

# WHAT IS REALISM?

**Realism** is an artistic and literary movement that emerged in the 19th century. It sought to represent reality truthfully and accurately, focusing on everyday life and ordinary people.

**Realism** rejected idealized depictions of the world and emphasized observation and direct experience. The movement aimed to portray society and human experience without romanticism or exaggeration, and often dealt with themes such as social injustice, poverty, and working-class life.

**Realism** had a significant impact on literature, painting, and other art forms, and remains an influential approach to storytelling and representation today.

## **Realism And Reality:**

Realism and Reality Meenakshi Mukherjee, 1994 Extract from review Mukherjee's book is valuable as an original insightful commentary upon the Indian regional novel. Further, it suggests a methodology for examining the means by which other derivative literatures within the colonized world reconciled the demands of western realism with the representation of indigenous realities. *Modern Fiction Studies*

Realism and 'reality' in Film and Media Anne Jerslev, 2002 The 2002 theme of *Northern Lights* is dedicated to the representation of reality in film, TV, and new media, a question of new importance in modern film and media where a new wave of realism has dominated cinema and reality TV became a mass phenomenon on both TV and the internet. Eleven articles by Danish, British, and American film and media researchers focus on two sub-themes: Film and Realism deals theoretically with film realism and analyses classic films and modern Danish Dogma films; Documentary Forms Reality TV and New Media treats new forms of non-fiction film, TV, and on the internet in a both theoretical and historical perspective.

**Hermeneutic Realism** Dimitri Ginev, 2016-08-24 This study recapitulates basic developments in the tradition of hermeneutic and phenomenological studies of science. It focuses on the ways in which scientific research is committed to the universe of interpretative phenomena. It treats scientific research by addressing its characteristic hermeneutic situations and uses the following basic argument in this treatment: By demonstrating that science's epistemological identity is not to be spelled out in terms of objectivism, mathematical essentialism, representationalism, and foundationalism, one undermines scientism without succumbing scientific research to procedures of normative democratic control that threaten science's cognitive autonomy. The study shows that in contrast to social constructivism, hermeneutic phenomenology of scientific research makes the case that overcoming scientism does not imply restrictive policies regarding the constitution of scientific objects.

**A Companion to Reality Television** Laurie Ouellette, 2016-12-19 International in scope and more comprehensive than existing collections, *A Companion to Reality Television* presents a complete guide to the study of reality, factual, and nonfiction television entertainment encompassing a wide range of formats and incorporating cutting edge work in critical social and political theory. Original in bringing cutting edge work in critical social and political theory into the conversation about reality TV, it consolidates the latest broadest range of scholarship on the politics of reality television and its vexed relationship to culture, society, identity, democracy, and ordinary people in the media. Includes primetime reality entertainment as well as precursors such as daytime talk shows in the scope of discussion. Contributions from a list of international leading scholars in this field.

Manifest Reality Lucy Allais, 2015-09-03 At the heart of Immanuel Kant's critical philosophy is an epistemological and metaphysical position he calls transcendental idealism. The aim of this book is to understand this position. Despite the centrality of transcendental idealism in Kant's thinking in over two hundred years since the publication of the first *Critique*, there is still no agreement on how to interpret the position or even on whether and in what sense it is a metaphysical position. Lucy Allais argues that Kant's distinction between things in

themselves and things as they appear to us has both epistemological and metaphysical components He is committed to a genuine idealism about things as they appear to us but this is not a phenomenalist idealism He is committed to the claim that there is an aspect of reality that grounds mind dependent spatio temporal objects and which we cannot cognize but he does not assert the existence of distinct non spatio temporal objects A central part of Allais's reading involves paying detailed attention to Kant's notion of intuition and its role in cognition She understands Kantian intuitions as representations that give us acquaintance with the objects of thought Kant's idealism can be understood as limiting empirical reality to that with which we can have acquaintance He thinks that this empirical reality is mind dependent in the sense that it is not experience transcendent rather than holding that it exists literally in our minds Reading intuition in this way enables us to make sense of Kant's central argument for his idealism in the Transcendental Aesthetic and to see why he takes the complete idealist position to be established there This shows that reading a central part of his argument in the Transcendental Deduction as epistemological is compatible with a metaphysical idealist reading of transcendental idealism

