Real People Personal Identity Without Thought Experiments:

Real People Kathleen V. Wilkes, 1988 A study of the scope and limits of the concept of a person covering methodology of thought experimentation real life conditions such as infancy insanity and dementia and looking at different views of the person found in Homer Aristotle the post Cartesians and contemporary cognitive science

Locke on Personal Identity Galen Strawson, 2014-07-21 John Locke's theory of personal identity underlies all modern discussion of the nature of persons and selves yet it is widely thought to be wrong In this book Galen Strawson argues that in fact it is Locke's critics who are wrong and that the famous objections to his theory are invalid Indeed far from refuting Locke they illustrate his fundamental point Strawson argues that the root error is to take Locke's use of the word person as merely a term for a standard persisting thing like human being In actuality Locke uses person primarily as a forensic or legal term geared specifically to questions about praise and blame punishment and reward This point is familiar to some philosophers but its full consequences have not been worked out partly because of a further error about what Locke means by the word conscious When Locke claims that your personal identity is a matter of the actions that you are conscious of he means the actions that you experience as your own in some fundamental and immediate manner Clearly and vigorously argued this is an important contribution both to the history of philosophy and to the contemporary philosophy of personal identity

Reasons and Persons Derek Parfit, 1984-04-12 This book challenges with several powerful arguments some of our deepest beliefs about rationality morality and personal identity The author claims that we have a false view of our own nature that it is often rational to act against our own best interests that most of us have moral views that are directly self defeating and that when we consider future generations the conclusions will often be disturbing He concludes that moral non religious moral philosophy is a young subject with a promising but unpredictable future

The Human Animal Eric T. Olson, 1999-09-02 Most philosophers writing about personal identity in recent years claim that what it takes for us to persist through time is a matter of psychology In this groundbreaking new book Eric Olson argues that such approaches face daunting problems and he defends in their place a radically non psychological account of personal identity He defines human beings as biological organisms and claims that no psychological relation is either sufficient or necessary for an organism to persist Rejecting several famous thought experiments dealing with personal identity he instead argues that one could survive the destruction of all of one's psychological contents and capabilities as long as the human organism remains alive

Staying Alive Marya Schechtman, 2014-03-14 Judgments of personal identity stand at the heart of our daily transactions Family life friendships institutions of justice and systems of compensation all rely on our ability to reidentify people It is not as obvious as it might at first appear just how to express this relation between facts about personal identity and practical interests in a philosophical account of personal identity A natural thought is that whatever relation is proposed as the one which constitutes the sameness of a person must be important to us in just the way identity is This simple understanding of the connection between

personal identity and practical concerns has serious difficulties however One is that the relations that underlie our practical judgments do not seem suited to providing a metaphysical account of the basic literal continuation of an entity Another is that the practical interests we associate with identity are many and varied and it seems impossible that a single relation could simultaneously capture what is necessary and sufficient for all of them Staying Alive offers a new way of thinking about the relation between personal identity and practical interests which allows us to overcome these difficulties and to offer a view in which the most basic and literal facts about personal identity are inherently connected to practical concerns This account the Person Life View sees persons as unified loci of practical interaction and defines the identity of a person in terms of the unity of a characteristic kind of life made up of dynamic interactions among biological psychological and social attributes and functions mediated through social and cultural infrastructure

Personal Identity Ellen Frankel Paul, Fred Dycus Miller, Jeffrey Paul, 2005 What is a person What makes me the same person today that I was yesterday or will be tomorrow Philosophers have long pondered these questions In Plato's Symposium Socrates observed that all of us are constantly undergoing change we experience physical changes to our bodies as well as changes in our manners customs opinions desires pleasures pains and fears Aristotle theorized that there must be some underlying substratum that remains the same even as we undergo these changes John Locke rejected Aristotle's view and reformulated the problem of personal identity in his own way is a person a physical organism that persists through time or is a person identified by the persistence of psychological states by memory These essays written by prominent philosophers and legal and economic theorists offer valuable insights into the nature of personal identity and its implications for morality and public policy

Models of the Self Shaun Gallagher, Jonathan Shear, 1999 A comprehensive reader on the problem of the self as seen from the perspectives of philosophy development psychology robotics cognitive neuroscience psychopathology semiotics phenomenology and contemplative studies all focused on a keynote paper

Wittgenstein's Beetle and Other Classic Thought Experiments Martin Cohen, 2008-04-15 Wittgenstein's Beetle and Other Classic Thought Experiments invites readers to participate actively in discovering the surprisingly powerful and fruitful tradition of thought experiments Gives a lively presentation of an A to Z of 26 fascinating and influential thought experiments from philosophy and science Presents vivid and often humorous discussion of the experiments including strengths and weaknesses historical context and contemporary uses Provides a how to section for engaging in thought experiments Includes illustrations mini biographies and suggestions for further reading

