The Best Things in Life Thomas Hurka, 2010-12-03 For centuries philosophers theologians moralists and ordinary people have asked How should we live What makes for a good life In *The Best Things in Life* distinguished philosopher Thomas Hurka takes a fresh look at these perennial questions as they arise for us now in the 21st century Should we value family over career How do we balance self interest and serving others What activities bring us the most joy While religion literature popular psychology and everyday wisdom all grapple with these questions philosophy more than anything else uses the tools of reason to make important distinctions cut away irrelevancies and distill these issues down to their essentials Hurka argues that if we are to live a good life one thing we need to know is which activities and experiences will most likely lead us to happiness and which will keep us from it while also reminding us that happiness isn t the only thing that makes life good Hurka explores many topics four types of good feeling and the limits of good feeling how we can improve our baseline level of happiness making more money it turns out isn t the answer which kinds of knowledge are most worth having the importance of achieving worthwhile goals the value of love and friendship and much more Unlike many philosophers he stresses that there isn t just one good in life but many pleasure as Epicurus argued is indeed one but knowledge as Socrates contended is another as is achievement And while the great philosophers can help us understand what matters most in life Hurka shows that we must ultimately decide for ourselves This delightfully accessible book offers timely guidance on answering the most important question any of us will ever ask How do we live a good life Reality, Knowledge, and the Good Life Willem A.

DeVries, 1991-01-01 *The Republic* Plato, 2012-03-01 Influential philosophical treatise of 4th century BC chiefly concerns the idea of justice plus Platonic theories of ideas criticism of poetry philosopher s role Source of the cave myth Jowett translation **Knowledge and Reality** Colin McGinn, 1999 Knowledge and Reality brings together a selection of Colin McGinn s philosophical essays from the 1970s to the 1990s whose unifying theme is the relation between the mind and the world The essays range over a set of prominent topics in contemporary philosophy including the analysis of knowledge the a priori necessity possible worlds realism mental representation appearance and reality and colour McGinn has written a new postscript to each essay placing it in its philosophical context by sketching the background against which it was written explaining its relations to other notable work and offering his current reflections on the topic The volume thus traces the development of McGinn s ideas and their role in some central philosophical debates Seen together the essays offer a many sided defence of realism while emphasizing the epistemological price that realism exacts Shifting Ground Naomi

Scheman, 2011-10-01 This volume of essays by Naomi Scheman brings together her views on epistemic and socio political issues views that draw on a critical reading of Wittgenstein as well as on liberatory movements and theories all in the service

of a fundamental reorientation of epistemology For some theorists epistemology is an essentially foundationalist and hence discredited enterprise for others particularly analytic epistemologists it remains rigorously segregated from political concerns Scheman makes a compelling case for the necessity of thinking epistemologically in fundamentally altered ways Arguing that it is an illusion of privilege to think that we can do without usable articulations of concepts such as truth reality and objectivity she maintains as in the title of one of her essays that epistemology needs to be resuscitated as an explicitly political endeavor with trustworthiness at its heart While each essay contributes to a specific conversation taken together they argue for addressing theoretical questions as they arise concretely Truth reality objectivity and other concepts that problematically rest on shifting ground are more than philosophical toys and the ground shifting these essays enact is a move away from abstruse theorizing analytic and post structuralist alike Following Wittgenstein s injunctions to just look to attend to the rough ground of everyday practices Scheman argues for finding philosophical insight in such acts of attention and in the difficulties that beset them These essays are an attempt to grasp something in particular to get a handle on a set of problems and collectively they represent a fresh model of passionate philosophical engagement

God and the Knowledge of Reality Thomas Molnar, 2021-09-28 Written simply yet comprehensively Molnar s analysis of the history of philosophy and false mysticism leads him to conclude that a return to a moderate realism will save the philosophical enterprise from a series of epistemological and societal absolutes that are embodied in contemporary rationalism and mysticism alike Issues that have been systematically excluded from discourse will have to be reintroduced into the discussion of person and providence Molnar divided the philosophical systems into two groups according to their vision of God and consequently of reality One group removes God from the human scope therefore rendering the world unreal unknowable and meaningless The second group holds that God is immanent in the human soul thereby emphasizing the human attainment of divine status and reducing the extra mental world to a condition of utter imperfection Either way the result is a pseudo mysticism a denial of the creaturely status of human beings What is most needed Molnar claims is a theory of knowledge whose ideal is not fusion but distinction between God and Man subject and object the self and the society By thus raising the question of philosophy over against magic Molnar seeks to awaken the reader from neo dogmatic assumptions and restore speculative thought to its traditional place

