a

thorough overview of the methods employed in several countries It gathers twenty eight contributions from national rapporteurs and one supra national rapporteur EU to the 2018 IACL Congress held in Fukuoka These are supplemented by a general report presented at the same IACL Congress which includes a comparative analysis of the national and supranational reports The national contributors hail from around the globe including Africa 1 Asia 5 Europe 17 the European Union 1 and the Americas 5

Passing Wealth on Death Alexandra Braun, Anne Röthel, 2016-07-28 Wealth can be transferred on death in a number of different ways most commonly by will Yet a person can also use a variety of other means to benefit someone on death Examples include donations mortis causa joint tenancies trusts life insurance contracts and nominations in pension and retirement plans In the US these modes of transfer are grouped under the category of will substitutes and are generally treated as testamentary dispositions Much has been written about the effect of the use of will substitutes in the US but little is generally known about developments in other jurisdictions For the first time this collection of contributions looks at will substitutes from a comparative perspective It examines mechanisms that pass wealth on death across a number of common law civil law and mixed legal jurisdictions and explores the rationale behind their use It analyses them from different viewpoints including those of owners of businesses investors as well as creditors family members and dependants The aims of the volume are to show the complexity and dynamics of wealth transfers on death across jurisdictions to identify patterns between jurisdictions and to report the attitudes towards the different modes of transfer in light of their utility and the potential frictions they give rise to with policies and principles underpinning current laws

Police Forces: A Cultural History of an Institution Klaus Mladek, 2007-08-06 This collection focuses on the cultural history of the police as an institution from the sixteenth to the twentieth centuries Contrary to most studies on the
