Making Public Transport Work P.M. Bunting,2004-03-04 People have always traveled but over the last century there has been an unprecedented increase in mobility Hundreds of millions commute daily between home and work relying more and more on cars and less on urban and intercity public transport Faced with environmental concerns and the negative cultural and social effects of urban sprawl governments and other agencies have attempted to reverse the decline in public transport use In *Making Public Transportation Work* P M Bunting examines why problems have arisen and how they might be corrected Bunting shows that transportation providers have failed to identify target customers and have not organized these services efficiently He demonstrates that public transport providers must address organizational issues and define customer needs and preferences arguing that customer needs can best be served by private rather than public carriers offering door to door rather than station to station transportation In contrast public agencies can best support public transportation by addressing not direct delivery of services but such matters as equitable safety and environmental regulation and effective fair management of roads

The Geography of Transport Systems Jean-Paul Rodrigue,Claude Comtois,Brian Slack,2013-07-18 Mobility is fundamental to economic and social activities such as commuting manufacturing or supplying energy Each movement has an origin a potential set of intermediate locations a destination and a nature which is linked with geographical attributes Transport systems composed of infrastructures modes and terminals are so embedded in the socio economic life of individuals institutions and corporations that they are often invisible to the consumer This is paradoxical as the perceived invisibility of transportation is derived from its efficiency Understanding how mobility is linked with geography is main the purpose of this book The third edition of *The Geography of Transport Systems* has been revised and updated to provide an overview of the spatial aspects of transportation This text provides greater discussion of security energy green logistics as well as new and