The Good Life Method Meghan Sullivan, Paul Blaschko, 2022-01-04 Two Philosophers Ask and Answer the Big Questions About the Search for Faith and Happiness For seekers of all stripes philosophy is timeless self care Notre Dame philosophy professors Meghan Sullivan and Paul Blaschko have reinvigorated this tradition in their wildly popular and influential undergraduate course God and the Good Life in which they wrestle with the big questions about how to live and what makes life meaningful Now they invite us into the classroom to work through issues like what justifies our beliefs whether we should practice a religion and what sacrifices we should make for others as well as to investigate what figures such as Aristotle Plato Marcus Aurelius Iris Murdoch and W E B Du Bois have to say about how to live well Sullivan and Blaschko do the timeless work of philosophy using real world case studies that explore love finance truth and more In so doing they push us to escape our own caves ask stronger questions explain our deepest goals and wrestle with suffering the nature of death and the existence of God Philosophers know that our good life plan is one that we as individuals need to be constantly and actively writing to achieve some meaningful control and sense of purpose even if the world keeps throwing surprises our way For at least the past 2 500 years philosophers have taught that goal seeking is an essential part of what it is to be human and crucially that we could find our own good life by asking better questions of ourselves and of one another This virtue ethics approach resonates profoundly in our own moment The Good Life Method is a winning guide to tackling the big questions of being human with the wisdom of the ages **Moral Wisdom and Good Lives** John Kekes, 1995 1 What Is Liberalism 2 The Prevalence of Evil 3 Individual Responsibility 4 Collective Responsibility 5 The Errors of Egalitarianism 6 Justice and Desert 7 Justice without the Liberal Faith 8 Pluralism versus Liberalism 9 The Sentimentalism of Benevolence 10 What Is Wrong with Liberalism **Knowledge, Life and Reality** George Trumbull Ladd, 1909 Reality+: Virtual Worlds and the Problems of Philosophy David J. Value, Reality, and Desire Graham Oddie,2005-03-10 Value Reality and Desire is an extended argument for a robust realism about value The robust realist affirms the following distinctive theses There are genuine claims about value which are true or false there are facts about value These value facts are mind independent they are not reducible to desires or other mental states or indeed to any non mental facts of a non evaluative kind And these genuine mind independent irreducible value facts are causally efficacious Values quite literally affect us These are not particularly fashionable theses and taken as a whole they go somewhat against the grain of quite a lot of recent work in the metaphysics of value Further against the received view Oddie argues that we can have knowledge of values by experiential acquaintance that there are experiences of value which can be both veridical and appropriately responsive to the values themselves Finally these value experiences are not the products of some exotic and implausible faculty of intuition Rather they are perfectly mundane and familiar mental states namely desires This view explains how

values can be intrinsically motivating without falling foul of the widely accepted queerness objection There are of course other objections to each of the realist s claims In showing how and why these objections fail Oddie introduces a wealth of interesting and original insights about issues of wider interest including the nature of properties reduction supervenience and causation The result is a novel and interesting account which illuminates what would otherwise be deeply puzzling features of value and desire and the connections between them

The Romance of Reality Bobby Azarian,2022-06-28

Why do we exist For centuries this question was the sole province of religion and philosophy But now science is ready to take a seat at the table According to the prevailing scientific paradigm the universe tends toward randomness it functions according to laws without purpose and the emergence of life is an accident devoid of meaning But this bleak interpretation of nature is currently being challenged by cutting edge findings at the intersection of physics biology neuroscience and information theory generally referred to as complexity science Thanks to a new understanding of evolution as well as recent advances in our understanding of the phenomenon known as emergence a new cosmic narrative is taking shape Nature s simplest parts come together to form ever greater wholes in a process that has no end in sight In *The Romance of Reality* cognitive neuroscientist Bobby Azarian explains the science behind this new view of reality and explores what it means for all of us In engaging accessible prose Azarian outlines the fundamental misunderstanding of thermodynamics at the heart of the old assumptions about the universe s evolution and shows us the evidence that suggests that the universe is a self organizing system one that is moving toward increasing complexity and awareness Cosmologist and science communicator Carl Sagan once said of humanity that we are a way for the cosmos to know itself *The Romance of Reality* shows that this poetic statement in fact rests on a scientific foundation and gives us a new way to know the cosmos along with a riveting vision of life that imbues existence with meaning nothing supernatural required