*Reality: a Journal for Philosophical Discourse* Daniel Wagner, James Capehart, Brian Kemple, Matthew Miner, Kirk Kanzelberger, Michael Dodds, Francisco Plaza, Brian Jones, Reality Journal, 2020-03 This first issue of REALITY The Philosophy of Realism like most publications and especially those of a collaborative effort signifies innumerable hours of effort The goal of our journal is simple to reinvigorate an intelligent discussion about realism as a philosophical approach By a realist approach we mean not simply as pertains to theories of knowledge but rather a kind of thinking that perfuses itself throughout all philosophical inquiries all questions of truth of meaning and purpose of good of human action the political the physical and the metaphysical of thought and thing and anything else about which one might ask What does this mean To clarify this pursuit of reality and expound on its importance our first issue asks the question what is realism It is an important question not simply for our purposes here but for philosophy as a whole and thus an important question for all human beings Without maintenance of a sound answer which must be sustained dialogically philosophy wilts into one or another sophistical theory that begins by denying some aspect of the real and a small error in the beginning becomes great in the end

**Reality TV** Anita Biressi, Heather Nunn, 2005-02-04 This book analyses new and hybrid genres of television including observational documentaries talk shows game shows docu soaps dramatic reconstructions law and order programming and 24/7 formats such as Big Brother and Survivor

**Chasing Reality** Mario Bunge, 2014 Chasing Reality deals with the controversies over the reality of the external world Distinguished philosopher Mario Bunge offers an extended defence of realism a critique of various forms of contemporary anti realism and a sketch of his own version of realism namely hylorealism Bunge examines the main varieties of antirealism Berkeley's Hume's and Kant's positivism phenomenology and constructivism and argues that all of these in fact hinder scientific research Bunge's realist contention is that genuine explanations in the sciences appeal to causal laws and mechanisms that are not directly observable rather than simply to

empirical generalisations Genuine science in his view is objective even when it deals with subjective phenomena such as feelings of fear This work defends a realist view of universals kinds possibilities and dispositions while rejecting contemporary accounts of these that are couched in terms of modal logic and possible worlds

**Degenerative Realism** Christy Wampole, 2020 A new strain of realism has emerged in France The novels that embody it represent diverse fears immigration and demographic change radical Islam feminism new technologies globalization American capitalism and the European Union but these books often best sellers share crucial affinities In their dystopian visions the collapse of France Europe and Western civilization is portrayed as all but certain and the literary mode of realism begins to break down Above all they depict a degenerative force whose effects on the nation and on reality itself can be felt Examining key novels by Michel Houellebecq Fr d ric Beigbeder Aur lien Bellanger Yann Moix and other French writers Christy Wampole identifies and critiques this emergent tendency toward degenerative realism She considers the ways these writers draw on social science the New Journalism of the 1960s political pamphlets reportage and social media to construct an atmosphere of disintegration and decline Wampole maps how degenerative realist novels explore a world contaminated by conspiracy theories mysticism and misinformation responding to the internet age s confusion between fact and fiction with a lament for the loss of the real and an unrelenting emphasis on the role of the media in crafting reality In a time of widespread populist anxieties over the perceived decline of the French nation this book diagnoses the literary symptoms of today s reactionary revival

**Reality Without Realism** Arkady Plotnitsky, 2021 This book presents quantum theory as a theory based on new relationships among matter thought and experimental technology as against those previously found in physics relationships that also redefine those between mathematics and physics in quantum theory The argument of the book is based on its title concept reality without realism RWR and in the corresponding view the RWR view of quantum theory The book considers from this perspective the thinking of Bohr Heisenberg Schr dinger and Dirac with the aim of bringing together the philosophy and history of quantum theory With quantum theory the book argues the architecture of thought in theoretical physics was radically changed by the irreducible role of experimental technology in the constitution of physical phenomena accordingly no longer defined independently by matter alone as they were in classical physics or relativity Or so it appeared For quantum theory the book further argues made us realize that experimental technology beginning with that of our bodies irreducibly shapes all physical phenomena and thus makes us rethink the relationships among matter thought and technology in all of physics

**The Lime Twig** John Hawkes, 1961 But it would be unfair to the reader to reveal what happens when a gang of professional crooks gets wind of the scheme and moves to muscle in on this bettors dream of a long odds situation Worked out with all the meticulous detail terror and suspense of a nightmare the tale is on one level comparable to a Graham Greene thriller on another it explores a group of people their relationships fears and loves For as Leslie A Fiedler says in his introduction John Hawkes makes terror rather than love the center of his work knowing all the while of course that there can

be no terror without the hope for love and love's defeat      *Contact with Reality* Esther Lightcap Meek, 2017

