Focus William J. Gavin, 2013-01-10 A bold and provocative introduction to James's philosophy that will be of interest to many scholars of American philosophy Transactions of the Charles S. Peirce Society William James 1842-1910 is a canonical figure of American pragmatism Trained as a medical doctor James was more engaged by psychology and philosophy and wrote a foundational text Pragmatism for this characteristically American way of thinking Distilling the main currents of James's thought William J. Gavin focuses on latent and manifest ideas in James to disclose the notion of will to believe which courses through his work For students who may be approaching James for the first time and for specialists who may not know James as deeply as they wish Gavin provides a clear path to understanding James's philosophy even as he embraces James's complications and hesitations A concise and mostly effective sketch of James's arc of thought in which the theme of the impressive and engaging nature of James's philosophical outline is expressly tackled Notre Dame Philosophical Reviews Gavin's book is meta continuous operating at more than one level at a time Our responsibility is to take James seriously and Gavin provides cogent reasons for doing so William J. Focus Anne Perry, 2019-09-17 In the start of an all new mystery series set in pre World War II Europe an intrepid young photographer carries her dead lover's final world shattering message into the heart of Berlin as Hitler ascends to power Thrilling reminiscent of works by Eric Ambler and Graham Greene The Wall Street Journal On vacation from London on the beautiful Italian coast twenty eight year old Elena Standish and her older sister Margot have finally been able to move on from the lasting trauma of the Great War in which the newly married Margot lost her husband and the sisters their beloved brother Touring with her camera in hand Elena has found new inspiration in the striking Italian landscape and she's met an equally striking man named Ian When Ian has to leave unexpectedly Elena usually the more practical of the sisters finds she's not ready to part from him and the two share a spontaneous train trip home to England But a shocking sequence of events disrupts their itinerary forcing Elena to personally deliver a message to Berlin on Ian's behalf one that could change the fate of Europe Back home Elena's diplomat father and her secretive grandfather once head of MI6 unbeknownst to his family are involved in their own international machinations Worried when Elena still hasn't returned from Italy her grandfather starts to connect the dots between her change in plans and an incident in Berlin where Adolf Hitler and the Third Reich are on the rise It seems the message Elena delivered has forced her into a dangerous predicament and her grandfather's old contacts from MI6 may be the only people who can get her out alive if Elena can tell the difference between her allies and her enemies New York Times bestselling author Anne Perry merges family secrets with suspense on the world stage as darkness bubbles under the surface of a Europe on the brink of change In these complicated times Elena emerges as a strong new heroine who learns quickly that when nothing is certain she can rely only on herself Praise for Death in Focus Masterful It's exceedingly

rare for an author to have the talent to blend classic elements of a thriller with compelling family dynamics and geopolitical intrigue but Anne Perry pulls it off like the consummate pro that she is And on top of all that *Death in Focus* is written in her unique literary voice I guarantee you ll love Elena Standish Brava Jeffery Deaver author of *The Never Game* **Nursing Education** Barbara Ann Moyer,Ruth A Wittman-Price,2007-08-10 Whether you are new to teaching or an experienced educator looking for innovative techniques this new resource offers a wealth of theoretical knowledge and practical guidance from a who s who of nursing education leaders From foundational concepts curriculum development and instructional principles and methods through intervention and evaluation methods for didactic and clinical settings to technology and visions for nursing education s future every aspect of teaching is covered in step by step detail **Reality Transurfing**

Vadim Zeland,2009-01-15 This third volume of three covers your place in space and time You can move backwards and forwards in both It comes down to making a transaction You don t need to push the world in your ambition to achieve your goals You will see that the world is going towards you with open arms **Making Sense of Reality** Tia DeNora,2014-09-22 What is reality and how do we make sense of it in everyday life Why do some realities seem more real than others and what of seemingly contradictory and multiple realities This book considers reality as we represent perceive and experience it It suggests that the realities we take as real are the result of real time situated practices that draw on and draw together many things technologies and objects people gestures meanings and media Examining these practices illuminates reality or rather our sense of it as always virtually real that is simplified and artfully produced This examination also shows us how the sense of reality that we make is nonetheless real in its consequences *Making Sense of Reality* offers students and educators a guide to analysing social life It develops a performance based perspective doing things with that highlights the ever revised dimension of realities and links this perspective to a focus on object relations and an ecological model of culture in action

Separate Reality Carlos Castaneda,1991 In *A Separate Reality* Castaneda resumes his apprenticeship determined to go deeper still into Don Juan s world of mystical sensation and perception to learn to see beyond the surface realities of life partly with the aid of drugs but finally and essentially through a supremely difficult and demanding effort of will **The Aesthetics of Virtual Reality** Grant Tavinor,2021-09-30 This is the first book to present an aesthetics of virtual reality media It situates virtual reality media in terms of the philosophy of the arts comparing them to more familiar media such as painting film and photography When philosophers have approached virtual reality they have almost always done so through the lens of metaphysics asking questions about the reality of virtual items and worlds about the value of such things and indeed about how they may reshape our understanding of the real world Grant Tavinor finds that approach to be fundamentally mistaken and that to really account for virtual reality we must focus on the medium and its uses and not the hypothetical and speculative instances that are typically the focus of earlier works He also argues that much of the cultural and metaphysical hype around virtual reality is undeserved But this does not mean that virtual reality is illusory or

uninteresting on the contrary it is significant for the altogether different reason that it overturns much of our understanding of how representational media can function and what we can use them to achieve The Aesthetics of Virtual Reality will be of interest to scholars and advanced students working in aesthetics philosophy of art philosophy of technology metaphysics and game studies
