Real World After Effects:

Creating Motion Graphics with After Effects Chris Meyer, Trish Meyer, 2013-02-11 After Effects CS5.5 Update tv adobe.com show after effects cs5.5 new creative techniques Chris and Trish Meyer have created a series of videos demonstrating how to use their favorite new and enhanced features in After Effects CS5.5. Virtually all of these videos use exercise files from *Creating Motion Graphics with After Effects 5th Edition* for CS5 as their starting point, extending the usefulness of this book for its owners. These videos may be viewed for free on AdobeTV. 5th Edition of best-selling After Effects book by renowned authors Trish and Chris Meyer covers the important updates in After Effects CS4 and CS5. Covers both essential and advanced techniques from basic layer manipulation and animation through keying, motion tracking, and color management. The downloadable resources are packed with project files for version CS5 source materials and nearly 200 pages of bonus chapters. Trish and Chris Meyer share over 17 years of hard-earned real-world film and video production experience inside this critically acclaimed text. More than a step-by-step review of the features in AE, readers will learn how the program thinks so that they can realize their own visions more quickly and efficiently. This full-color book is packed with tips, gotchas, and sage advice that will help users thrive no matter what projects they might encounter. *Creating Motion Graphics 5th Edition* has been thoroughly revised to reflect the new features introduced in both After Effects CS4 and CS5. New chapters cover the revolutionary new Roto Brush feature as well as Mocha and Mocha Shape. The 3D section has been expanded to include working with 3D effects such as Digieffects FreeForm plus workflows including Adobe Repoussé, Vanishing Point Exchange, and 3D model import using Adobe Photoshop Extended. The print version is also accompanied by downloadable resources that contain project files and source materials for all the techniques demonstrated in the book as well as nearly 200 pages of bonus chapters on subjects such as expressions, scripting, and effects. Subjects include Animation Techniques, Layer Management, Modes, Masks, and Mattes, Mastering 3D Space, Text Animation, Effects Painting, and Rotoscoping, Parenting, Nesting, and Collapsing, Color Management, and Video Essentials, Motion Tracking, and Keying, Working with Audio, Integrating with 3D Applications, Puppet Tools, Expressions, Exporting, and Rendering, and much more. **The After Effects Illusionist** Chad Perkins, 2013-04-26 Harness the full power of After Effects by mastering its native plug-in effects. Author Chad Perkins breaks down the creation and application of each native plug-in effect available in the After Effects toolset. He also shows you how each can be used optimally in your own media project when and why it makes sense to use each and how to break the rules by using effects in unconventional ways. Completely updated for CS6 and revised to include coverage of Keylight and the Cycore effects, you will learn every effect from color correction to distortion to simulation and all in between, putting the full power of After Effects in your hands. Included is instruction for using, among others, The 3D Camera Tracker, The Cycore effects, Matte tools including Keylight and Refine Matte, Color correction tools, A wide array of pattern-generating tools. The downloadable resources include project files allowing you to work hand-in-hand with

The VR Book Jason Jerald, 2015-09-01 This is a strong foundation of human centric virtual reality design for anyone and everyone involved in creating VR experiences Without a clear understanding of the human side of virtual reality VR the experience will always fail The VR Book bridges this gap by focusing on human centered design Creating compelling VR applications is an incredibly complex challenge When done well these experiences can be brilliant and pleasurable but when done badly they can result in frustration and sickness Whereas limitations of technology can cause bad VR execution problems are oftentimes caused by a lack of understanding human perception interaction design principles and real users This book focuses on the human elements of VR such as how users perceive and intuitively interact with various forms of reality causes of VR sickness creating useful and pleasing content and

how to design and iterate upon effective VR applications This book is not just for VR designers it is for managers programmers artists psychologists engineers students educators and user experience professionals It is for the entire VR team as everyone contributing should understand at least the basics of the many aspects of VR design The industry is rapidly evolving and The VR Book stresses the importance of building prototypes gathering feedback and using adjustable processes to efficiently iterate towards success It contains extensive details on the most important aspects of VR more than 600 applicable guidelines and over 300 additional references

