E. Verhagen,2022-09-05 There are no legal institutions other than pignus and hypotheca i e mortgage where the formative effect of legal practice can be so clearly observed Security and Credit in Roman Law outlines the legal history of these institutions in terms of an iterative relationship between transactional lawyers drafting legal transactions and Roman jurisprudence deploying its analytical skills in order to accommodate new transactional practices into the Roman legal system The evolution of the Roman law of real security well known through the legal sources Justinian s Digest and Code is reconstructed while matching it with actual banking practices in particular the secured lending transactions documented in the archive of the Sulpicii In the late classical period the imperial chancery increasingly interfered with it in order to provide a considerable degree of protection to debtors The largely but certainly not completely spontaneous evolution of Roman law produced a law of secured transactions which was highly sophisticated and versatile allowing non possessory security multiple charges pledges of receivables antichretic pledges and even floating charges over a dynamic fund of assets Since legal systems often adapt in reaction to impulses from their economic environment the complexity of the Roman law of real security indicates that pignus and hypotheca did play a significant role in the Roman economy It will be shown that this role was generally a positive one Its main weaknesses were lack of publicity and the presence of fiscal charges even these weaknesses did not undermine the effectiveness of secured transactions Assessing energy and security issues in Central Asia United States. inherent combination of law enforcement and people centred humanitarianism has strived to provide an umbrella to both protect people from threats while empowering them to control their destinies But with accelerating economic globalization and information flows there is a need to revisit the concept A new paradigm of Sustainable Human Security is required This book argues that proponents of a human security approach should welcome efforts to remove the barriers between enterprise corporations aid and development agencies government agencies citizen groups and the UN and work towards multi stakeholder approaches and solutions for vulnerable populations Such an approach is clearly vital in responding to the imperatives of concerted action on issues such as climate change HIV terrorism organised crime and poverty The agenda may have changed but it remains true that almost all human tragedies are avoidable This book examines a number of global problems through the lens of human security and the needs of the individual global governance health the environment and the exploitation of natural resources peace and reconciliation the responsibility to protect and economic development and prosperity In the latter case the role of business in the human security pantheon is promulgated There are many reasons why businesses may want to engage with the needs of vulnerable populations not least the fact that companies cannot function without secure trading environments In addition there are growing demands for corporate responsibility and citizenship from markets customers shareholders employees and critically communities This book throws new light on the human security agenda It will be essential reading for anyone involved in the debates on human security as well as for practitioners and scholars in international affairs global governance peace studies climate change and the environment healthcare responsibility to protect and corporate responsibility   Improving Homeland Security Decisions Ali E.