Thought Experiment Tamar Szabo Gendler, 2014-01-14 This book offers a novel analysis of the widely used but ill understood technique of thought experiment The author argues that the powers and limits of this methodology can be traced to the fact that when the contemplation of an imaginary scenario brings us to new knowledge it does so by forcing us to make sense of exceptional cases

Thought Experiments Roy A. Sorensen, 1992 This text analyses a variety of thought experiments and explores what they are how they work and what their positive and negative aspects are It also sets the

theory within an evolutionary framework of advances in experimental psychology

The Analytic Imaginary Marguerite La Caze, 2018-09-05 The notion of the philosophical imaginary developed by Michel Le Doeuff refers to the capacity to imagine as well as to the stock of images philosophers employ Making use of this notion Marguerite La Caze explores the idea of the imaginary of analytic philosophy Noting the marked tendency of analytic philosophy to be unselfconscious about the use of figurative language and the levels at which it works La Caze shows how analytic images can work to define the parameters of debates and exclude differing approaches including feminist ones La Caze focuses on five influential types of images in five central areas of contemporary analytic philosophy analogies and how they are used in the abortion debates thought experiments in personal identity the myth of the social contract Thomas Nagel's use of visual and spatial metaphors in epistemology and Kendall Walton's use of children's games as a foundational model in aesthetics The author shows how the image promotes assumptions and conceals tensions in philosophical works how the image persuades and how it limits debate and excludes ideas In providing an analysis of and reflection on the nature of the analytic imaginary La Caze suggests that a more open ended and reflexive approach can result in richer more fruitful philosophical work

First, Second, and Other Selves Jennifer Whiting, 2016 In her essay collection *First Second and Other Selves: Essays on Friendship and Personal Identity* well known scholar of ancient philosophy Jennifer Whiting gathers her previously published essays taking Aristotle's theories on friendship as a springboard to engage with contemporary philosophical work on personal identity and moral psychology Whiting examines three themes throughout the collection the first being psychic contingency or the belief that the psychological structures characteristic of human beings may in fact vary not just from one cultural or socio historical context to another but also from one individual to another The second theme is the belief that friendship informs an understanding of the nature of the self an idea that springs from Whiting's uncommon reading of Aristotle's writings on friendship Specifically Whiting explains a scenario in which a virtuous agent adopts a kind of impersonal attitude both towards herself and towards her character friends loving both because they are virtuous this scenario ties in with an examination of the Aristotelian concept of the ideal friend as an other self or a friendship that evolves from character rather than ego as well as Whiting's meditation on whether or not a virtuous individual should have a special sort of concern for her own future self distinct in kind from the concern that she has for others The third theme is that of rational egoism a concept that Whiting critiques especially in the context of Aristotle's eudaimonism The central tenet of the collection is the message that taking ethocentric or character based attitudes both towards ourselves and towards our friends sheds light on the nature of personal identity and helps to combat ethnocentric and other objectionable forms of bias a message that is becoming increasingly urgent in light of the recent deaths of Trayvon Martin and Michael Brown

Derek Parfit's Reasons and Persons Andrea Sauchelli, 2020-02-12 Derek Parfit 1942-2017 is widely considered to be one of the most important moral philosophers of the twentieth century *Reasons and Persons* is arguably the most influential of the two books published in his

lifetime and hailed as a classic work of ethics and personal identity Derek Parfit's *Reasons and Persons* An Introduction and Critical Inquiry is an outstanding introduction to and assessment of Parfit's book with chapters by leading scholars of ethics metaphysics and of Parfit's work Part I provides a much needed introduction to key topics and themes in *Reasons and Persons* that will be useful for those new to Parfit's complex work These include Parfit's idea of self defeating theories rationality and time personal identity future generations and well being Part II explores various debates generated by *Reasons and Persons* including its connections with Buddhism metaethics theory of rationality transformative choices and further developments in personal identity and metaphysics such as conativism Combining clear exposition of the major topics and arguments in *Reasons and Persons* with scholarly perspectives on more advanced themes this book is ideal for students of ethics metaethics metaphysics and anyone interested in Derek Parfit's philosophy

