Realist Evaluation in Practice Libby Kalucy, 2004

Culturally Responsive Approaches to Evaluation Jill Anne Chouinard, Fiona Cram, 2019-09-27 Evaluators have always worked in diverse communities and the programs they evaluate are designed to address often intractable socio political and economic issues Evaluations that explicitly aim to be more responsive to culture and cultural context are however a more recent phenomenon In this book Jill Anne Chouinard and Fiona Cram utilize a conceptual framework that foregrounds culture in social inquiry and then uses that framework to analyze empirical studies across three distinct cultural domains of evaluation practice Western Indigenous and international development Culturally Responsive Approaches to Evaluation provide a comparative analysis of these studies and discuss lessons drawn from them in order to help evaluators extend their current thinking and practice They conclude with an agenda for future research

Evidence-Based Policy Ray Pawson, 2006-04-07 In this important new book Ray Pawson examines the recent spread of evidence based policy making across the Western world Few major public initiatives are mounted these days in the absence of a sustained attempt to evaluate them Programmes are tried tried and tried again and researched researched and researched again And yet it is often difficult to know which interventions and which inquiries will withstand the test of time The evident solution going by the name of evidence based policy is to take the longer view Rather than relying on one off studies it is wiser to look to the weight of evidence Accordingly it is now widely agreed the most useful data to support policy decisions will be culled from systematic reviews of all the existing research in particular policy domains This is the consensual starting point for Ray Pawson's latest foray into the world of evaluative research But this is social science after all and harmony prevails only in the first chapter Thereafter Pawson presents a devastating critique of the dominant approach to

systematic review namely the meta analytic approach as sponsored by the Cochrane and Campbell collaborations In its place is commended an approach that he terms realist synthesis On this vision the real purpose of systematic review is better to understand programme theory so that policies can be properly targeted and developed to counter an ever changing landscape of social problems The book will be essential reading for all those who loved or loathed the arguments developed in *Realistic Evaluation* Sage 1997 It offers a complete blueprint for research synthesis supported by detailed illustrations and worked examples from across the policy waterfront It will be of especial interest to policy makers practitioners researchers and students working in health education employment social care criminal justice regeneration and welfare

[Program Evaluation Theory and Practice](#) Donna M. Mertens, Amy T. Wilson, 2012-02-20 This engaging text takes an evenhanded approach to major theoretical paradigms in evaluation and builds a bridge from them to evaluation practice. Featuring helpful checklists, procedural steps, provocative questions that invite readers to explore their own theoretical assumptions, and practical exercises, the book provides concrete guidance for conducting large and small scale evaluations. Numerous sample studies, many with reflective commentary from the evaluators, reveal the process through which an evaluator incorporates a paradigm into an actual research project. The book shows how theory informs methodological choices, the specifics of planning, implementing, and using evaluations. It offers balanced coverage of quantitative, qualitative, and mixed methods approaches. Useful pedagogical features include: Examples of large and small scale evaluations from multiple disciplines; Beginning of chapter reflection questions that set the stage for the material covered; Extending your thinking questions and practical activities that help readers apply particular theoretical paradigms in their own evaluation projects; Relevant Web links including pathways to more details about sampling, data collection, and analysis; Boxes offering a closer look at key evaluation concepts and additional studies; Checklists for readers to determine if they have followed recommended practice. Shadish, 1997-01-28 *Evaluation for the 21st Century* features thoughtfully written introductions to each of the main sections that provide a context and synthesis of the various evaluators' chapters. After reading this groundbreaking book, researchers and practitioners will be able to recognize these new developments in evaluation as they encounter them, place them in context, and incorporate them into their own evaluation professions and practices. **Theory-Driven Evaluations** Huey T. Chen, 1990-01-01 With the publication of *Theory-Driven Evaluations*, Huey Tsyh Chen has given us an ambitious volume. Indeed, it is the aspiration of this book to provide a conceptual framework that integrates the diverse approaches and paradigms of evaluation. For those of us accustomed to the rhetoric of the paradigm wars that have been raging in recent years, it is refreshing to find a text that works so assiduously at reconciliation. There is much that is useful in Chen's analysis. He gives us a full and thoughtful book that attempts no less than the construction of a conceptual framework for all of program evaluation. It provides an impressive compendium of source material and references spanning not only evaluation but related work in economics and public policy; this alone is worth the price of the book. Chen's *Theory-Driven Evaluations* provides a stimulating, even heroic, attempt to bring some conceptual integration to a field that has been too long dominated by methodological paradigms and procedural particulars. a prepublication review for *Evaluation and Program Planning*

