Beast or Angel? Rene Dubos, 2017-09-29 The world of things is different now from what it was half a century ago but Rene Dubos doubts that there have been basic changes in life itself in those attitudes and activities needs and yearning that are the most important for happiness and suffering for hope and despair the differences between humanity and animality Sophisticated and civilized as we may be we have retained from our distant ancestors the ability to derive profound satisfaction from the small happenings of daily life Beast or Angel attempts to trace the origins of needs and yearnings that have always been those of humankind everywhere and always In this search Dubos expresses the same concerns and uses the same words when speaking of the past the present or the future the reason being that the biological and psychological characteristics of humankind have remained essentially the same for at least fifty millennia We are human to the extent that we live according to certain principles which have a human quality This quality has emerged and continues to emerge from the choices that we make throughout our individual lives and that humankind has made from the beginning of its existence To be human is to be able and willing to choose among the options that are offered to the human species by the natural order of things This book examines human species not only on the basis of the biological and psychological attributes it shares with animal species but more by identifying its choices throughout pre history and history

Tribbe, 2014-06-06 During the summer of 1969 the summer Americans first walked on the moon musician and poet Patti Smith recalled strolling down the Coney Island Boardwalk to a refreshment stand where pictures of Jesus President Kennedy and the astronauts were taped to the wall behind the register Such was the zeitgeist in the year of the moon Yet this holy trinity of 1960s America would quickly fall apart Although Jesus and John F Kennedy remained iconic by the time the Apollo Program came to a premature end just three years later few Americans mourned its passing Why did support for the space program decrease so sharply by the early 1970s Rooted in profound scientific and technological leaps rational technocratic management and an ambitious view of the universe as a realm susceptible to human mastery the Apollo moon landings were the grandest manifestation of postwar American progress and seemed to prove that the United States could accomplish anything to which it committed its energies and resources To the great dismay of its many proponents however NASA found the ground shifting beneath its feet as a fierce wave of anti rationalism arose throughout American society fostering a cultural environment in which growing numbers of Americans began to contest rather than embrace the rationalist values and vision of progress that

Apollo embodied Shifting the conversation of Apollo from its Cold War origins to larger trends in American culture and society and probing an eclectic mix of voices from the era including intellectuals religious leaders rock musicians politicians and a variety of everyday Americans Matthew Tribbe paints an electrifying portrait of a nation in the midst of questioning the very values that had guided it through the postwar years as it began to develop new conceptions of progress that had little to do with blasting ever more men to the moon No Requiem for the Space Age offers a narrative of the 1960s and 1970s unlike any told before with the story of Apollo as the story of America itself in a time of dramatic cultural change *Readings in Risk* Theodore S. Glickman, Michael Gough, 2013-10-18 Developed for use as a reference work in graduate and undergraduate courses as well as for researchers policymakers and interested laypersons the book is a unique collection of authoritative yet accessible journal articles about risk Drawn from a variety of disciplines including the physical and social sciences engineering and law the articles deal with a wide range of public policy regulatory management energy and environmental issues The selections are accompanied by introductory notes questions for thought and discussion and suggestions for further reading *The Environmental Future* Nicholas Polunin, 1972-06-18
