Future Positive Michael Edwards, 2004 Published to worldwide acclaim in 1999 Future Positive has helped to revolutionise our thinking about international co operation This revised edition updates the arguments of the book to take account of the events of 11 September 2001 and offers an optimistic counter blast to unilateralism Book jacket

Democracy and Development R.C. Bhardwaj, K. Vijayakrishnan, 2018-10-26 Published in 1998 The question of whether democracy and development are allies or adversaries has long been debated and with the triumph of the democratic spirit worldwide the relationship between democracy and development has once again come to attract much attention globally The collapse of the Soviet Union and the developments in Eastern Europe led to considerable rethinking in political circles on the efficacy of the economic policies pursued in those countries and the long term viability of political systems prevalent there Elsewhere several newly industrialized countries are striving to consolidate their gains though there are differing perceptions of whether their politics conform to the classical framework of democracy or not In a remarkable turn around some other countries have initiated measures for economic reforms and structural adjustment setting aside their earlier approaches towards economic management In short the last decades of this millennium have witnessed meaningful efforts worldwide on forging a new partnership between democracy and development In February 1996 the Commonwealth Parliamentary Association jointly organized a conference entitled Parliamentary Democracy and Development Allies or Adversaries with the Wilton Park an international agency of the British Commonwealth and Foreign Office in Wilton House West Sussex United Kingdom The week long conference brought together parliamentarians diplomats administrators political scientists economists and specialists from all over the world The participants shared their views and experiences on diverse aspects of the main theme This publication presents an essentially parliamentary perspective on the correlation between democracy and development based on the discussions at the Wilton Park conference and in the light of current thinking on the subject matter

practices which will help NGOs to do so Hunger ,1997 **Futurevision** Howard F. Didsbury, Jr.,1996 Futurevision represents a new stage in the evolution of near term research and speculation into the world of tomorrow This volume which brings together twenty five leading experts in a variety of social and scientific areas attempts to foresee likely harmful or undesirable results of advances in scientific and technological ingenuity In developing an early warning system designed to elicit prudent reflection and timely action futurism has now entered the mainstream of social thought The volume is divided into eight categories the future of work education management sustainability projections about the future decline or revitalization medical ethics and the global scene as such Among the major issues taken up are the threat of persistent technological unemployment in high tech societies approaches to teaching about the future new forms of specialization and speculation virtual learning in simulated contexts planning models in business and industry that permit rapid shifts changes in the economy that result from a move from a product to a service based economy patterns of innovation in agriculture using less space to feed more people and the general analysis of forecasting and predicting future events with present methodologies Futurevision aims to recast the basic fault lines of current social scientific and technological analysis The volume emphasizes long term perspectives future relevant research and thinking weapons analysis and warfare population and planetary exploration examining what constitutes significant knowledge in this new environment and the broad area of learning and caring in meaningful contexts There is a new seriousness in future research that will be appealing to students and teachers and researchers of sociology psychology and economics especially those working with current data and qualitative research techniques **Stakeholders** Ian Smillie,2013-11-05 This unique study from the OECD Development Centre presents a comprehensive review by independent experts of the relationships and division of responsibility between the 22 member governments of the OECD Development Assistance Committee DAC and NGOs from these donor countries working in international development Additional chapters cover the roles of the European Union and the World Bank Among other themes the book looks at two very significant issues First at the way in which an overemphasis on evaluation may be leading NGOs to focus purely on measuring their output thus choosing activities which are easily accountable Second it examines the important impacts of the evolution in the funding relationship between governments and NGOs from matching grants to contracts where NGOs must increasingly compete for contracts Responding to Human Rights Violations, 1946-1999 Katarina Tomaševski,2021-10-05 This volume maps out the response of states to human rights violations It covers the period 1946-1999 and offers a complete and unmatched record for this period Its starting point is that such responses are not established and accepted state practice Traditional if unwritten norms of states behaviour developed through centuries of silence and inaction the prevalent reaction to human rights violations by another state remains the absence of any response Furthermore this book probes into evidence of active and passive complicity by reviewing aid to countries in which violations have been taking place and diplomatic initiatives undertaken to shield violators from public opprobrium Since international

law is generated through state practice the book highlights the ongoing tussle between the pre 1946 heritage of silence and inaction and the 1946 1999 haphazard pattern of responses to violations Soldiers to the Rescue Humanitarian Lessons from Rwanda Guillot Philippe, Minear Larry, 1996-07-18 The Oxford Handbook of French Politics Robert Elgie, Emiliano Grossman, Amy G. has been dominated by debates about its conceptual validity and practical ramifications It has been hailed as the cornerstone of the entire human rights system and criticized as a distracting ideological initiative Questions also persist about the role of the right in reforming the international economic order This book examines the legal and moral foundations of the right to development addressing the major issues It then considers the right to development in the global economy noting the challenges of globalization and identifying key principles such as differential treatment of developing countries participation and accountability It relates the right to broad objectives such as the Millennium Development Goals the human rights based approach to development and environmental sustainability Implications for international economic law and policy in the areas of trade development finance and corporate responsibility are assessed The conclusion looks to the legal and ethical contributions and limitations of the right to development in this new context With an academic and professional background in international law human rights and moral theology the author brings a unique interdisciplinary focus to this timely project