Generous use of examples which are well selected and lucidly summarized Contemporary Sociology Chen introduces a new comprehensive framework for program evaluation that is designed to bridge the gap between method and theory oriented perspectives For program planners decision makers scholars and students this volume clarifies illuminates and provides unique insights into the conception construction and implementation of a wide range of programs The research examples used in the discussion draw upon various areas such as education welfare health criminal justice job training and family construction to attract a wider audience Journal of Applied Rehabilitation Counseling Program evaluation has traditionally emphasized the application of social science research methods in evaluation activities However there is a growing awareness that program theory is vital for broadening the scope and enhancing the usefulness of program evaluation In Theory Driven Evaluations Huey Tsyh Chen introduces a new comprehensive framework for program evaluation that is designed to bridge the gap between the method and theory oriented perspectives He provides an intensive discussion of the nature and functions of program theory approaches to constructing program theories and the integration of program theory with evaluation processes Specific types of theory driven evaluations as well as principles and guidelines for application are developed for meeting different policy purposes Application of systematic strategies is illustrated by concrete examples from a variety of evaluation studies in different fields The presentation of this new perspective directly addresses the needs and concerns in both the professional and applied areas of program evaluation For program planners decisionmakers scholars and students this volume will clarify illuminate and provide unique insights into the conception construction and implementation of a wide range of programs **Agency-Based Program Evaluation** Stephen A. Kapp,Gary R.

Encyclopedia of Evaluation Sandra Mathison,2005 All humans are nascent evaluators Evaluation has been with us throughout history and in its modern form has moved from the margins to the centers of organizations agencies educational institutions and corporate boardrooms No longer a specialized part time activity evaluation has become institutionalized a common practice and indeed an important commodity in political and social life The Encyclopedia of Evaluation is an authoritative first of its kind who what where why and how of the field of evaluation Covering professional practice as well as academia this volume chronicles the development of the field its history key figures theories approaches and goals From the leading publisher in the field of evaluation this work is a must have for all social science libraries departments that offer courses in evaluation and students and professional evaluators around the world The entries in this Encyclopedia capture the essence of evaluation as a practice methods techniques roles people as a profession professional obligations shared knowledge ethical imperatives events places and as a discipline theories and models of evaluation ontological and epistemological issues International Scope Despite the fact that evaluation practice is not institutionalized in the same way around the world the encyclopedia recognizes the international growth of the profession due in large part to organizations such as UNICEF the World Bank and USAID Entries cover the following Afghanistan Belgium Cambodia Ethiopia Germany Greece Guyana Israel Netherlands Niger Scotland South Africa Spain and Uganda In addition the international group of authors includes contributions from more than a dozen nations There are a number of stories about evaluation practice

around the world that are set off as sidebars in the text. These stories provide a glimpse into the nature of evaluation practice in a diverse set of circumstances, delineate the common and uncommon issues for evaluators around the world, and point to the complexities of importing evaluation from one culture to another.

Interdisciplinary Methodological Coverage Much of the practice of evaluation has grown out of the social science research tradition. While psychological methods and psychometrics continue to be useful, evaluation research today draws from a wide range of disciplines, including anthropology, education, political science, literary criticism, systems theory, and others. This Encyclopedia covers all of the relevant methodologies, including both qualitative and quantitative approaches.

Evaluators and Theories The Encyclopedia of Evaluation includes significant coverage of the major figures in the field throughout its history. Many of these figures are well known for a particular theory or approach, and whenever applicable, the entries make this connection for the reader, as well as provide references for further reading. Good examples include Michael Quinn Patton and *Utilization-Focused Evaluation*; David Fetterman and *Empowerment Evaluation*; Daniel Stufflebeam's *CIPP Model of Evaluation*; and Huey Chen and *Theory-Driven Evaluations*.
