Duel at Dawn Amir Alexander, 2010-04-30 In the fog of a Paris dawn in 1832 variste Galois the 20 year old founder of modern algebra was shot and killed in a duel That gunshot suggests Amir Alexander marked the end of one era in mathematics and the beginning of another Arguing that not even the purest mathematics can be separated from its cultural background Alexander shows how popular stories about mathematicians are really morality tales about their craft as it relates to the world In the eighteenth century Alexander says mathematicians were idealized as child like eternally curious and uniquely suited to reveal the hidden harmonies of the world But in the nineteenth century brilliant mathematicians like Galois became Romantic heroes like poets artists and musicians The ideal mathematician was now an alienated loner driven to despondency by an uncomprehending world A field that had been focused on the natural world now sought to create its own reality Higher mathematics became a world unto itself pure and governed solely by the laws of reason In this strikingly original book that takes us from Paris to St Petersburg Norway to Transylvania Alexander introduces

us to national heroes and outcasts innocents swindlers and martyrs all uncommonly gifted creators of modern mathematics
