Social Construction in Context Kenneth J Gergen, 2001-04-03 This latest book by one of the world's leading protagonists in the field will be welcomed not just by psychologists but by students, academics, and professionals interested in social constructionism across a wide range of subjects. *Social Construction in Context* explores the potentials of social constructionist theory when placed in diverse intellectual and practical contexts. It demonstrates the achievements of social constructionism and what it can now offer various fields of inquiry, both academic, professional, and applied, given the proliferation of the theory across the social sciences and humanities. First-order issues of concern within the academic world: objectivity, truth, power, and ideology are now being augmented by widespread developments in practice: therapeutic, pedagogical, organizational, and political. This book looks closely at these developments and examines both the positive potentials and limitations of social constructionist theory when applied to a variety of domains. It has been written in an accessible and scholarly manner, making it suitable for a wide-ranging readership.

An Invitation to Social Construction Kenneth J Gergen, 2022-12-02 This fully updated fourth edition of Gergen's *An Invitation to Social Construction* introduces you to a key theoretical movement in contemporary social science through a wide range of multidisciplinary examples. This book brings

together complex theories that inform and critically build upon social constructionism such as narratology deconstruction dialogism positivism and post structuralism in a way that is accessible for students and researchers alike It is a vital resource for those studying social psychology and critical social psychology who are looking for a comprehensive guide to one of the core topics in the field Kenneth J Gergen is Senior Research Professor in Psychology at Swarthmore College and the President of the Taos Institute Social constructionism and theology [electronic resource] Chris A. M. Hermans,2002 Practical theology starts its theological reflections from practices aims at analyzing empirically practices and is directed towards the transformation of these practices From this practice orientation there is a strong connection between practical theology and the social sciences Social constructionism is a growing theory within the social sciences This volume offers a theological and social scientific reflection on this emerging concept of social constructionism **Social Constructionism** Andy Lock,Tom Strong,2010-03-25 Social Constructionism Sources and Stirrings in Theory and Practice offers an introduction to the different theorists and schools of thought that have contributed to the development of contemporary social constructionist ideas charting a course through the ideas that underpin the discipline From the New Science of Vico in the 18th century through to Marxist writers ethnomethodologists and Wittgenstein ideas as to how socio cultural processes provide the resources that make us human are traced to the present day Despite constructionists often being criticised as relativists activists and anti establishment and for making no concrete contributions their ideas are now being adopted by practically oriented disciplines such as management consultancy advertising therapy education and nursing Andy Lock and Tom Strong aim to provoke a wider grasp of an alternative history and tradition that has developed alongside the one emphasised in traditional histories of the social sciences Relational Responsibility Sheila McNamee,Kenneth J. Gergen,1999 Questioning the tradition of individual responsibility this pioneering book also transforms the concept of responsibility by giving centre stage to the relational process rather than to the individual replacing alienation and isolation with meaningful dialogue The first three chapters are the editors own contribution on relational responsibility followed by their analysis of a challenging case study involving the issue of child sexual abuse The next 14 chapters contain responses from leading academics and professionals in the fields of communication psychology and organizational development which extend the editors original dialogue In conclusion Sheila McNamee and Kenneth Gergen illustrate relational responsi The Provoked Economy Fabian Muniesa,2014-05-16 Do things such as performance indicators valuation formulas consumer tests stock prices or financial contracts represent an external reality Or do they rather constitute in a performative fashion what they refer to The Provoked Economy tackles this question from a pragmatist angle considering economic reality as a ceaselessly provoked reality It takes the reader through a series of diverse empirical sites from public administrations to stock exchanges from investment banks to marketing facilities and business schools in order to explore what can be seen from such a demanding standpoint It demonstrates that descriptions of economic objects do actually produce economic

objects and that the simulacrum of an economic act is indeed a form of realization It also shows that provoking economic reality means facing practical tests in which what ought to be economic or not is subject to elaboration and controversy This book opens paths for empirical investigation in the social sciences but also for the philosophical renewal of the critique of economic reality It will be useful for students and scholars in social theory sociology anthropology philosophy and economics