High-Level Adaptation and Aftereffects Rocco

Palumbo,Stefania D'Ascenzo,Luca Tommasi,2017-04-28 Aftereffects generally occur after a prolonged exposure adaptation to a first stimulus possessing one given property followed by presentation of a stimulus bearing a neutral value of that property The aftereffect consists in a change in appearance of the neutral stimulus following the adapter compared to the appearance of the neutral stimulus when it is perceived without any previous exposure to the adapter The transient phenomena of perceptual aftereffects are believed to depend on the activation of neuron populations that respond selectively to a given property of the stimuli Studying how adaptation occurs which stimulus properties are sensitive to it which timings are necessary whether individual differences modulate its occurrence has thus become an indirect way to probe the plasticity of sensory functions in the nervous system recently extending to more cognitive and representational aspects of neural coding In the last two decades indeed it has been demonstrated that aftereffects occur not only for low level properties of stimuli such as motion color or orientation but also for high level properties Many studies have proven that high level proprieties of the stimuli e g gender identity ethnicity or age of a face or a voice are sensitive to this phenomenon It has been shown for example that the prolonged exposure to a female or male face produces a gender misperception in the opposite direction when an androgynous face is shown after the adapter Furthermore recent studies have also shown that aftereffects are not strictly contingent upon the physical features that make up stimuli but they seem to run across the high level proprieties subjects are adapted to These evidences are supported by cross category adaptation studies which underlie how aftereffects occur even across stimuli that do not share physical features e g bodies and faces but that instead share common higher level properties such as gender Given the growing body of research focused on adaptation and aftereffects in high level perception at the boundaries with perceptual learning attention and cognition the purpose of this topic is to provide a picture of the state of the art relative to the specific phenomena of adaptation in high level perceptual processing

Everything is Design: The Hidden Ethics of Our Objects and Public Spaces Alan J. Reid,2025-05-06 Ethics to put it concisely is mindful well being It is a set of standards that guides how we treat ourselves one another and the environment When we design things for public use we also communicate an ethical perspective When we use things designed for us we adopt their ethics This book synthesizes several different disciplines as they relate to design ethics and the built environment Our objects according to philosophers like Ihde Verbeek and Latour mediate our experiences with the world around us Through their designs and by

extension our perceived affordances we largely comply with what our objects and spaces want us to do At the micro level the phones in our pockets command our attentive processes in order to feed an attention economy At the macro level urban planning and infrastructure can both promote inclusivity and foment violence We are deeply intertwined with the objects and spaces that have been designed for us Baked into every object process system and environment are the remnants of the designer s morals ethics values and biases Importantly this book seeks to cultivate mindfulness of the reader s interactions with their surrounding world providing them with a line of inquiry that questions areas of unethical design in their built environment and offers useful critiques and new solutions to these ethical dilemmas We often have the power to reject those things that are irresponsibly designed and unethical in nature and it is through this agency as users that we can demand better from designers developers and companies It is imperative to understand our mediated relationships with the built environment that surrounds us and the objects within it this can help explain our behaviors and empower us to make ethical decisions that serve future generations Teaching and Learning on Screen Mark Readman,2016-11-09 What stories are told about teaching and learning on TV and in film And how do these stories reflect refract and construct myths anxieties and pleasures about teaching and learning This collection looks at how pedagogy is represented on screen and how TV programs and films translate pedagogic ideas into stories and relationships International in scope with case studies and analysis from the UK US Australia Turkey and Brazil the book adopts a critical stance in relation to the ways in which theories of learning and myths about education are mobilized on screen Teaching and Learning on Screen Mediated Pedagogies provides a stimulating addition to the field of media and cultural studies while also promoting debate about particular pedagogic models and strategies that will contribute to the professional development of educators and those involved in teacher education