Is knowledge discovered or just invented Can we ever get outside ourselves to know how reality is in itself independent of us Philosophical realism raises the question whether in our knowing we connect with an independent reality or only connect with our own mental constructs Far from being a silly parlor game the question impacts our lives concretely and deeply Modern Western culture has been infected with antirealism and the doubt skepticism subjectivism relativism and atheism that attends it not to mention distrust and arbitrary mis use of reality Premier scientist turned philosopher Michael Polanyi stepped aside from research to offer an innovative account of knowing that takes its cue from how discovery actually happens Polanyi defied the antirealism of the twentieth century sounding a ringing note of hope in his repeated claim that in discovery we know we have made contact with reality because we have a sense of the possibility of indeterminate future manifestations And that sense marks contact with reality because it is the way reality is abundant generous and fraught with as yet unnameable possibilities This book examines that distinctive claim contrasting it to the wider philosophical discussions regarding realism and antirealism in the recent decades It shows why Polanyi's outlook is superior and why that matters not just to scientific discoverers but to us all In this lively book Esther Lightcap Meek does more than simply make a compelling case for Polanyi's realism in the context of dominant epistemologies and philosophies of science she also brings out a beautiful dimension of Polanyi's thought that is not often seen deepening its metaphysical underpinnings through creative engagement with contemporary thinkers This book makes a much needed contribution to the reception of Polanyi and offers a fresh new way to think about reason more generally D C Schindler Associate Professor of Metaphysics and Anthropology Pontifical John Paul II Institute Washington DC Justifiably renowned for her previous explorations of the knowing process Meek here guides us expertly through Michael Polanyi's epistemology and commends to us a renewed and humble appreciation of the generosity of reality itself In an era of post truth and alternative facts this account of how we may discover what is real is very welcome indeed Murray Rae Professor Department of Theology and Religion University of Otago New Zealand In this inspiring work Meek brings us back to the most fundamental point of all the natural trust and communion with reality that lies at the heart of humanness This book is a philosophical celebration of that relation in the idiom of Michael Polanyi and all who are drawn to this topic will find it a compelling read Oliver Davies Professor of Christian Doctrine King's College London Meek's fans will welcome this extension of her covenant epistemology to the metaphysics of realism in careful conversation with contemporary philosophy Polanyi's claim that knowing always bears indeterminate future manifestations is her theme and it reaches an exciting climax in her comparison of Polanyi with Catholic thinkers Schindler and von Balthasar This is an original important contribution to preserving Mystery and furthering hope in the modern age and deserves the widest readership Take and read David Rutledge Pitts Professor Emeritus of Religion Furman University Past President The Polanyi Society Esther Lightcap Meek is Professor of Philosophy at Geneva College Her other books include *Longing to Know* *The Philosophy*

Refusing the path of metaphysical realism which would make reality an object of speculation in itself independent of any reflection on our ways of approaching it or thinking about it Benoit defends the idea of an intentionality placed in reality contextualized Intentionality is an essential part of any realist philosophical position Benoit's innovation is to insist on looking to context to develop a renewed realism that draws conclusions from contemporary philosophy of language and applies them methodically to issues in the fields of metaphysics and the philosophy of the mind What there is the traditional subject of metaphysics can be determined only in context Benoit offers a sharp criticism of acontextual ontology and acontextual approaches to the mind and reality At the same time he opposes postmodern anti realism and the semantic approach characteristic of classic analytic philosophy Instead *Toward a Contextual Realism* bridges the analytic continental divide while providing the foundation for a radically contextualist philosophy of mind and metaphysics To be is to be in a context

Virtual Realism Michael Heim, 2000-04-13 Virtual reality has introduced what is literally a new dimension of reality to daily life But it is not without controversy Indeed some say that a collision is inevitable between those passionately involved in the computer industry and those increasingly alienated from and often replaced by its applications Opinions range from the cyberpunk attitude of *Wired* magazine and Bill Gates's commercial optimism to the violent opposition of the Unabomber Now with *Virtual Realism* readers have a thought provoking guide to the cyberspace backlash debate and the implications of cyberspace for our culture Michael Heim offers a comprehensive introduction to virtual reality and a provocative commentary on its present and future impact on our lives Heim describes the fascinating and important industrial and military uses of virtual reality as well as its artistic and entertainment applications He argues that we must balance the idealist's enthusiasm for computerized life with the need to ground ourselves more deeply in primary reality This uneasy balance he calls virtual realism