Persons — What Philosophers Say about You Warren Bourgeois, 2006-01-01 Can a person suffer radical change and still be the same person Are there human beings who are not persons at all Western philosophers from the ancient Greeks to contemporary thinkers gave the concept of person great importance in their discussions They saw it as crucial to our understanding of our world and our place in it Prompted by tragedy a loved one's descent into dementia Warren Bourgeois explored Western philosophical ideas to discover what constitutes a person The first edition of *Persons What Philosophers Say About You* was the result of his search This new second edition focuses on making this material easily available and accessible to students and has been redesigned as an introduction to the philosophy of mind and its history concentrating on the central concept of person in contemporary controversies concerning abortion euthanasia genetic engineering and human rights Bourgeois has mined Western philosophy for ideas students can apply today as technology challenges their beliefs about what we are He then uses the concept of person to unite the various subdivisions of philosophy applying theories of knowledge reality and value to help students understand what we believe about ourselves The result is a living philosophy and an introductory text with a difference While the ideas of the great philosophers cannot be meaningfully summarized in one introductory text this book provides a comparison of what many of them say about the concept of person and will encourage students to read further

The Broadview Introduction to Philosophy: Concise Edition Andrew Bailey, 2024-01-18 The concise edition of *The Broadview Introduction to Philosophy* offers 44 historical and contemporary readings on core topics in Western philosophy including philosophy of religion theories of knowledge metaphysics ethics social political philosophy and issues of life death and happiness Unlike other introductory anthologies the Broadview offers considerable apparatus to assist the student reader in understanding the texts without simply summarizing them Each selection includes an introduction discussing the context and structure of the primary reading as well as thorough annotations designed to clarify unfamiliar terms references and argument forms Canonical texts from the history of philosophy are presented alongside contemporary scholarship women authors are included throughout

Self and Subjectivity Kim Atkins, 2008-04-15 *Self and Subjectivity* is a collection

of seminal essays with commentary that traces the development of conceptions of self and subjectivity in European and Anglo American philosophical traditions including feminist scholarship from Descartes to the present

Information Systems and Qualitative Research Allen Lee, Jonathon Liebenau, Janice I. DeGross, 2013-06-05 This book contains the papers presented and discussed at the conference that was held in May June 1997 in Philadelphia Pennsylvania USA and that was sponsored by Working Group 8 2 of the International Federation for Information Processing IFIP established 8 2 as a group concerned with the interaction of information systems and the organization Information Systems and Qualitative Research is essential reading for professionals and students working in information systems in a business environment such as systems analysts developers and designers data administrators and senior executives in all business areas that use information technology as well as consultants in the fields of information systems management and quality management

Identity, Personal Identity and the Self John Perry, 2002-06-15 This volume collects a number of Perry's classic works on personal identity as well as four new pieces The Two Faces of Identity Persons and Information Self Notions and The Self and The Sense of Identity Perry's Introduction puts his own work and that of others on the issues of identity and personal identity in the context of philosophical studies of mind and language over the past thirty years

Controversies and the Metaphysics of Mind Yaron M. Senderowicz, 2010 Since ancient times metaphysical theories have been shaped by the dialectical relations between metaphysical positions The present book offers a new account of the role of controversies in the evolution of ideas in current metaphysics of mind Part One develops a pragmatic theory of metaphysical controversies that combines Kantian themes and themes from current argumentation theory The theory developed in this book underscores the role of a unique type of dialectical arguments which establish metaphysical positions as controversial relevant alternatives in the evolution of chains of debates in metaphysics In Part Two and Part Three this theory is applied to chains of debates in present day metaphysics of mind which address the problems of consciousness and personal identity One of the contentions defended in this book is that the intellectual history of metaphysics is not a process in which positions are replaced by opposite positions but rather a history of their status as relevant alternatives The book analyzes in detail and demonstrates how progress in contemporary metaphysics of mind consists in a dialectical process through which challenges to extant positions lead to innovative alternatives that are intrinsically relevant to advancing the understanding of the issues under discussion

Practical Identity and Narrative Agency Kim Atkins, Catriona Mackenzie, 2013-05-13 The essays collected in this volume address a range of issues that arise when the focus of philosophical reflection on identity is shifted from metaphysical to practical and evaluative concerns They also explore the usefulness of the notion of narrative for articulating and responding to these issues The chapters written by an outstanding roster of international scholars address a range of complex philosophical issues concerning the relationship between practical and metaphysical identity the embodied dimensions of the first personal perspective the kind of reflexive agency involved in the self constitution of one's practical

identity the relationship between practical identity and normativity and the temporal dimensions of identity and selfhood In addressing these issues contributors engage with debates in the literatures on personal identity phenomenology moral psychology action theory normative ethical theory and feminist philosophy
